Comment:

Dear Casper Area BLM Planners:

As I've mentioned, I am deeply disturbed by the loose controls applied to gas and oil leasing procedures in Wyoming which currently appear to favor energy companies' reckless quest to extract resources as rapidly as possible -and seemingly by any means- in order to maximize profits. Our nation is blessed to have Wyoming's wide open spaces and abundant wildlife. These treasures should not be gambled on, yet they are now threatened by the reckless path of the influential energy industry. I kindly ask that you do everything in your legal power (everything) to ensure that important wildlife habitat and other environmentally sensitive areas are placed off limits to energy development. Wyoming's natural treasures are far more valuable than the short term gains achieved by widespread energy development.

Thank you, and please feel free to contact me if you have questions or concerns.

Sincerely,

Dan O'Leary
