14	Thank you for your agreement on the Preferred Alternative as the BLM's choice for the Rawlins Resource Management Plan. The Preferred Alternative the BLM has drafted is certainly a fair plan and meets the multiple-use mandate for a well rounded management scheme of our Wyoming public lands. The radical environmental community's claims that the Preferred Alternative will have a detrimental impact on the land and wildlife does not make sense. As you know, at a maximum on the federally owned portion of this area, there would only be one gas well allowed every square mile. This is more than fair. Thank you for taking my comments.
