

FOREWORD

Nearly all of the personnel data sheets in this notebook were copied from Volumes 18, 19, 23, 30, 31, 32, 39, 40, 46, 59, 60, 63, 76, 77, 90, 108, 109, and 110 (U. S. Transitmen, Surveyors, Cadastral Engineers) of the files of the Supervisor of Surveys. These volumes cover the period from June 25, 1910 to August 31, 1917. The personnel data sheets of some assistant supervisors were taken from volumes of correspondence with those assistant supervisors. The data sheets are not necessarily from the first employment of a particular surveyor, and there are several sheets for some.

There are no sheets for a number of surveyors for whom the file contains an oath, employment notice, or correspondence. Those missing may be for former Examiners of Surveys for whom there would be earlier files, and who served only a short time under the direct system, for temporary transitmen, or for appointees who declined to accept jobs. The surveyors who appear from the correspondence to have executed surveys, but for whom no data sheets were found thus far in the files, are listed below. This list is probably not complete.

Ahrens, Arnold F. (1915)	Hemphill, William Lind (1915)
Berman, Jacob (1916)	Hooper, James C. (1915)
* Bird, Elliot (1917)	Jacobs, Wilber F.
Brousseau, Andre Ringgold (1915)	Joslyn, Don D.
Burnham, Newell J.	Kinney, Alfred R. (1916)
Cartier, George E.	Lewis, Morgan M. (1915)
Caudle, Carl R.	McKinney, Jr., John M. (1914)
Chubb, W. Morris	Omeg, Robert F.
Clark, Joseph C. (1915)	Pearson, George W.
Clark, Robert E. (1917)	Potter, Newton E. (1915)
Collier, R. E. L. (1911)	Purington, Heber P. (1916)
Cumming, Adelbert E.	Richardson, Guy H. (1915)
Durham, Ivy E.	Riddell, George X. (1916)
Dupuy, Victor N.	Secor, W. O.
Ebert, Lawrence R. (1915)	Siebecker, Carl L. (1917)
Embree, Amos E. (1915)	Sorrels, Gerald A. (1917)
Gardiner, George W.	Thompson, Edward N. (1915)
Gelwix, Daniel E.	Trippet, William K.
Guerin, Charles V. (1915)	VanWinkle, Frank J.
Harshbarger, Eugene L. (1915)	Wilkes, F. Marion
Hayden, Thomas A. (1915)	Wills, Wilbur S.

Those for whom no year is noted first appeared before 1915 in the records. It is probable that personnel data sheets for some of the above-named men will be found in later volumes of the Supervisor's correspondence.

* In later volume

OFFICE OF THE SUPERVISOR OF SURVEYS
Denver, Colorado

July 25, 1927.

MEMORANDUM

Mr. Alonzo H. Adams entered this Service under authority of the U. S. Civil Service Commission, April 18, 1912, as a U. S. Surveyor. In 1918 he was promoted to the position of Cadastral Engineer, with enlarged duties, including the execution of the more complicated resurveys in Colorado and other states, particularly Nebraska and Washington. Because of his exceptional abilities he was detailed on several occasions to Washington, D. C., where he was engaged in the examination of survey returns prior to their acceptance. He also had general supervision of the manufacture of iron corner posts for this Service at the Rock Island Arsenal, Rock Island, Illinois.

Mr. Adams' technical ability, especially in modern resurvey practice, his high character and his devotion to duty, are qualities that are recognized by all, not only throughout this Service but by private engineers and the public in general.

By reason of the inclusion of field cadastral engineers in the class made retireable by law at 62 years of age, passed at the last session of Congress, Mr. Adams was retired on June 30, 1927.

Supervisor of Surveys.

Chief Cadastral Engineer

September 18, 1947

MEMORANDUM

To: The Director, Bureau of Land Management, Washington, D. C.
From: Acting Chief Cadastral Engineer.
Subject: Death of Mr. Clyde W. Atherly.

I learned this morning of the death on September 15 of Mr. Clyde W. Atherly, age 67, at Evanston, Wyoming. Funeral services will be held in Denver on September 19.

Under an appointment by the President, Mr. Atherly served as United States Surveyor General for Wyoming from October 26, 1921 to June 30, 1925.

Appointed Cadastral Engineer by the Secretary of the Interior on July 1, 1925, Mr. Atherly was engaged until October, 1942, in the survey of public lands in the State of Wyoming. He was Office Cadastral Engineer of the Public Survey Office, Olympia, Washington, from May, 1942, to April 30, 1945, when he resigned to enter private practice as a Civil Engineer at Basin, Wyoming.

Mr. Atherly is survived by his widow, Mrs. Elsie L. Atherly, a daughter, Mrs. Lois J. Torgerson, and a son, Clifford M. Atherly.

A. C. HORTON, JR.

Acting Chief Cadastral Engineer.

*Mr. Atherly was born in Fort Collins, Colorado
April 5, 1879*

November 12, 1925

Chief, Division of appointments,
Department of the Interior,
Washington, D. C.

Dear Sir:

Receipt is acknowledged of your letter of October 23, 1925, in which you call my attention to a discrepancy of two days in the date of my birth and requesting me to furnish your office with evidence, such as birth certificate, bible or other family record, showing the correct date.

I regret to advise you that all records as to the date of my birth were destroyed in the fire of 1906 and therefore I am unable to furnish either a birth certificate or photostat copy of the bible record.

There has never been any question as to the correctness of the date (September 26, 1875) and I am positive that all previous personal history sheets will show this date, with the exception of the one mentioned in your letter, the 28, which is undoubtedly a typographical error.

I trust that this statement will be sufficient to clear your records.

Very respectfully,

(Signed) (Miss) Iva F. Bailey,

Through
The Supervisor of Surveys.

Washington, D. C.

Dear Sir:-

I am out of employment at the present time and decided to write to you to see if you had any thing to offer me on the land surveying force this summer. I received a letter from you last July asking me if I cared to accept a position as Transition, but at that time I was employed by the Snake River Irr. Co. of Boise, Idaho.

I am enclosing a detailed account of my past engineering experience in which you will see I have been engaged at this kind of work considerably, being a Deputy under the Hon. Surveyor General of Wyoming.

From what my brother says I think I could manage a camp and would prefer a position as Engineer in Charge of a camp.

Very truly yours,

--- W. P. Bandy ---
J

EXPERIENCE and REFERENCES

1905-

Was employed for 2 1/2 years as U.S. Deputy Surveyor, from June 1st to December 1st.

Reference E.H. Grant, Algona, Iowa.

1906-

In April I was appointed U.S. Deputy Surveyor by Honorable J.F. Moran, U.S. Surveyor General for Wyoming, with a contract of eight townships in Big Horn county Wyoming, in partnership with E.H. Grant.

October 15th quit the survey on account of weather and went on to work for Mr. E.F. Taber, Project Engineer of the U.S. Reclamation Service as rodman.

Reference E.F. Taber, St. Ignatius, Montana.

1907-

In February I was promoted to transit-man by Mr. Taber.

May 1st returned leave of absence to finish by Gov't contract, returning June 15th and took charge of part of canal construction, directly under Mr. F.F. Pendergast and Mr. W.A. Stebbins, Assistant Engineers, U.S.R.S.

Reference W.A. Stebbins, Powell, Wyoming.

November 1st secured a position as Assistant Engineer for the Big Horn Basin Development Company of Cody, Wyoming in charge of tunnel and canal construction including concreting, until January 20th 1908, when they suspended further operations on account of the financial condition of the Company.

Reference G.W. Zorn, Chief Engineer, Cody, Wyoming.

1908-

September 1st to October 10th, was Locating Engineer for the Snake River Irrigation Company of Boise, Idaho at a salary of \$100.00 per month and expenses.

November 1st. to December 20th, was employed by the Northern Pacific R.R. Co. surveying town-sites, at \$5.00 per day and exp.

1910-

March 1st returned to the Snake River Irrigation Co. as Engineer in Charge of Canal Location and Construction at \$135.00 per month and expenses until September 1st when I was raised to \$150.00 per month and expenses.

November 15th the Company suspended work for the winter.

Reference C.F. Franklin, Chief Engineer, Boise, Idaho.

" A. Lincoln Fellows, Consulting Engineer, 455 Century Building, Denver, Colorado, who made a report on the Snake River Project.

DEPARTMENT OF THE INTERIOR,

GENERAL LAND OFFICE.

Washington, D. C. March 23, 1922.

Mr. Frank M. Johnson,
Supervisor of Surveys,
Washington, D. C.

Dear Sir:

Following are some facts about my past work that I desire to present for your consideration if at any time the question of my promotion, or classification may be before you.

I have been engaged in engineering work for about seventeen years, having been appointed U. S. Deputy Surveyor in 1906, and have been doing surveying and engineering work (Land and Irrigation) ever since.

1920: I was in charge of the dependent resurvey of eight full townships, Group 174 Montana, I having two Associates. The obliteration was very extensive, most all of the corners being set by proportionate measurement. The eight townships were completed in less than five months. Notwithstanding the fact that more than 90% of the land was filed upon, and probably 75% patented, all of the settlers were satisfied and no metes-and-bounds surveys were necessary.

All corner adjustments were checked by Mr. Mathias, who complimented me upon the methods I had used, and the results obtained.

1921: You are familiar with the details of my 1921 assignment to Group 181 Montana on the Crow Indian Res. I had

three Associates and a crew of twenty assistants, twenty-four in all, on this work. This work consisted of 1225 miles of retracements, resurveys, and original surveys, and was completed, and the completed returns filed with the Surveyor General in less than five months from the day I left Helena for the field. The field notes were completed within 48 hours after the last mile of line was run.

Although there were some complications, the survey was approved by the Surveyor General, and accepted by the G. I. O. without criticism, or requiring any corrections other than a few typographical errors.

I was complimented by the Surveyor General (initialed T.F.M.) on the "careful and thorough manner in which I had prepared the returns."

I have advocated and encouraged the practice of setting corners well, and believe that all corners in the so called "prairie country" should be set 30 ins. in the ground.

I have always enjoyed the full loyal support of my Associates and crews. They nearly all having expressed the desire to go out with me again. I believe that a strict camp discipline makes for efficiency, and respect of crew.

Economy: I believe comparison of costs taken from official reports from Montana will show mine to be the cheapest truck operation for 1919 and 1920 (1921 not available to me) and the cost of camp subsistence to be well below the average. I believe in setting a good table, but, in economizing by securing the best possible prices, and eliminating waste.

Care of Instruments: The transit assigned to me at

present has not been out of adjustment over 5' since 1916. I have been assigned to adjust all surveying instruments in Helena for several years.

