COMMON IMPROVEMENTS

Improvement No.3 on the Maine Fraction Lode, a tunnel, was run as a deep level tunnel in a direction that would tend to develop ^{the} upper or westerly end of the group. The tunnel starts at the lowest practical point for a tunnel at the westerly end of group and runs to intersect the different lodes at varying depths. I consider the workings of No.3 tunnel, a common improvement, and of such character as to redound to the benefit of the Maine Fraction, Hampshire, Oregon, Ohio, Idaho and Utah lodes. The Arkansas, having been under different ownership at the time this improvement was made, ~~exceedingly~~ does not share in the interests or assignment of credits. The Texas, Vermont and Custer lodes are situated at a lower elevation than the improvement mentioned, and more favorable tunnel sites can be found for their development, accordingly, this improvement does not redound to the benefit of said claims, and they should not share in the assignment of credits.

INSTRUMENT

This survey was made with a Lietz Light Mountain transit-theodolite, No. 13-5929. The courses were deflected from the true meridian, as determined by observation by the use of the Saegmuller Solar Attachment. The distances were measured with a 300 foot steel tape.

REPORT

The section corners on the line between Sections 23 and 24, T.16 N.R.2 E. are iron posts properly set and marked as described in the field notes of said sections.

Survey No. 1213

No. 19 Lode. The corners adjoining this survey are stones properly set and chiseled with the number of corner and survey. I do not agree with the courses and distances of this lode.

No. 7 Lode. The corners No. 5 and 6 are stones

and 4/
 Nos. 1 and 2/are missing and bearing rocks have been displaced. Cor. No.5 is missing but a bearing rock is still in place. The point for Cor. No.4 was established on the side line of NO.7 Lode Sur.No.1213, at the reported distance from Cor.No.5. Cor.No.3 is a stone properly set and chiseled with the number of corner and survey. The point for Cor. No.2 was determined from data obtained from previous surveys, when the corner was in position.

The discrepancies between the lines of this survey and of other prior surveys are due to errors in the latter.

The 1/4 corner to sections 23-24 T.16 N.R.2 E. is the nearest corner to each location of this survey, that is in such condition as not liable to be lost or obliterated by erosion or otherwise. The 1/4 corner between sections 23 and 26 although closer to some of the locations of this survey is not as favorable a corner to make connection to, and not liable to be permanent, ~~and~~ as it is located on the mountain side, and subject to erosion of rain waters, which is very pronounced in this locality.

MINERAL SURVEY NO. 3197

SUPPLEMENTAL REPORT OF IMPROVEMENTS

I hereby certify that the value of labor and improvements made upon or for the benefit of the claims embraced in Mineral Survey No. 3197, by the claimant or its grantors is not less than five hundred dollars for each claim and that said improvements, in addition to those which were reported at the time of making the survey consist of:--

U. S. SURVEYOR-GENERAL'S FINAL CERTIFICATE ON FIELD NOTES.

Department of the Interior,

OFFICE OF U. S. SURVEYOR-GENERAL,

Phoenix, Arizona.

December 24, 19 15

I, U. S. Surveyor-General for District of Arizona

do hereby certify that the foregoing transcript of the Field Notes, return and approval of the survey of the mining claim of

HARRY PARKER

known as the CUSTER, MAINE FRACTION, HAMPSHIRE, OHIO, OREGON,
IDAHO, TEXAS, ARKANSAS, VERMONT, UTAH.

situate in VERDE

Mining District, YAVAPAI County, ARIZONA.

in Sections 23 & 24., Township No. 16 N., Range No. 2 E., and

designated as Survey No. 3197, has been correctly copied from the originals on file in this office; that said Field Notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

And I further certify that five hundred dollars' worth of labor has been expended or improved for each of
 or for each of
 or for each of
 improvements made upon said mining claim by claimant or his grantors, and that said improvements consist of 22 cuts, 1 shaft and 10 tunnels, total value \$6365.00

Tunnel No. 3 on the Maine Fraction lode being a common improvement for the benefit and development of the Maine Fraction, Hampshire, Oregon, Ohio, Idaho and Utah lodes of this survey, and only said lodes, an undivided one-sixth interest therein, value \$230, is properly credited to each of the said lodes.

and that no portion of said labor or improvements has been included in the estimate of expenditures upon any other claim.

I further certify that the plat thereof, filed in the U. S. Land Office at Phoenix,

Arizona,

is correct and in conformity with the foregoing Field Notes.

Frank S. Ingalls,

United States Surveyor-General for Arizona.
