CHAINS

The south, east, west and north boundaries and the sub-divisional lines were surveyed in 1882 by A. P. Johnson. The south, east and west boundaries and the sub-divisional lines were partially resurveyed in 1915 by S. E. Blout. The east boundary was partially resurveyed in 1937 by R. F. Wilson.

The following field notes are those of remonumentation of cadastral survey corners by agreement with the U. S. Forest Service. The detailed cooperative agreement was approved by the Director, Bureau of Land Management, by memorandum (5.04b) dated October 16, 1958.

The approval of the Special Instructions on March 29, 1966 gave authority to proceed with the remonumentation in accordance with the Director's Order No. 541, dated April 21, 1961.

The assistants furnished by the Forest Service remonumented the original corner positions after verification. An open sight compass was used to obtain the bearings and a standard steel tape was used to measure the distances to corner accessories.