My relations with Mr. Harrison have been most cordial, his confidence is indicated by the fact that he has assigned me to the most important work the last few years.

Nearly all of my work in Wyoming, both while as a Deputy and as a U. S. Surveyor was on resurveys. Since being in Montana I have done most of the resurveying that has been done there. Therefore, I believe I could qualify as an expert in that line.

I have a diploma from The Blackstone Institute, Chicago, having graduated from their course in Business Law.

I am an Associate Member of the American Society of Civil Engineers.

Very respectfully,

William R. Bandy
U. S. Cadastral Engineer.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE.

Glasgow, Montana, May 30, 1922.

Mr. Frank M. Johnson,
Supervisor of Surveys,
Denver, Colo.
Through Mr. J. Scott Harrison.
Dear Sir:

My younger brother, Willis Bandy, took the examination for U. S. Transitman May 10, and is desirous of getting into the Surveying Service. He is 31 years of age, well, and has a wife and two children. He has had four years experience on Public Land Surveys, as chairman, two years with my late brother Richard E. and the Brunts, and two years with me under the direct system, since then he has done some survey work as a Deputy County Surveyor.

He is familiar with the use of solar instruments, and capable of running a party.

If he should pass the examination and receive an appointment, I feel sure you would be satisfied with his services. If there is an opening for a temporary appointment I think he would be available.

I am writing you this way concerning my own brother, because all of his Public Land Experience has been with his brothers, otherwise I would refer you to some disinterested parties.

Very respectfully,

Willis Bandy

Cadastral Engineer.

Mr. Frank M. Johnson,
Supervisor of Surveys,
United States Department of the Interior,
Denver, Colo.

Dear Sir:

You will no doubt be interested to learn that Mr. William R. Bandy of the General Land Office, at Helena, Montana, has enrolled for our Course of Law Instruction, given through the home study method.

Mr. Bandy completed, some few years ago, a short training program offered by us, covering the fundamentals of those branches of the law pertaining to business itself. He is now proceeding with a more advanced Course of Training, and when his present outline of study is finished he will have covered the entire field of law.

This training, as you know, is given in such form that the student may do his study at home and during his spare time, without any interference whatever with his regular duties. I feel sure that Mr. Bandy is to be commended upon his foresight and willingness to spend his spare time in self improvement in order that he may render more effective and more efficient service in his position.

The Course has been recommended and endorsed by many well know lawyers and judges, and it is generally recognized as the most thorough training in law given by the correspondence method. If you should desire any further information regarding the training program, or if you have any suggestions which you think will be helpful to us in conducting the Course for Mr. Bandy, we will be very glad to hear from you.

Very truly yours,

J. C. Beetham,
Director of Service.

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

OFFICE OF ASSISTANT SUPERVISOR OF SURVEYS
Thermopolis Wyoming,
October 10th., 1925.

Mr. Herman Jæckel,
District Cadastral Engineer,
Denver Colo.;

Dear Sir.

Answering the following questions:-

No. 14.

8 years common school.
4 years high school.
1 year Military academy.
1 year college.

No. 15.

Service in the Army during the World War.

No. 16.

All information regarding this question is at home with my discharge papers. As soon as I get home I will mail you the necessary information required.

In regard to the time I entered Civil Service, I think that the date was March 20th., 1920. Have they that information in the Denver Office.

Under question 15, I think that I come under the Vet. Bu. Beneficiary, as I am drawing \$9.00 per month compensation.

Very Respectfully

Herbert W. Bond
U. S. Surveyor.

Kenneth W. Bond

DEPARTMENT OF THE INTERIOR

OFFICE OF U. S. SURVEYOR GENERAL

Cheyenne Wyoming, October 23rd., 1925.

Mr. Herman Jaeckel,

The Salt Lake Tribune, Friday, July 21, 1967

Survey Aide Dies at 79 In Bountiful

Special to The Tribune
BOUNTIFUL — Arthur W. Brown, 79, Bountiful, retired regional chief of cadastral engineering conducted by the United States Bureau of Land Management in Utah and Colorado, died of natural causes Thursday in a Salt Lake hospital.

Employed by the Bureau Mr. Brown of Land Management for 53 years, Mr. Brown was instrumental in introducing photographic processes into cadastral engineering, which defines and records boundary lines.

Surveys Sequoia Park

He also made the initial survey of Sequoia National Park in California.

A member of the First Presbyterian Church, Mr. Brown also was a member of the National Association of Retired Civil Employees.

Mr. Brown was born July 19, 1888, in Kokomo, Ind., to John T. and Amelia Benter Brown. He married Beatrice Risser on Nov. 18, 1914, in Colorado Springs, Colo.

Funeral Service Saturday

His survivors include his widow and three sons, Floyd L. of Villa Park, Ill.; Robert L. of Cleveland, Ohio. Arthur W. Jr. of Idaho Falls; 9 grandchildren, and a brother, E. Glenn, of Tulare, Calif.

Funeral services will be held Saturday at 2 p.m. at 574 E. 1st South, Salt Lake City, where friends may call one hour prior to services.

Burial will be in the Mount Olivet Cemetery.

Special Experience in Public Land Surveying:-

I assisted J. F. Wilson on the survey of public lands during two seasons and have had a large amount of experience in retracing old lines for ranchman. I spent 1 year in the Forest Service examining Agricultural lands and large part of the work consisted of locating old corners of the Gov't Survey.

Mr. Herman Jaeckel,
District Cadastral Engineer,
Denver, Colorado.

Dear Sir:

The personnel card of Roy E. Chase, U. S. Cadastral Engineer, on file in this office, shows his first service with the Government to have been as Forest Agent from May 1909 to July 1910, at \$1200 per annum. The next entry shows his appointment April 18, 1912 as U. S. Surveyor, Grade 4, \$125 a month. If Mr. Chase was employed at any time by the Government between July 1910 and April 18, 1912, please have him note below the record of such service:

<u>Bureau</u>	<u>Date appointed</u>	<u>Title</u>	<u>Salary</u>	<u>On duty</u>
U.S.G.L.O.	July 1910	U.S. Surveyor	\$125 per mo.	July 1910.

Very respectfully,

(Signed) Frank M. Johnson
Supervisor of Surveys.

Fred L. Cumming, Prominent Engineer, Dies

Highway Engineer Succumbs to Major Operation

Fred L. Cumming, 64, 635 N. Warren, a native of Helena and engineer at the state highway commission, died early today in Spokane following a major operation, friends here were notified.

Son of Mr. and Mrs. A. E. Cumming, pioneer Helena residents, he was born in Helena in 1883 and received his degree in engineering at the University of Michigan in Ann Arbor.

Mr. Cumming had a long and brilliant career with the United States geological survey department, serving as a cadastral engineer from 1911 to 1935. He left government service in 1935 and joined the engineering staff of the highway commission.

He was a member of Helena lodge No. 3, A.F.&A.M., the Scottish Rite and Acacia Brotherhood.

With him at the time of his death was his wife, Martha E. Cumming. Also surviving are two sons, James A., a student at Stanford university in Palo Alto, Calif., and Wayne K., Montana State university student; a brother, James A., of Seattle, and two sisters in Great Falls, Mrs. Dora Spencer and Mrs. Bertha McLain.

The body will be brought to Helena for funeral services and burial. Arrangements are pending.

Mr. Fred L. Cumming

Mr. Fred L. Cumming was born at Helena, Montana, June 20, 1885. He was a graduate of the University of Michigan at Ann Arbor, Michigan.

Mr. Cumming entered the Government Service April 28, 1911, and served as U. S. Transitman, Surveyor, and Cadastral Engineer, to the time of his retirement on June 30, 1940, all of his Federal career having been spent in the service of the General Land Office, executing cadastral surveys in Montana.

DENVER, COLORADO

August 19, 1938.

Dear Tom:

In order that I may go over matters with Horton prior to starting on our automobile trip in Southern California, Arizona and New Mexico, I am leaving Denver at 5:45 o'clock Sunday afternoon, August 21, over the Union Pacific System for Los Angeles, where I will arrive at 8:30 A.M., Tuesday, August 23. While in Glendale, I will stay at "The California" hotel which is only a few blocks from the office.

Hope to see you and Mr. Wolfsohn soon.

Sincerely,

P.S. I attach a note from Don telling of Dunnington's passing. You, of course, have heard of the sudden death of Parrott.

Oren Gibson Elder.

Appointed Draftsman, International (water) Boundary Commission at El Paso, Texas, July 13, 1898, at salary of \$100 per month plus \$1.00 per day for rations. Continued there until completion of work February 28, 1899.

Appointed Draftsman, U. S. Surveyor General's Office, Boise, Idaho, August 8, 1900. Was employed continuously in said office until July 19, 1905, when transferred as Chief Draftsman at \$1600 per annum and ordered to report to Bureau of Lands, Manila, P.I. Trip consumed two months at half pay, July 25 to September 25, 1905, owing to break down of first steamer, delayed sailing of second boat and long stops at various ports. Pay raised to \$1800 after probation period of six months. Resigned September 25, 1907, with accrued leave at full pay until February 15, 1908.

Appointed Draftsman, U. S. Surveyor General's Office, Boise, Idaho, June 15, 1908. Was reinstated in Philippine service and transferred to the General Land Office Service. My time in this office has been continuous except one-month (January 1909) on furlough without pay.

Appointed Chief Draftsman at U. S. Surveyor General's Office, Boise, Idaho, December 1, 1922, at salary of \$2340 per annum. My present pay is \$2400 per annum. My salary has varied in this office from \$4.50 per diem to my present salary July 21, 1925.

Salisburyville, Quebec

Your ratings in the examination taken on AUG 1 - 1916, are as follows:

SUBJECTS.	Relative weights.	Ratings.
1. <i>Preliminary training and experience</i>	<i>3</i>	<i>80</i>
2. <i>Responsible experience in topographic and geodetic surveying, and fitness</i>	<i>7</i>	<i>88</i>
3.		
4.		
5.		
6.		
7.		
8.		
9.		
10.		
11.		
12.		
AVERAGE PERCENTAGE.		<i>85 60</i>

N. B.—Every competitor in an examination comprising both grade and technical subjects must pass with an average percentage of at least 70 on the technical subjects in order to become eligible for appointment. Should a competitor fail to pass on the technical subjects the grade subjects will not be considered.

The number of persons whose names are ahead of yours on the register of the same State (District) established from this examination is *4*. Unless you should be appointed sooner, your eligibility will expire.

Following is the method of finding the average percentage of an examination: Multiply the rating of each subject by the relative weight of the subject, add the products, and divide the sum of the products by the sum of the relative weights. The quotient will be the average percentage.

