Comment:

Respectfully, I hereby submit my comments in an attempt to maintain status quo for the continued love and enjoyment my family and the generations before us and hopefully those after us will have the opportunity to experience. My husband and I lived in Harquahala Valley, home to Saddle Back Mountain, for many years before moving our family to Arlington, AZ. To this day we have continued ties to Harquahala as did my husband's father and his grandfather whom helped settle Harquahala in the early 1950s. And Arlington has been our home for over 20 years now. This most immaculate desert area is where my children and now my grandchildren learned their love of the outdoors, love of family camping, safety of many jeep rides on desert designated trails, and most importantly people who care are the best stewards of this land. Children must have this "Freedom" to learn what true responsibility to mother earth is really about. Above all they learned respect. Please do not put restrictions which will only inhibit many of us from no longer being able to share. Caring parents and grandparents, need no further Government restrictions on this land, so that we as the older generation may teach this love and respect to our youth. I myself also want to be able to continue to explore, camp, hunt, paint, enjoy others that I meet, but, most importantly share with others. My husband is in this 60's and I will be in a couple of months. Please do not impose further restrictions, let us continue to enjoy this beautiful land as it is. Sincerely, Valorie Melton
