My family attended the Sonoran desert Heritage information session in Buckeye and I feel that there's enough land already closed off that we can't use to go jeeping, camping, picnicing - things that we've always done in the desert. We always keep the areas clean that we travel through and even pick up trash from others that I'm sure inadvertently left it. I have very special places with many memories throughout the years with my belated husband and my children that I go to on a regular basis - these places are within the areas that are proposed for wilderness. Please help me keep these lands open for public use as I can not walk to get to these places at this time in my life.