The names of competitors who obtain an average percentage of 70 (or, if preferred soldiers or sailors, an average percentage of 65) will be entered on the register of eligibles, with the average percentage obtained: but those whose average percentage is below 70 (or 65, if preferred soldiers or sailors) are ineligible to appointment. The period of eligibility for those who obtain an eligible average percentage is one year. Only those competitors have right to a claim of preference who have been honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty. (See back of this sheet.)

All examination papers are rated with great care, according to the published rules for rating, under a system which insures accuracy and absolute fairness, and all ratings are reviewed by examiners who take no part in the first rating. For this reason the average percentages of competitors whose papers are reviewed on appeal are seldom raised or lowered, but if any changes are made in the ratings the chances are that they will be against the competitors, because in the original ratings examiners are more likely to overlook errors than to overcharge them. Appeals will not be considered unless received at the Commission within sixty days from the date of this notice.

In addressing the Commission always state the kind, date, and place of the examination to which you refer, the average percentage obtained, and your legal residence.

Very respectfully,

JOHN A. McILHENNY,
President.

DECLARATION OF APPOINTEE.

This form must be executed by the appointee before he enters on duty. If the answer to question 6 includes two or more names and is not IDENTICAL in every respect with answer to similar question in the application, this form must be submitted by the appointing officer for approval before appointment may be authorized. ATTENTION IS DIRECTED TO THE PROVISIONS OF LAW AS QUOTED ON ATTACHED FORM. False personation in an examination is a criminal offense, and will be prosecuted accordingly.

QUESTIONS.	ANSWERS.
1. What was your age on your last birthday and what was the date of your birth?	<i>Aug 11th 1882 34 yrs.</i>
2. Where were you born?	
3. What were the names of the persons who signed the vouchers to your application?	<i>James H. Van Dyke, Lester Hill.</i>
4. In what city or town, and in what building were you examined?	<i>Juneau Assessed Receiver's Office.</i>
5. To what position have you been appointed? State the salary. If temporary, so state.	<i>1st Assistant, U. S. C.</i>

6. Are any members of your family in the U. S. Government Service? Answer "yes" or "no" *Yes*. If so, fill in the following blanks. If additional space is necessary use back of this sheet.

Name.	Post office address.	Position and department or office in which employed.	Relationship.	Married or single.
<i>J. P. Hill</i>	<i>719 15th St. Juneau Alaska</i>	Position <i>Assistant</i> Department or office <i>Int. Bldg.</i>	<i>Brother</i>	<i>Married</i>
		Position		
		Department or office		
		Position		
		Department or office		

7. Have any of the above-named persons entered the Government service since the execution of your application for examination? *No*. If so, give the name of each such person

8. Will you inform yourself of and observe the provisions of the civil service law and rules and Executive orders concerning political activity, political coercion, political assessments, use of influence to secure promotion, etc., as quoted on the attached form? *Yes*

I hereby certify that the answers to the foregoing questions are true in every particular.

Robert W. Hill
[Signature.]

2211 42 Ave Oakland California
[Give here your present post-office address, city and state, including street and number.]

The officer before whom the above certificate is made is requested to sign the following:
The above certificate was executed before me, in his own handwriting, by the identical person who has reported for assignment on July

Was photograph of appointee furnished you? If so, is it a correct likeness of the person who executed this form?

This is to be signed by an officer of the department or bureau to which the appointee belongs, not by a notary public, and does not need to be sworn to.
The paper should be returned to Chief Clerk of Bureau when completed.

Juneau, Alaska.

Dear Sir:

I hand you herewith the appointment of Eckley C. Guerin as U. S. Cadastral Engineer at \$250 a month, payable from the appropriation pertaining to surveys upon which he is engaged from time to time.

Please forward his oath to this office for the files.

Yours very truly,

(Signed) Frank M. Johnson

Supervisor of Surveys.

From: Chief, Division of Engineering

Subject: Nomination for Distinguished Service Award

Believing, as you do, that it is well to present due recognition to an employee while he is still on the rolls rather than to wait for such time as he retires, I recommend that careful consideration be given to the granting of a Distinguished Service Award to Mr. Clark L. Gumm, who now serves as Chief, Branch of Cadastral Engineering in the Washington Office of this Bureau. In support of this recognition, I submit the following statements of his achievements and other related projects.

The Bureau of Land Management has reason to be proud of Mr. Gumm's achievements in the surveying field. His technical skill, efficiency, and devotion to duty have rendered an unmistakable contribution to the Bureau's program for management, protection, and conservation of the public domain and its natural resources.

Mr. Gumm entered the service of the former General Land Office in the winter of 1933 as a field assistant on a cadastral survey party in the State of New Mexico. With the exception of a few interruptions in service in the early part of his career, his entire Government service of over 30 years has been devoted to this Bureau's activities in connection with public land surveys.

In 1936, after passing a written civil service examination, he was appointed a Public Land Surveyor. Because of his unusual interest and devotion to duty and through his aggressiveness in the study of prescribed and improved methods and procedures pertaining to all types of cadastral surveys, Mr. Gumm soon was recognized by his superiors as having exceptional technical and administrative ability. Within a few years his field assignments were progressively of a more complicated and difficult nature until he was handling some of the most difficult survey projects of the General Land Office. These assignments were invariably completed with accuracy and economy.

Among the interesting and unusual surveys made by Mr. Gumm was the underground survey in 1949 of a bat cave containing bat guano. The cave was located above the Colorado River in the Grand Canyon. A boat trip up the Colorado River from Lake Mead was required to reach the cave. On the return trip the outboard motor drowned out and the boat was caught in the midcurrent sand swalls of some 15 feet. Only the lucky starting of the motor permitted the boat to reach the bank and avert almost certain capsizing and loss of life.

In November 1949 the Bureau of Indian Affairs requested that preliminary steps be taken to bring about a survey of the unallotted Choctaw-Chickasaw Indian tribal lands along the Red River in Oklahoma. These lands consisted of some 60 isolated tracts of irregular description extending through 25 townships and along both the Texas and Oklahoma sides of the Red River westerly from the Arkansas State line for a distance of approximately 175 miles.

In 1950 Mr. Gumm was assigned the responsibility of investigating conditions on the ground and working out a plan of action and procedure for the performance of this survey. His investigation involved conferences with the Superintendent of the Five Civilized Tribes and other Indian Bureau officials. As a result of his detailed investigations, Mr. Gumm submitted a very comprehensive and informative report setting out a plan of action. On the basis of this report the survey was authorized by the Bureau of Indian Affairs. The extraordinary character of this survey was such that no established precedent was contained in the files of the General Land Office by which he could be guided. It was, therefore, necessary to originate a survey design and a course of action whereby the survey could be performed in a manner that would be acceptable to the parties at interest and satisfy all legal requirements. Mr. Gumm then made this survey later in 1950 and 1951. Under the circumstances of adverse weather conditions and difficult terrain, he worked long hours--evenings and weekends. The excellent manner in which Mr. Gumm handled this entire project met with the enthusiastic approval of the Indian Bureau and brought commendable credit to our Bureau.

Throughout this time Mr. Gumm was constantly called on to undertake some of the most complicated and intricate survey problems facing the Bureau. In summarizing Mr. Gumm's field survey record, it can be said that he established an enviable record of accomplishment, both in quality of work and in volume. His willingness to assume the responsibility for undertaking unusual and difficult assignments and to voluntarily perform long hours of work to complete these assignments was of great value to the General Land Office and the Bureau of Land Management when there was a shortage of engineering personnel and limited funds for field operations.

In the summer of 1952 Mr. Guzm was selected by the Bureau of Land Management to be a member of the U. S. Operations Mission to the country of Iraq under the Point 4 program. He was to serve as a specialist on their land reform and cadastral survey program. This appointment was for one year. Mr. Guzm made such an impression on both his superiors and the nationals he was working with that he was asked to remain another year. The President of the Miri Sirf (Public Land) Development Department of Iraq, one of the highest officials of the Iraq government, officially expressed his thanks to Mr. Guzm and stated on behalf of himself and of the entire Department that "Material and substantial results are evident by your two years of work in this country. Through your efforts the Greater Musseyib Project will have, for the first time in Iraq, the advantages of a complete cadastral survey which will be utilized by the Irrigation and Land Classification Departments and other technical persons. I am also pleased with the manner in which the Cadastral Division of this Department is functioning and attribute this in great part to the new techniques and methods you have introduced. Most heart-warming to us is the way in which you have operated closely and intimately with the young Iraq officials, both in the field and office. By your actions we have been encouraged and have benefited by your association."

Mr. Herman A. Beck, American Embassy, Baghdad, Iraq, and Chief of the Miri Sirf Land Development Department, had this to say: "Mr. Guzm's report on Land Tenure and Reform and Cadastral Survey in Iraq has caused much favorable comment among interested parties and I am convinced by talking to Iraq government officials that many of your recommendations will be implemented." Mr. Beck also stated that the U. S. Government was extremely pleased with Mr. Guzm's conduct in dealing with Iraq officials and personnel.

Mr. Guzm returned to this country in October 1954 and was assigned by this Bureau to Area 3, Denver, Colorado, as a Cartographer (Cadastral).

Progressing steadily to greater responsibilities in this specialized field, his exceptional technical and administrative ability was recognized by his superiors and in April 1957 he was asked to join the Director's Engineering Staff in the Washington Office. Since 1957, Mr. Guzm's duties have not only involved technical procedures and practices but have kept him occupied with many Bureau and Departmental projects.

As one of the Bureau's most competent cadastral engineers, Mr. Guzm is called on numerous occasions for counsel and assistance by many offices within the Department and other offices and agencies outside

the Department. While he has shown intense interest and ability in improving surveying techniques and procedures, these efforts have been in addition to and not at the expense of his current responsibilities.

In support of the assistance given other offices by Mr. Gumm, we note the following: He has taken the leading part in assisting the Office of the Solicitor, Department of the Interior, on several landmark suits which reached the Supreme Court. In 1958 Mr. H. Lieberman, in the Office of the Solicitor, wrote of the appreciation for the assistance given them by Mr. Gumm--"His analyzation of the California Aikins case in reference to a Wyoming survey situation was painstaking and for any success gained by the Government on this case, much credit should go to his efforts." In regard to the same case, Mr. Ramsey Clark, Assistant Attorney General, Lands Division, Department of Justice, wrote of Mr. Gumm's assistance to his Department in the preparation of their case which involved a highly technical and complicated controversy. He said, "Mr. Gumm gave unstintingly of his time and spared no effort to assist us." The United States Attorney who was in charge of this case advised that Mr. Gumm was also very helpful to him in the trial of the case, particularly with respect to distinguishing the factual evidence in the Aikins case from that involved in Wyoming. This suit, which involved title to between 60 to 70,000 acres of public land in Wyoming, was pending for several years. The Deputy Solicitor of this Department contributed the following praise for Mr. Gumm's work: "His assistance contributed significantly to the Government's success in a suit of considerable importance to the interests of this Nation."

