I feel that Alternative Plan A is the best plan for the SDNM and LS areas is due the lack of attention in addressing the model rocket club that uses this area to launch and retrieve their rockets. This is one of the few areas where this group can launch their large model rockets (sizes my exceed 10 feet in length). By following any other plan, the ability of this hobby will be impacted in a negative way. By adapting plan A, this group will be able to continue the use and advancement of this hobby for young and old members alike.

Save SDNM & LS for model rocket use

Comment Title: Save SDNM & LS for model rocket use

Comment:

Alternative A is the best for Model Rocket launches because it keeps the SDNM & LS area available to the public without the restrictions being place on the area by the other alternatives.
