Herd Management Areas (HMA) and Herd Areas (HA) have been placed in separate tables by state.

The population estimation method used on most of BLM's 177 HMAs is the simultaneous double count method.

Ground counts are still done on smaller areas where animals are easier to identify.

As is true for any estimates of wildlife abundance or herd size, there is always some level of uncertainty about the exact numbers of wild horses or wild burros in any HA/HMA or non-HMA area. The estimates shown here reflect the most likely number of wild horses and burros, based on the best information available to the BLM and may not account for every animal within the HA/HMA. BLM strives to conduct aerial surveys in each HMA once every three years. These surveys result in estimates that statistically account for animals that are not detected by any observer on the flights. In years without surveys, herd size estimates rely on additional information, including known numbers of animals removed and estimated annual population growth rates.

Populations do not reflect any changes after March 1, 2017 (i.e. foal crops or gathers).

BLM policy is to establish Appropriate Management Levels (AML) as a range with upper and lower levels.

Acres have been calculated using current digitized (GIS) maps using the UTM (Universal Transverse Mercator) projections.

Acreage transferred from BLM to another agency are not deducted from the HA acreage.

HA acreage totals are calculated based on designations made in the early 1970's.

1. Appropriate Management Levels, indicates estimated AML.
2. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
3. Most Recent Year @ AML is the last time AML was achieved on the HMA.
4. Three Rivers Complex - AML-509; includes Alamo, Big Sandy, Havasu HMAs.
5. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
6. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. HMAs created from other HAs will not have acres in the HA columns.
4. Fort Sage AML is established in both CA (29) & NV (36); administrared by CA.
5. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
6. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
8. Burros from the AZ Havasu HMA on the California side of the Colorado River are included in the Chemeheuvi HMA.
9. Burros from the AZ Cibola-Trigo HMA on the California side of the Colorado River are report as part of the Chocolate-Mules HMA.

If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
4. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
4. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMAs created from other HAs will not have acres in the HA columns.
- Fort Sage AML is established in both CA (29) & NV (36); administered by CA.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
- Black Rock East and West have been combined into Black Rock Range per the Winnemucca RMP; 2015.
- Shawave Mountains and Nightengale Mountains have been combined into Shawave Mountains II per the Winnemucca RMP; 2015.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
- No low AML established. Identified Low AML is based on 60% of AML.

MONITOR (All claimed - not mapped)	NV0617							

8. Jakes Wash became a jointly managed BLM HMA & FS territory with the White Pine Land Exchange, 2007 and was returned to HA status with the Ely RMP, 2008.
9. Never designated - Managed as interim HMAs within Spring Mountain HA.
10. Murphys Wash became a BLM HA with the White Pine Land Exchange, 2007.
11. Butte and Wilson Creek HAs/HMAs were created from other HAs and migrated into different HMAs.
11. There are 600 stray (state) horses on the Pah Rah HA.
12. Animals listed as Outside Herd Areas are BLM animals outside of a Herd Area. Other animals (estrays, DODs jurisdiction) are not listed in the totals.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
2. Most Recent Year @ AML is the last time AML was achieved on the HMA.
3. Horses on the FS winter on BLM but spend the rest of the time on FS land. Numbers will fluctuate with the weather and range conditions.
4. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
5. Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- Heath Creek-Sheepshead (OR0004) was combined with Sheepshead (OR0016) in the Southeast Oregon RMP, Sept. 2002.
- Coyote Lake was combined with Alvord Tule Springs in the Andrews Management Unit RMP, 2005.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

- High End AML is reported as the maximum number of animals sustainable on a yearlong basis.
- Most Recent Year @ AML is the last time AML was achieved on the HMA.
- HMA's managed within the Bible Springs Complex include: Bible Springs, Four Mile, and Tilly Creek.
- Muddy Creek HMA is comprised of areas joined together for management purposes (Muddy Creek & Sinbad horse HAs); Price RMP, 2008.
- % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.
- Last Gather Mo/Year is based on 10 or more animals removed during the fiscal year.

1. High End AML is reported as the maximum number of animals sustainable on a yearlong basis.

2. Most Recent Year @ AML is the last time AML was achieved on the HMA.

3. HMAs created from other HAs will not have acres in the HA columns.

4. % of AML: If estimated population is above High AML, this value is the estimated population divided by the High AML (as a percentage of High AML). If estimated population is below

Low AML, this value is the estimated population divided by the Low AML (as a percentage of Low AML). "Within AML" means that the estimate is between Low AML and High AML.

5. Gather Mo/Year is based on 10 or more animals removed during the fiscal year.