In 1965, at the request of the Office of Territories, Mr. Gumm visited and made a report on the Identification of Submerged Lands in the Virgin Islands. Mrs. Ruth G. Van Cleve, Director, Office of Territories, wrote the following to the Director of our Bureau upon receipt of his report: "I wish to thank you formally for the much needed and appreciated assistance given us by Mr. Clark L. Gumm, your Chief Cadastral Engineer, with the problems we have encountered in our territories in our administration of Public Law 88-183, the Territorial Submerged Lands Act. Please convey our appreciation to Mr. Gumm. His report of March 19, 1965, is becoming the point of departure for our procedures and regulations in this matter, and we are also finding invaluable both the material he appended to such report, and that which he has subsequently furnished us."

In April 1965 Mr. Gumm was selected by this Bureau to provide the Government of Nicaragua assistance in their program of agrarian reform. Specific assistance was given in the field of implementing the cadastre required by Article 123 of the Agrarian Reform Law of publicly owned

land, national and municipal. The cadastre will aid in providing property titles to recipients of plots of government land. This work was carried on through the Department of State's Agency of International Development.

Mr. Gumm also visited Morocco in 1963 in connection with a Bureau agreement to assist that country with a proposed establishment of a National Cadastre and assisted in the preparation of the resulting "Report on Land Records, Titling, and Cadastral Problems of Morocco." In the same year he was also a member of a team assembled by the Agency for International Development which was sent to Venezuela to secure material for a physical resources inventory of that country. At that time he made a report of the land tenure system and cadastral survey. In 1965 Mr. Gumm was asked to represent AID-Venezuela at a convention of engineers and surveyors in Caracas, Venezuela.

Throughout his years of service with the Bureau, Mr. Gumm has been a student of the treaties made by the various Indian tribes as inevitable progress in the early days of the nation made it necessary to contain the Indian tribes on reservations. His interest, keen insight, and knowledge of the land have made him the foremost authority of this Bureau on the interpretation of the indefinite descriptions of early-date treaties in terms of late-date maps and place names. Mr. Gumm has been giving assistance to the Assistant Attorney General's office, Land and Natural Resources Division of the Department of Justice, in the Government's cases before the Indian Claims Commission. His interpretation of these treaties which involve vast areas in the Middle West and Far West, probably totalling hundreds of millions of acres, much of which is now highly developed agricultural land, including industrial and urban areas, has been invaluable to the Department of Justice.

In the last few years Mr. Gumm has been responsible for the preparation of Federal maps for the leasing of oil and gas areas on the Outer Continental Shelf. The preparation of maps for some of these areas is of a highly technical nature where countless hours of research, study, and consultation with State, Justice, and Coast and Geodetic Survey officials are necessary before final determination can be made as to the delineation of some block leasing areas. In this connection he also met with State officials to explain the maps and principles involved in their preparation. Since several States have had little or no experience in leasing of submerged lands, a part of his job has been to convince such officials that the Federal Government's actions are not in derogation of any State right conferred by law.

For nearly 10 years Mr. Gumm has been in the forefront of the technical aspects of so-called tidelands litigation with various States as they

pertain to the boundary between Federal and State submerged lands. In the technical field he has continued to serve as a Bureau and Department representative in numerous meetings that have been held in past years between Federal and State officials of Louisiana in an attempt to find common ground or narrow the differences of the two sovereigns as to the location of the coastline of Louisiana. Several hundred million dollars are at issue in this matter. In addition, he was appointed by the Solicitor General of the Department of Justice as one of the Federal representatives to meet as a joint committee with three similar representatives from Louisiana. The joint committee met several times in 1962 and considered and reported on the effect that the principles of the Geneva Convention on the Territorial Sea and the Contiguous Zone would have if applied to the Louisiana coastline.

Probably one of the most important of Mr. Gumm's responsibilities insofar as immediate Federal revenues are concerned is his part in the delineation of the acreages of the blocks split by the various zone lines off Louisiana. A Louisiana representative and Mr. Gumm must agree on the acreages before offers can be made in the disputed zones. Mr. Gumm also serves as a "watchdog" to insure that submerged land sales by various States and foreign countries do not trespass on Federal submerged lands.

In Mr. Gumm's present capacity as Chief, Branch of Cadastral Engineering, he oversees the direction of programs utilizing some 100 professional employees. He has become a national authority and is fast becoming an international authority in this specialized field. His knowledge of cadastral law makes him an indispensable man to the Division, the Bureau, and the Department.

As an indication of Mr. Gumm's professional standing, he was nominated by the Department of the Interior to the Department of State to attend the 1963 Conference of Commonwealth Survey Officers. This conference was held at Cambridge, England, on July 22-31, with Mr. Gumm as one of the Department's representatives.

Throughout his years of service, Mr. Gumm has been known for his accuracy, dependability, and his seldom-erring judgment. His unflinching sense of duty, sound and deep personal judgment, and intense interest in his work have gained for him the respect of everyone who works with him.

For his distinct contributions for many years to this Bureau's cadastral survey program for the public lands and his judgments on many related matters, it is requested that Mr. Gumm be granted the Department's highest honor, its Distinguished Service Honor Award.

Chief of Engineers, U. S. Army,
Washington, D. C.

Sir:

I am informed by Mr. Earl G. Harrington, U. S. Surveyor, Field Surveying Service, General Land Office, Department of the Interior, that he is an applicant for examination for a commission as Captain in the Engineer Officers' Reserve Corps, and that he desires from me a statement as to his service record.

Mr. Harrington entered the service of the General Land Office under my supervision in 1909 in a temporary capacity. He soon qualified by Civil Service examination for Transitman and shortly afterwards was promoted to U. S. Surveyor. He has been connected with topographic and cadastral surveys in various parts of the United States as chief of party. He has always displayed good judgment in the handling of his men and camps and splendid technical ability in the execution of his work. I consider him well qualified for the position he seeks.

Very respectfully,

(Signed) Frank M. Johnson
Supervisor of Surveys.

WASHINGTON
February 15, 1926.

Civil Service Commission,

Washington, D. C.

Gentlemen:

Satisfactory evidence of the date of birth of Alexander
T. Harris, a cadastral engineer in the field service of the
General Land Office, having been submitted, the records of
this Department have been changed to show that he was born
on February 3, 1883.

Respectfully,

(Sgd.) W. B. ACKER

Chief Clerk.

✓
Copy to Mr. Harris,

through the Commissioner of the General Land Office.

Office copy.

DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
~~GENERAL AND OFFICE~~

~~OREGON AND CALIFORNIA REVESTED~~
~~LANDS ADMINISTRATION~~

PORTLAND, OREGON

Dear Mr. Horton:

Mr. Badgley reported under date of July 28 that Mr. Harris worked half a day on July 12, 13, 14, and 15. He thereafter suffered a hemorrhage and was given four blood transfusions, the last on the 28th, Badgley's son-in-law being one of the donors. The doctor told Badgley that Harris was going the way of others similarly afflicted, slowly starving, and that the blood transfusions would serve only to prolong his life. A sad case in which there is apparently little that can be done.

We found my wife's brother in excellent spirits, no signs of hypochondria and looking better than I have ever seen him look. He told his wife this was one case of leukaemia that was going to be cured. Of course we are hopeful. However, the white corpuscles continue to multiply and as the count reaches 50,000 he has to go to the hospital and take deep therapy treatments to knock the count down. How long and how successfully this can be continued no one knows, but it is indeed difficult to believe a man who looks so well, feels so well, is so active and in such high spirits can possibly be fatally afflicted. The only indication he has that he is not physically sound is that he tires easily and gets very tired. His doctor has cautioned him to avoid all possible skin abrasions, telling him infection will certainly follow that will be very difficult to cure.

We had a fine visit, a nice vacation, and Mrs. Ganong is quite pleased as a consequence.

I am glad to hear Mr. Morrison is going to Washington with you and wish to congratulate you on your success in caring for the personnel of your Denver staff.

Kindest regards to Mrs. Horton and yourself and best wishes for a pleasant stay in Washington.

Sincerely,

Portland, Oregon.
August 5, 1948.

DEPARTMENT OF THE INTERIOR

WASHINGTON

June 30, 1924.

Mr. Virgil C. Hart,
General Land Office.

Sir:

The President having authorized the apportionment of the regular appropriations for the fiscal year 1925 to enable the Department to adjust rates of compensation of certain civilian employees in field services, as intended by the provisions of Bill H. R. 9561, which failed of signature in the last session of Congress, you are hereby notified that your position and salary, effective July 1, 1924, and until further notice, will be as follows:

Timber Cruiser at \$8 per diem with subsistence in camp;
\$9 p.d. without subsistence in camp,
when actually employed.

By direction of the Secretary:

(Signed) GEO. E. SCOTT,

Chief, Division of Appointments,
Mails and Files.

Through the

Commissioner of the General Land Office.

Order No. 345.

Anthony Leader, Dies

decision to make his home here came in 1968 during the Soviet-led invasion of Czechoslovakia.

Before that he was engaged for only part of the Toronto season and was to retain his post as chief conductor of the Czechoslovakia Philharmonic.

Mr. Ancerl's guest appearances included performances with the Berlin Philharmonic, Vienna Symphony, the Leningrad Symphony, London Symphony and New York Philharmonic.

He is survived by his wife and two sons.

T. C. Havell, Interior Official for 50 Years

Thomas Cotton Havell, 94, who had worked for the Interior Department for almost 50 years, died yesterday at the Methodist Home of D.C.

Born in Savannah, Tenn., Mr. Havell came to this area as a boy and graduated from the old National Law School, where he became a part-time instructor.

He started as a surveyor with the Interior Department in 1899 and at the time of his retirement in 1948 was commissioner of the bureau of

land management. He had received Interior's distinguished service award.

Mr. Havell was long active in the Masons and belonged to Mt. Pleasant Lodge 33. He also had served as Supreme Tall Cedar of the Cedar of Lebanon of the U.S.

He is survived by a son, Dr. Robert B. Havell, of Washington; a daughter, Mrs. Randolph C. Richardson, of Chevy Chase, Md., five grandchildren and seven great-grandchildren.

Thomas C. Havell

Thomas C. Havell, 94, a retired Interior Department official, died yesterday in the Methodist Home of the District of Columbia, where he had been living.

