Comment Title: Family Heritage

Comment:

Closing these area's would make a huge impact on myself and family. Our family has enjoyed this beautiful desert for many generations. We enjoy hunting, camping, horseback riding, offroading and shooting our firearms. These are some of the things our parents taught us many years ago in these same areas. I would hate to see this happen for myself, my children and future generations to come. Being able to enjoy this area with my family is very therapudic. I have lived and played in these areas all my life. As areas get closed it tends to funnel all the people who want to enjoy the desert into the same place, which over crowds these areas that are still open. I am very passionate about these desert areas and would not want them taken away.

Sincerely, Steve Melton
