Lower Sonoran and Sonoran Desert National Monument Resource Management Plan

Comment Number: 1

Cited Section ID: Appendix V Areas of Critical Environmental Concern (ACEC) Eval

Comment Title: Lower Sonoran and Sonoran Desert National Monument Resource Management Plan

Comment:

Concerning the Lower Sonoran and Sonoran Desert National Monument Resource Management Plan I would move for a "No Action" alternative especially concerning recreational use of these areas for outdoor activities camping, shooting, hunting, photography, hiking or horseback riding etc. It seems that the current practices are more than sufficient as I see no first hand evidence of significant impact, if any, from the above stated recreational activities. Additionally, certain areas are already closed to off road vehicles and I believe that those closures are more than adequate in protecting the landscape. In conclusion, I am also very much opposed just because of the economic impact this would have on the state and even the nation when we can least afford it as Americans. Thank you for your attention.