Born in Savannah, Tenn., Mr. Havell had lived in this area for 80 years. He graduated from National Law School, now part of George Washington University, and later taught there. He worked for the Interior Department for nearly 50 years and was assistant director of the Bureau of Land Management when he retired in 1948.

Mr. Havell was a former Supreme Tall Cedar of the U.S., an order of the Cedars of Lebanon masonic lodge, and a member of Masonic Lodge No. 33 in Mount Pleasant.

He leaves a son, Dr. Robert B., of the District; a daughter, Mrs. Randolph Richardson of Chevy Chase, five grandchildren and seven great-grandchildren.

Memorial services will be at 2 p.m. Friday at Joseph Gawler's Sons Funeral Home, 3150 Wisconsin Ave. NW.

GENERAL LAND OFFICE

OFFICE OF THE SUPERVISOR OF SURVEYS

DENVER, COLORADO

August 27, 1940.

Mr. John D. Adams,
Office Cadastral Engineer,
Glendale, California.

Dear Mr. Adams:

Pending the appointment of a District Cadastral Engineer for Surveying District No. 5 (Arizona & California) to fill the vacancy created by the permanent change in station of Mr. A. C. Horton, Jr., District Cadastral Engineer, Glendale, California, as Assistant Supervisor of Surveys, Denver, Colorado, you are hereby authorized and directed, in addition to your duties as Office Cadastral Engineer, to perform the office duties ordinarily attended to by the District Cadastral Engineer, such as issuance of special and assignment instructions, outfitting and maintenance of field parties, purchase of equipment and supplies, employment of assistants, direction of the preparation of the official survey record, preparation of estimates, plans and specifications for projects within the district and the making of detailed reports of accomplishment. In the accounting work you will act as approving officer, and as occasion requires, certifying officer for expenditures covered by vouchers submitted to and prepared by the office, and carry on all related work and office procedures ordinarily performed by the District Cadastral Engineer.

Mr. Horton, as Acting District Cadastral Engineer, will continue to direct the major field activities of District No. 5 for the time being.

Sincerely yours,

FRANK M. JOHNSON
Supervisor of Surveys.

100 Old Mint Bldg.,
San Francisco 3, California DEC 14 1948

Dear Horton:

I was very sorry indeed to get the note from you advising that you intended to retire at the end of this month. Since then we have received official notice of your retirement. I certainly feel badly over the fact that you decided you couldn't stick it out any longer because with your going I have just about lost all of my connecting links with the past.

I had intended to write to you about the supplemental plats that are being made for small tract cases. I do not know what the procedure is and had in mind asking you to have some one from your office let me know when these plats are available so that I can go ahead with the classification orders.

It will interest you to know that the only reason I am trying to get out some of these orders is merely to show that there is still somebody left in the organization who wants to get some work done. My friends in Washington issued a total of 90 of these orders during the past 7 years. Twenty-three of those were gotten out by Mr. Drexilius in one group about three months ago. This means that the whole organization produced a total of 67 over a 7-year period. I decided that I would see if I couldn't get out an equal number in six months. I could do it too, if you'd hurry up with the plats.

You might tell Mr. Havell about this, although he will probably think it is an insult to the old organization, but I have been insulting them for the past 35 years so I guess it wont make any difference.

Sincerely yours,

J H Favorite

DEPARTMENT OF THE INTERIOR

WASHINGTON

June 30, 1924.

194
Mr. Frank M. Johnson,
General Land Office.

Sir:

The President having authorized the apportionment of the regular appropriations for the fiscal year 1925 to enable the Department to adjust rates of compensation of certain civilian employees in field services, as intended by the provisions of Bill H. R. 2561, which failed of signature in the last session of Congress, you are hereby notified that your position and salary, effective July 1, 1924, and until further notice, will be as follows:

Supervisor of Surveys at \$5200 per annum.

By direction of the Secretary:

(Signed) GEO. E. SCOTT,

Chief, Division of Appointments,
Mails and Files.

Through the

Commissioner of the General Land Office.

Order No. 345.

Vol. 194

DEPARTMENT OF THE INTERIOR
WASHINGTON

June 30, 1924.

Mr. Frank M. Johnson,
General Land Office.

Sir:

The President having authorized the apportionment of the regular appropriations for the fiscal year 1925 to enable the Department to adjust rates of compensation of certain civilian employees in field services, as intended by the provisions of Bill H. R. 9561, which failed of signature in the last session of Congress, you are hereby notified that your position and salary, effective July 1, 1924, and until further notice, will be as follows:

Supervisor of Surveys at \$5200 per annum.

By direction of the Secretary:

Chief, Division of Appointments,
Mails and Files.

Through the
Commissioner of the General Land Office.

Order No. 345.

Congratulate Johnson

Garfield Johnson July 1 24
Dear Mr. Johnson
The above seems to me about
right as a matter of fact.
I want to say you go down from
that my own. I want to say you go down from
your field fellow. I want to say you go down from
me. This is all right.
Paul

Johnson, Frank H.

DEPARTMENT OF THE INTERIOR

INFORMATION SERVICE

GENERAL LAND OFFICE

For Immediate Release

The death in Denver Monday night of Frank M. Johnson, oldest employee in point of service in the Department of the Interior and for more than 33 years Supervisor of Surveys of the General Land Office, marks the passing of one of the outstanding figures in the identification and settlement of the public lands of the West, Secretary of the Interior Harold L. Ickes said today. Paying tribute to the career of one of the Government's foremost cadastral engineers, Secretary Ickes said:

"The death of Mr. Johnson is a distinct loss to the Government which he served so long and so well. Not only was he recognized as an outstanding authority on public land matters, but the skill and painstaking care with which he installed in 1911 and supervised until the time of his death the Government's Cadastral Engineering Service, will stand as a lasting monument to his memory."

Born in Clarke, Va., November 4, 1872, Frank Minitree Johnson was 71 years old at the time of his death. Receiving his education in Washington (D. C.) High School, and the Scientific School of the Columbian (now George Washington) University, records show that he terminated a service as surveyor's clerk in the Geological Survey on November 30, 1898 and was made clerk in the General Land Office on March 6, 1899, a tour of duty which resulted in a record of 46 years of Government service. Three years prior to that, however, the records indicate, Mr. Johnson took temporary government employment as an axeman on a survey party in Calvin, Okla. Dating from that employment in October 1895, his record of Government service would total 49 years.

But it was as supervisor of surveys, with headquarters in Denver, that Mr. Johnson made his greatest contribution to the efficient administration of the public domain. Prior to 1910, the survey and identification of the vast sweep of public lands west of the Original Thirteen States was carried out under the jurisdiction of state surveyors-general through contract with private civil engineers. In that year, however, Congress abolished that system and placed the responsibility for the survey of the public lands in the General Land Office. Accordingly, Frank M. Johnson was sent to Denver in 1911 as supervisor of surveys, where he developed the present Cadastral Engineering Service which encompasses not only the Denver headquarters but 13 public survey offices in the Western States and Alaska.

(over)

So valuable were his services that he was continued in office when he reached the statutory retirement age last year. In addition to practical experience in the pioneer development and use of improved scientific surveying instruments, Mr. Johnson was the author of several articles on cadastral engineering subjects, including the General Land Office publication "The Public Land System of the United States."

Mr. Johnson was the brother of Mr. Hayden Johnson, prominent Washington attorney who for 20 years was a member of the Board of Law Examiners of the District of Columbia and from 1931 to 1936 was Chancellor of National University and Dean of the National University Law School.

Funeral services for Mr. Johnson will be held in Denver on Wednesday, March 29, with burial in Oak Hill Cemetery, Washington, D. C., on Saturday, April 1.

AMERICAN SOCIETY OF CIVIL ENGINEERS

Founded November 5, 1852

MEMOIRS

NOTE.—Memoirs will be reproduced in the volumes of *Transactions*. Any information which will amplify the records as here printed, or correct any errors, should be forwarded to the Secretary immediately for final publication.

FRANK MINITREE JOHNSON, M. Am. Soc. C. E.¹

DIED MARCH 27, 1944

Frank Minitree Johnson was born at his paternal grandfather's home near Berryville, Va., on November 4, 1872. His parents were Robert Marshall and Katherine (Minitree) Johnson, both descendants of well-known Virginia families. His family home was in Washington, D. C., where his father was president of the Metropolitan Iron Works.

F. V. Hayden, then head of the U. S. Geological and Geographical Survey of the Territories, in the eighteen seventies, was a frequent visitor at the Johnson home. Young Frank as a small boy was fascinated by Dr. Hayden's experiences in the West, and he would ask numerous questions about the survey work. From these contacts Mr. Johnson acquired his interest in the outdoors and in survey work.

Mr. Johnson was educated in private schools in Washington, D. C., and was graduated from Central High School. He then attended the Corcoran Scientific School of the Columbian University (later George Washington University) for a year. For the next five years he was employed on various engineering jobs, including two years as a draftsman at the Cramp shipyards in Philadelphia, Pa.

In 1895 the U. S. Geological Survey began its subdivision of the lands of the Five Civilized Tribes in the Indian Territory, and, welcoming an opportunity to do survey work in the West, Mr. Johnson, in September, 1895, joined that organization as an axman on one of the field parties. A few months later he was advanced to surveyor in charge of a field party and continued in charge of various field parties until the completion of the field work in June, 1898. For the next five months he was engaged on office computations, and resigned on November 30, 1898.

As a result of his experience in making public land surveys, he was appointed an examiner of surveys in the General Land Office in March, 1899,

¹ Memoir prepared by Robert Follansbee, M. Am. Soc. C. E.

and during 1899 and 1900 he spent the greater part of the time in New Mexico in connection with the survey of the Las Vegas Grant. Because of his friendliness and genuine interest in people, Mr. Johnson acquired a wide acquaintance with many old timers who were instrumental in shaping New Mexico's history. Mr. Johnson continued as an examiner of surveys engaged on examinations, engineering investigations, and special reports, chiefly in the Rocky Mountain area, until April, 1905. He then spent a six-month leave of absence abroad. While in Cairo, Egypt, he met Major Edwards, a British engineer in charge of making surveys for the enlargement of the Aswan Dam, and joined the Edwards party for a few months.

