**GENERAL INSTRUCTIONS**

This form is designed for submitting a complete and accurate account of monthly activity and performance of geothermal wells and production facilities on Federal leases. The report must include wells on the lease that have not been abandoned.

**SPECIFIC INSTRUCTIONS**

**Item 9:** Group wells together that are producing or injecting into the same reservoir or zone, and distinguish reservoirs or zones by name such as upper, lower, formation name, etc. Within each zone, list injection wells separately from production wells. In column 3, show the type of well reported (P=production, I=injection,<sup>1</sup> D=disposal,<sup>2</sup> WS=water supply, OB=observation, HE=heat exchange, O=other (specify under remarks) and in parenthesis the current month end status for each well or completion (i=injecting, f=flowing, p=pumping, si=shut-in, susp=suspended, obs=observation, o=other (specify under remarks)). For heat exchange wells, report production in British thermal units, Btu, and production rate in Btu/hr. Production or injection rate is the total amount of mass flow divided by the total number of active well hours.

**Item 10:** In reporting current operations, particular attention should be directed to 43 CFR 3264.2-4(e).

**Remarks:** Report in this section any environmental monitoring conducted and the results obtained.

<sup>1</sup> An injection well is used for injection of fluids that are not produced from the formation or reservoir.

<sup>2</sup> A disposal well is used to inject fluids into the same formation or reservoir from which they are produced.
