Recreational use should remain the same

Comment Number: 1

Comment Title: Recreational use should remain the same

Issue: 10756

Comment:

The use of these lands for recreational use should not be prohibited or require any permits for private use, with the exception of areas that may disturb endangered wildlife or archaeological sites. The only concern I see is the dumping of garbage. I believe that the best use of resources is to police these areas more regularly and punish those offenders to the maximum extent of the law. Many people have been using these areas for recreational purposes for decades with little or no impact to the surrounding environment. My punish everyone for the bad judgement of the few?