In 1905 the Shoshone Indian lands in Wyoming were to be subdivided preparatory to being opened for settlement, and, under the system then in effect, the work was to be done by private surveyors under contract. This was a project of considerable magnitude, and, in April, 1905, Mr. Johnson resigned from the General Land Office and opened an engineering office in Cheyenne, Wyo., chiefly for the purpose of making those surveys. Upon the completion of that work, which was done in record time, due to the early date at which the lands were to be allotted, he resurveyed lands in western Wyoming within the Union Pacific Land Grant, and also made subdivisional resurveys and determination of the boundaries of private lands, title to which had passed from the government. During these years in Wyoming, which continued until 1910, Mr. Johnson was able to settle many long-standing disputes between stockmen and settlers over the limiting boundaries of their holdings. This was accomplished not only because of his familiarity with the engineering problems involved, but also because of his complete understanding of human nature and its many frailties. He had the rare gift of being able to instil, in those affected, confidence in the fairness of his decisions.

In 1910 Congress, to meet more adequately the increasing need for public land surveys to provide for the rapid settlement then taking place and because of the increasing difficulty in obtaining contracts within authorized rates of compensation, abolished the old contract system, and directed the General Land Office to make future land surveys with its own personnel. From his experience both as an examiner of surveys for the General Land Office and later as a contract surveyor, Mr. Johnson was eminently fitted to head the new organization. Accordingly, in July, 1910, he was appointed U. S. Supervisor of Surveys to organize the Cadastral Engineering Service, the personnel of which consisted of former examiners of surveys and contract surveyors who had been previously associated with him. Headquarters was established in Denver, Colo., and within a short time thirteen regional offices were established in the public land states and Alaska.

Beginning with a dozen chiefs of field parties, the number was increased to one hundred and sixty chiefs of field parties by 1915. At first the Cadastral Engineering Service confined its activities to making the field surveys, and the office work connected with preparing the land plats was under the Surveyor General in each public land state. This division was not wholly satisfactory, and in 1925 Mr. Johnson was largely instrumental in having legis-

lation enacted which abolished the position of Surveyor General and transferred the organizations to the Cadastral Engineering Service, thus bringing into one organization both the field and the office work. Under Mr. Johnson's wise leadership the land surveys were raised to a high standard of accuracy without materially increasing the cost of the work. During those years many seemingly unsurmountable obstacles were encountered, but through his efforts these crises were overcome. As a result of his genuine interest in people, his office door was always open to the lowest field assistant, who came out feeling that his chief was very much interested in his welfare. Mr. Johnson had the priceless attribute of inspiring loyalty in his associates who have been unanimous in giving him a major part of the credit for the successful organization and operation of the Cadastral Engineering Service.

Paying tribute to Mr. Johnson, the Secretary of the Interior, Harold L. Ickes, stated:

"The death of Mr. Johnson is a distinct loss to the Government which he served so long and so well. Not only was he recognized as an outstanding authority on public land matters, but the skill and painstaking care with which he installed in 1911 (1910) and supervised until the time of his death the Government's Cadastral Engineering Service, will stand as a lasting monument to his memory."

On October 17, 1917, Mr. Johnson was married to Lucy E. Barham, of Texas, who survives him. This was a happy marriage, and, in the spirit of southern hospitality, the Johnsons kept a delightful open house for the officers of the Cadastral Engineering Service and for their many friends among the engineers.

One of Mr. Johnson's diversions was the study of history, particularly that of the West, and because of that study, as well as because of his many years of experience, he was an authority on the settlement of the West. During his earlier years, particularly, he knew some of its most colorful as well as notorious characters, and toward the latter he showed the tolerance, forbearance, and kindness of heart which he always felt toward his fellow men.

Mr. Johnson was deeply interested in boys approaching manhood and was ever ready to counsel and advise them against the pitfalls of life. He derived great satisfaction from giving six boys a college education.

Mr. Johnson was elected a Member of the American Society of Civil Engineers on August 29, 1927.

F. M. JOHNSON, LAND OFFICE OFFICIAL, DIES

End Comes Suddenly for Supervisor of Surveys At Denver Home.

Frank Minitree Johnson, 71, for thirty-four years supervisor of surveys for the U. S. land office, died suddenly Monday night in his home, 245 Race street.

A member of a colonial family, Mr. Johnson was born in Berryville, Va. He was a graduate of the Corcoran scientific school of Columbia university. In 1896 he was employed by the U. S. geological survey, and in 1899 became U. S. examiner of surveys for the interior department.

In 1903 and 1904 he was sent by the British government on a mission to determine data for construction of the great Assuan dam on the Nile river in Egypt. He returned to the United States in 1905 and for the next five years engaged in private engineering practice with headquarters in Cheyenne, Wyo.

Named to his national supervisory position in 1910, Mr. Johnson became responsible for public land and boundary surveys throught the United States and Alaska. He made field and supervisory trips to every corner of the nation, maintaining his headquarters in Denver.

On Oct. 17, 1917, he married Miss Lucy Burham, who survives. Funeral services, under the direction of the Rogers mortuary, have been set tentatively for Thurs-

\$30,000 Estate Left Wife

Frank Minitree Johnson, supervisor of surveys for the U. S. Interior Department here, who died March 27, left an estate valued at \$30,000, a petition for probate of his will disclosed yesterday in County Court. The entire estate was left to his wife, Mrs. Lucy Barham Johnson, 245 Race st. 4/1/44

F. M. JOHNSON LEFT ESTATE OF \$30,000

Frank Minitree Johnson, internationally known engineer who died March 27, left an estate of personal property amounting to \$30,000, it was disclosed Monday when his will was filed for probate with County Judge Kettering. His wife, Mrs. Lucy Barham Johnson of 245 Race street, the sole heir, has been named executrix. 4/3/44

Frank M. Johnson NEWS

Burial rites for Frank M. Johnson, widely known government cadastral engineer, who died Monday in his home, 245 Race st., after a long illness, will be held today in Oak Hill Cemetery, Washington, D. C.

Honorary pall bearers will be Oscar L. Chapman, Fred W. Johnson, Joel D. Wolfsohn, Arthur D. Kidder, Earl G. Harrington, Donald B. Clement, Thomas C. Havell and Frank B. Gartland.

Funeral services were held at 11 a. m. Thursday at his home. 4/1/44

FRANK M. JOHNSON, FEDERAL ENGINEER, BURIED AT CAPITAL

POST 4/1/44
Frank M. Johnson, widely known government cadastral engineer who died in Denver Monday night, was buried Saturday afternoon in Oak Hill cemetery in Washington, D. C. Services at the grave were conducted by the Rev. Charles T. Warner of St. Albans Episcopal church. "The death of Mr. Johnson is a distinct loss to the government which he served so well and so long," Secretary of the Interior Ickles said. "Not only was he recognized as an outstanding authority on public land matters, but the skill and painstaking care with which he installed in 1911 and supervised until the time of his death the government's cadastral engineering service, will stand as a lasting monument to his memory."

Hon. Fred W. Johnson, Commissioner of the General Land Office, has requested, in teletype message today, that the following press release be made available to Denver news bureaus and local papers for use Saturday, April 1, 1944:

Rites of interment for the late Frank M. Johnson, widely known Government Cadastral Engineer, who died in Denver Monday night after more than 33 years of service as Supervisor of Surveys in the General Land Office, will be held at Oak Hill Cemetery, Washington, D. C., this afternoon (Saturday, April 1st).

Honorary pall-bearers for the services at the grave-side, which will be conducted by the Rev. Charles T. Warner, of St. Albans Episcopal Church, are

Oscar L. Chapman, Assistant Secretary of the Interior,
Fred W. Johnson, Commissioner, General Land Office,
Joel David Wolfsohn, Assistant Commissioner, General Land Office,
Arthur D. Kidder, Cadastral Engineer, Eastern Survey District,
General Land Office,
Earl G. Harrington, Chief, Survey Division, General Land Office,
Thomas C. Havell, Supervisor, Branch of Adjudication, General
Land Office,
Donald B. Clement, Cadastral Engineer, General Land Office.
Frank B. Gartland, Chairman, Board of Appeals, Post Office
Department,

Member of an old Washington family, which included the late Hayden Johnson, prominent attorney, member of the Board of Education, who served 20 years as a member of the District of Columbia Board of Law Examiners, and for some time as Chancellor of National University and Dean of its Law School, Frank Minitree Johnson went to Denver in 1911, where he installed and supervised the Government's Cadastral Engineering Service until his death.

When first announcement of his death was received in Washington, Secretary of the Interior Harold L. Ickes, paid the following tribute to Mr. Johnson's public service:

"The death of Mr. Johnson is a distinct loss to the Government which he served so long and well. Not only was he recognized as an outstanding authority on public land matters, but the skill and painstaking care with which he installed in 1911 and supervised until the time of his death the Government's Cadastral Engineering Service, will stand as a lasting monument to his memory."

For Release AM PAPERS SATURDAY, APRIL 1, 1944.

Rites of interment for the late Frank M. Johnson, widely known Government cadastral engineer who died in Denver Monday night after more than 33 years of service as Supervisor of Surveys in the General Land Office, will be held at Oak Hill Cemetery, Washington, D. C., this afternoon (Saturday, April 1st.)

Honorary pallbearers for the services at the graveside which will be conducted by the Rev. Charles T. Warner, of St. Albans Episcopal Church, are:

Oscar L. Chapman, Assistant Secretary of the Interior.
Fred W. Johnson, Commissioner, General Land Office.
Joel David Wolfsohn, Assistant Commissioner, General Land Office.
Arthur D. Kidder, Cadastral Engineer, Eastern Survey District,
General Land Office.
Earl G. Harrington, Chief, Survey Division, General Land Office.
Thomas C. Havell, Supervisor, Branch of Adjudication, General Land Office.
Donald B. Clement, Cadastral Engineer, General Land Office.
Frank B. Gartland, Chairman, Board of Appeals, Post Office Department.

Member of an old Washington family which included the late Hayden Johnson, prominent attorney member of the Board of Education who served 20 years as a member of the D.C. Board of Law Examiners and for some time as Chancellor of National University and dean of its law school, Frank Minitree Johnson went to Denver in 1911, where he installed and supervised the Government's Cadastral Engineering Service until his death.

When first announcement of his death was received in Washington, Secretary of the Interior Harold L. Ickes paid the following tribute to Mr. Johnson's public service:

"The death of Mr. Johnson is a distinct loss to the Government which he served so long and so well. Not only was he recognized as an outstanding authority on public land matters, but the skill and painstaking care with which he installed in 1911 and supervised until the time of his death the Government's Cadastral Engineering Service, will stand as a lasting monument to his memory."

J. M. Johnson, Born in Clark Co Virginia, date ?
educated at private schools, Concordia Sc. Inst.
and Columbian Univ., Employed in engineering
work 1893-94; U. S. Geological Survey 1895-1899;
G. L. O., 1899 to 1903; Engineering Research, work for
British Govt, Egypt 1903 & 1904; in private practice
1905 to 1910; U. S. Supervisor Surveys 1910 to date
of death. Was author numerous scientific
and engineering papers, mostly SPL, printed
in Engineering Journals filed in Congressional
Library, Wash., D. C. Member American Soc
Civil Engineers; Society Military Engineers;
Colorado Scientific Society. Hobbies; travel,
fishing and historical research.

