Note: a 1/7 interest in this shaft allotted to this claim - Value - - - - - \$ 100.00

The reason for allotting the value of this shaft equally to the seven claims of this survey is that this shaft is centrally located with respect to all the claims of this survey. The most economical development of the ore deposits of this district is done by means of shafts and of drifts run from the various levels. As this shaft gains in depth drifts can be run economically towards the claims of this survey thus developing the claims. See attached plat showing contour lines.)