Married 1899 to Charlotte Jellen; div. 1907,
married in New York City; married sister
to Lucy Barham 10/17/1917, survives him.

MEMORANDUM for Mr. Horton,
Supervisor of Surveys:

At our Denver conference Mr. Follansbee, of the Geological Surveys, asked for statements from those of us who knew Mr. Johnson. I of course knew him very well and for many years. I met him in 1903 and I reported to him in the field as an Examiner of Surveys on the Uintah Indian Reservation in 1904, and he was my instructor in field work. I was with him for many months during the field season in an official capacity and we were together a great deal socially. He was one of the most courteous and polite men I have ever known and exceptionally loyal to his superiors and his work and duty. He was always ready to go out of his way to help others and on many occasions words of encouragement from him gave us a lift when things looked somewhat discouraging. To me Mr. Johnson was a great inspiration and I believe to him, more than any other person, belongs the credit for the present surveying organization of the General Land Office.

Edwin Patrick
District Cadastral Engineer.

J. M. Johnson, Born in Clark Co Virginia, date ?
educated at private schools, Corcoran Sc. Inst.
and Columbian Univ., Employed in Engineering
work 1893-94; U. S. Geological Survey 1895-1899;
G. L. O., 1899 to 1903; Engineering Research work for

Memoirs.

M. Frank Linitree Johnson,
H. Am. Soc. C. E., 1927.

Passing, March 27, 1944.

My acquaintance with Mr. Johnson began in the fall of 1900 on his return to Washington at the close of a season's field work in the States of Colorado and New Mexico. In April 1901 Mr. Johnson took charge of the completion of the subdivisional surveys including the Wichita Mountain area in the then Indian Territory, now the Wichita National Forest and Game Preserve in southwestern Oklahoma. As his associate on that survey and in the laying out of three townsites in the then Kiowa and Commanche Indian Reservation, preparatory to the opening of the lands to homestead settlement, I became intimately familiar with his many fine qualities, and which was my pleasure to enjoy as a friendship, both personal and official, extending to his passing in March, 1944.

The background of his career as a surveyor, cadastral engineer, and administrative officer, in the capacity of Supervisor of Surveys of the General Land Office, Interior Department, was a thorough general and scientific training during his student years, mostly in Washington, leading to graduation from the Corcoran Scientific School of Columbian University (now George Washington University). Employment began on the parties of the U. S. Geological Survey 1896 to 1898, on the surveys, both topographic and cadastral, of the lands of the five civilized tribes in the then Indian Territory, during which time he advanced to a position as one of the party chiefs. This practical experience played a large part in Mr. Johnson's later career. At the time much discussion was being given to the question of the combining the operations, as a general practice, of the topographic mapping along with the laying out of the subdivisional lines and boundaries. The Indian Territory surveys were thoroughly well executed on that plan, and within the surveying requirements of that date. The combining of the surveys was successfully carried on later, on other Indian lands where large areas could be planned and executed. Many years after this Mr. Johnson's influence was probably the deciding factor in the matter of the practical difficulties that prevented the general adoption of the plan.

From 1900 to 1909 Mr. Johnson was engaged almost continuously on field work in the Rocky Mountain area, very much diversified as to the regions of operations and types of cadastral surveys, all leading to an intimate knowledge of the surveying practice of the General Land Office, an understanding of the legal phases of the work, the need for a general improvement, and the practical limitations that had to be confronted. The winter months were usually devoted to administrative assignments in the Washington office. During this time a closer supervision was being given to the field operations generally, including better monumentation, and a vastly more direct contact of the administrative branches of the General Land Office with the field operations.

Most logically the training and experience qualified him for the appointment to his position as Supervisor of Surveys for the General Land Office, on July 1, 1910, at which time the plan of the public land surveying was being completely reorganized. This position he held to his passing, continually gaining and holding the confidence of the officers of the Interior Department, the public generally over the western states, and the associates and employees engaged in this work. Mr. Johnson's training and experience as a cadastral engineer, his sound business judgment, and his unusual capacity for dealing with the personnel of a large staff, brought the success for which he has justly been given the credit.

Mr. Johnson was confronted with a number of difficult problems in the reorganization of 1910. First, to meet a greatly expanded need for the surveys to take care of the rapid settlement of the public lands then taking place. The nucleus was a group of ten or twelve engineers who had been employed by the General Land Office, associates of Mr. Johnson, taking part in the field examination of every survey, as deemed important in transition from the older methods, and to insure results of acceptable quality. This group had frequent contact with the authorities in the Washington office and understood the aims of the reorganization. A larger number were drawn from those who had been engaged on the western work before 1910, a few who had specialized in it, but in most cases there had been no continuity of employment. By 1915 the force had been built up to 160 chiefs of field parties.

Another doubtful outcome, much debated, was on the matter of the costs. Mr. Johnson felt that the work could be considerably improved as to faithfulness and accuracy, without materially increasing the costs, then calculated principally on a mileage basis. The General Land Office had found it impossible, prior to 1910, to put through some of the more difficult surveys within the cost limits stipulated by legislation. The results to 1915 demonstrated that the work as a whole could be better performed, and stood well as to costs when compared with the older practices.

The matter of combining the cadastral surveys with the topographic came up again in 1912 when formidable argument was advanced for the change. It was then settled, largely on the strong recommendation by Mr. Johnson that the nature of the surveys and the areas of operation were too widely divergent to admit of a general and successful handling at the same time. The cadastral surveys had to be arranged to meet the insistent demand of the actual settlement of the public domain, and could not be deferred for the bringing in of geodetic control, nor for the leveling to give the elevations above sea level. Further, that the topography was primarily a base for the geologic studies and should be placed in the areas of greatest immediate interest. The mapping is a specialized branch, quite different from the matter of establishing land boundaries, and without the legal relationship of the latter. Few engineers could be looked upon as specialists in both branches, although in the Geological Survey and in the General Land Office a very few of the engineers were

experienced in both fields, this included Mr. Johnson. The discussion was concluded, excepting to continue the topographic with the cadastral surveys on large areas of Indian lands to 1917, when the practices was finally discontinued, largely on account of the very practical objections advanced by Mr. Johnson many years before.

A further reorganization of the several western offices was sponsored and put through by Mr. Johnson in 1925 when the needed legislation had been enacted. Time has shown the many benefits of a closely integrated field and office operating organization, adding to the achievements over the years, and consummating the complete transition from the methods of the past to that of a highly developed system, making use of the modern trends in surveying methods so far as applicable.

Mr. Johnson would personally deny full credit for the improvements, generously sharing this with his associates, though the latter looked upon him for the leadership, all pulling together to bring success to their work.

On the more personal side, Mr. Johnson was born in Berryville, Virginia, November 4, 1872. His boyhood days were divided between that place and Washington, where his father was engaged in business. Mr. Johnson sometimes related his early adventures in the environment of the woods and valleys in the area northwest of Rock Creek, in Washington, which is now so highly developed. Here he could roam at will, his home neighborhood. Some mutual friends have recalled his activity in athletics during the college days. Mr. Johnson was well developed, and powerful in strength, which became a great asset during the later years of his life that were spent in the surveying camps.

Happily married October 17, 1917, to Miss Lucy Barham of Texas, Mr. and Mrs. Johnson kept a delightful open house in Denver, Colorado, to the officers of the Department, and to the many friends among the engineers, with whom there was the continual need for close friendship and understanding. Mr. Johnson was admitted to membership in the American Society of Civil Engineers in the year 1927.

MEMORANDUM for Mr. Arthur D. Kidder,
District Cadastral Engineer.

Receipt is acknowledged of the three copies of the "Memoirs" of
Mr. Frank M. Johnson as prepared by you and transmitted with your memorandum
of June 28.

Distribution of the copies has been made in accordance with your
suggestion.

The "Memoirs" are excellent, - far the best I have seen. In its presen-
tation, you have been generous and self-effacing as to your important part in
initiating and carrying on the work of surveying the public lands under the
Direct System.

A. C. HORTON, JR.

Supervisor of Surveys.

Memorandum for Mr. Horton
Supervisor of Surveys.

I would refer to the matter which was taken up at the Conference relative to the life of Mr. Johnson. I will not attempt to go into a number of matters which are well known but will try to touch upon a few things which perhaps some one else has not thought of.

I find that Mr. Johnson spent the greater part of the years 1899 and 1900 in connection with the survey of the Las Vegas Grant. He once told me that he became a legal resident of New Mexico during this period. As a result he had a wide acquaintance with the "old timers" about Las Vegas many of whom were instrumental in shaping the history of New Mexico. Among such persons are Miguel A. Otero, former Territorial Governor of New Mexico and A.A. Jones later Asst. Secretary of the Interior and U.S. Senator from New Mexico.

One of Mr. Johnson's diversions was the reading and study of history, particularly of the West. I have never met anyone who had a more intimate knowledge of the history of the West than he. He had a very intimate and detailed knowledge of the old mining towns and the characters therein.

I believe that one of his principal characteristics was his keen interest in people. He appeared to be as much interested in the very lowly as the person of prominence and high social standing. His office door was always open to the lowest field assistant and such person paying him a visit always came out with the idea that Mr. Johnson was very much interested in his welfare. Moreover I believe that Mr. Johnson thoroughly enjoyed such visits, from the fact that he was interested in people.

The above are a few little sidelights on Mr. Johnson as I have known him. I hope that they may be of some use.

GENERAL LAND OFFICE
PUBLIC SURVEY OFFICE

Boise, Idaho, May 18, 1944.

Mr. A. C. Horton, Jr.,
Supervisor of Surveys,
Denver, Colorado.

Dear Mr. Horton:

I was requested while at the Denver Conference to submit to you, for transmittal to Mr. Farnsworth, my knowledge of Mr. Frank M. Johnson's earlier work and my association with him.

The first work of Mr. Johnson, of which I have any knowledge was as a U. S. Surveyor for the Geological Survey, in making land office surveys and topographic maps of the old Indian Territory, consisting of the Five Civilized Tribes. Mr. Johnson went to work in this capacity in 1895. I joined his party as Chainman, July 1, 1896, and was with him in that capacity for several months. Later in 1897 as Levelman in the party, I was associated with him in the same camp. Mr. Johnson was later assigned to a camp running exterior boundaries. In 1898 he received an appointment as Examiner of Surveys with the General Land Office.

I had no further contacts with Mr. Johnson in his work until 1911 when I joined his force and took a party to Alaska.

Mr. Johnson was appointed Supervisor of Surveys in 1910, when the contract system of surveys was abolished and all public land surveys were made direct by the General Land Office under his supervision. He organized in 1910 the Cadastral Engineering Service for the direct execution of public land surveys and was continuously in charge of that work until his death in 1944.

I was engaged in the capacity of U. S. Surveyor, Assistant Supervisor of Surveys, and District Cadastral Engineer, under Mr. Johnson from 1911 until his death.

In 1915 Mr. Johnson accompanied me to Alaska where we organized the survey of the three coal fields. At that time we covered considerable of Alaska, in organizing and placing parties. Mr. Johnson and I were together on this work about two months, when he returned to his headquarters in Denver.

From my association, I think Mr. Johnson's outstanding characteristics were his devotion to duty, his loyalty to the organization he established and directed, his uniform courtesy and tolerance. The efficiency he maintained in his organization was outstanding due to his inspiration.

I know of no bureau of the Government in which the head thereof was more uniformly respected and loved. His life work was an inspiration to all of us.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jno. P. Walker". The signature is written in a cursive style with a large, sweeping initial "J".

MEMORANDUM for the Supervisor of Surveys,
Denver, Colorado

My first acquaintance with Mr. Frank M. Johnson was in 1905 subsequent to his resignation as Examiner of Surveys with the General Land Office. At that time he came to Cheyenne, Wyoming, to contract with the government for the survey of the ceded portion of the Shoshone Indian Reservation located in the west central portion of the state. Mr. Johnson as a Deputy U. S. Surveyor executed the surveys awarded to him and Mr. John W. Dougall in 1905 in record time as a certain time limit had been set for the disposal of the lands within the ceded portion of the Reservation by lot.

In the years from 1906 to 1909 Mr. Johnson conducted an engineering office in Cheyenne and was engaged mostly in the survey and resurvey of the public lands in southwestern Wyoming under government contracts. These contracts included the resurvey of lands within the Union Pacific Land Grant under the Act of July 2, 1864, subdivisional resurveys and the determination of the boundaries of private lands, title to which had passed from the government.

During the time he was engaged on contract surveys by the government he was able, in his tactful way, to settle many disputes of long standing between stockmen and settlers regarding the limiting boundaries of their holdings due to his familiarity not only with the engineering problems involved, but with his thorough and complete understanding of human nature and the frailties that encompass practically all men. His psychology in handling difficult problems was unbounded and he was possessed of that rare gift of being able to instill confidence and trust in his decisions and judgment by all with whom he came in contact.

Mr. Johnson was an authority on the settlement of the West and many are the stories he would tell of his acquaintance with some of its characters especially those he met while engaged on the early surveys he made in the nineties in the Indian Territory, now Oklahoma. He met and knew such men as the Dalton Boys, Bob Ford, Bill Starr, Black Jack and others equally notorious in those early days. Bill Starr, Mr. Johnson stated on numerous occasions, stopped for meals at his camp and would always sit at the table and keep his rifle across his knees while eating for fear an officer of the law might put in an appearance. This fact alone, permitting an outlaw to visit and have a meal at his camp, exemplified the tolerance, forbearance and kindness of heart he always had for his fellow man. With Mr. Johnson, a man who was considered "outside the pale" by the law and by other citizens was still in his heart a human being who perhaps by some peculiar quirk of chance either drifted or was forced into a life contrary to the precepts and standards of other men by some

unfortunate circumstance and therefore should not be condemned too harshly, but rather be given an opportunity to make amends for past misdeeds as he was a firm believer in the old axiom:

"There's so much good in the worst of us,
And so much bad in the best of us,
That it scarcely behooves any of us
To speak ill of the rest of us."

Mr. Johnson was deeply interested in the welfare of young boys growing into manhood and was always ready to offer counsel and advice to assist them in avoiding the pitfalls of life. In his role as an unsung and unpublished humanitarian he derived great satisfaction in putting six deserving boys through college and paying all the expenses for their education.

In 1910 Mr. Johnson was instrumental in the passage of the Act of June 25, 1910, whereby the contract system of surveys was abolished and the Direct System inaugurated. Under this latter system all surveys and resurveys pertaining to public lands are executed by cadastral engineers employed directly by the government under Civil Service regulations. Mr. Johnson was appointed Supervisor of Surveys and directed the organization of the Cadastral Engineering Service of the General Land Office.

The law becoming effective July 1, 1910, Mr. Johnson with his usual energy and perspective for organization, systematically and effectively proceeded to form the nucleus of the new service and in a short period of time built up an effective operating establishment that functioned more actively from year to year under his able guidance and achieved a prominent and enviable niche in the activity and conduct of government business.

District Cadastral Engineer

Office of the
Supervisor of Surveys

June 8, 1944.

MEMORANDUM for Mr. Follansbee:

After witnessing the prize fight at Reno, Nevada, between Jim Jeffries and Jack Johnson on July 4, 1910, Mr. Frank M. Johnson hurried to Denver, Colorado, to organize a field surveying service of civil service employees to execute the survey and resurvey of public lands in the United States and Alaska under an Act of Congress effective July 1, 1910, which terminated the system of surveying under contract. I first met Mr. Johnson in Denver at that time.

My first impression of Mr. Johnson, and one that persisted through the years, was an appreciation of his very human qualities, his diplomacy, broad viewpoint, distaste for details, and capacity for leadership. Although there were two Supervisors of Surveys until the Act of July 1, 1918, the other being Mr. Arthur D. Kidder, it seemed to me that the speed and efficiency with which the work was started and carried on were due largely to the efforts of Mr. Johnson.

During the long time he was Supervisor many seemingly unsurmountable obstacles came in our path, but always these crises were successfully passed through Mr. Johnson's efforts. Through his death the Service lost its inspiration.

Supervisor of Surveys.

Mr. A. C. Horton, Jr.,
Acting Chief Cadastral Engineer,
Bureau of Land Management,
Denver, Colorado.

Dear Mr. Horton:

Subsequent to our conversation yesterday, I am submitting herewith a brief summary of my experience and training in the engineering field:

- June, 1930 - Received BS degree in Civil Engineering at Iowa State College, Ames, Iowa. Course included fundamental training in all general branches of Civil Engineering.
- June, 1930 - to July, 1931 - Employed by Layne-Bowler Corp., Chicago, Ill. - Construction of large capacity water wells and installation of associated equipment. Six months on construction and 6 months as contracting engineer.
- August 1931 - to Sept., 1934 - Mostly employed assisting father on farm with occasional short periods of employment in engineering, surveying land, inspecting highway construction, materials, etc.
- Oct., 1934 - to June, 1935 - Surveying with Local Control Survey for State of Iowa and C. & G. S. - 2nd order surveys within Triangulation networks of C. & G. S. systems in Iowa.
- Feb., 1936 - to April, 1938 - Biological Survey. Six months land acquisition surveys and 8 months on water-fowl refuge development work - Topog surveys and some construction layout and design.
- April, 1938 - to present date - General Land Office Field Work.

Very respectfully,

Bernard W. Johnson
Associate Cadastral Engineer

DECLARATION OF APPOINTEE.

This form must be executed by the appointee before he enters on duty. If the answer to question 14 includes two or more names, this form must be submitted by the appointing officer for approval before appointment may be authorized. ATTENTION IS DIRECTED TO THE PROVISIONS OF LAW AS QUOTED ON THE ATTACHED FORM. False personation in an examination is a criminal offense, and will be prosecuted accordingly.

QUESTIONS.	ANSWERS.
1. What is your full name?	William R. Johnston
2. What was your age on your last birthday and what was the date of your birth?	34. April 1-1881
3. Where were you born?	Washington, D.C.
4. What is your height?	5 ft 8 3/4 ins
5. What is your weight?	137 lbs
6. What were the names of the persons who signed the vouchers on your application?	G. V. Pector - S. T. Robertson
7. What were the subjects of your examination?	Mathematics, Public Land Surveying, Drafting, Topography
8. Can you remember some of the words in the orthography exercise, if such an exercise was given? If so, give them.	None given
9. In what city or town, and in what building were you examined, and about how many persons were present?	Civil Service Building, Washington D.C. 250.
10. Are you the identical person who filled out the application and took the examination for the place to which you have been appointed?	I am
11. Did you personally answer the questions in the examination without aid or assistance?	I did.
12. To what position have you been appointed? State the salary.	Transition General Land Office. \$ 1200.
13. What was your post-office address, including street and number, on the date of your examination?	

14. Are any members of your family in the U. S. Government Service? Answer "yes" or "no" If so, fill in the following blanks. If additional space is necessary use back of this sheet.

Name.	Post-office address.	Position and department or office in which employed.	Relationship.	Married or single.
M. J. Johnston	The McKees Washington, D.C.	Chief Clerk Agriculture	wife	—

15. Have any of the above-named persons entered the Government service since the execution of your application for examination? If so, give the name of each such person

No

DEPARTMENT OF THE INTERIOR

GENERAL LAND OFFICE

OFFICE OF ASSISTANT SUPERVISOR OF SURVEYS

Clearmont, Wyoming, August. 21, 1917.

Application for Transfer from Field to Office

Mr. Herman Jaeckel,
Asst. Supervisor of Surveys,
Denver, Colorado,

My dear Sir:-

I hereby make application through your office for a transfer from position as U. S. Surveyor, Grade 7, to an office position under the Department of the Interior, for which I would be eligible to fill.

During the past eleven years I have been employed in various capacities under this Department as follows:

- Clerk Draftsman, about 2 years, U. S. Surveyor General's Office, Reno, Nevada.
- Examiner of Returns, about 2 years U. S. Surveyor General's Office, Denver, Colorado.
- Clerk Draftsman, about 1½ years, U. S. Surveyor General's Office, Cheyenne, Wyoming.
- Clerk, Division "E" General Land Office, Washington D. C. about 1½ years.
- U. S. Surveyor, under your supervision for about the past 4 years.

I will greatly appreciate any recommendation you may make in my behalf.

Very respectfully

Clark W. Miller
U. S. Surveyor

Referred to Mr. Frank M. Johnson,
Supervisor of Surveys.

Herman Jaeckel
Asst. Supervisor of Surveys.

Vol. 108

DEPARTMENT OF THE INTERIOR
WASHINGTON

June 30, 1924.

Mr. Arthur D. Kidder,
General Land Office.

Sir:

The President having authorized the apportionment of the regular appropriations for the fiscal year 1925 to enable the Department to adjust rates of compensation of certain civilian employees in field services, as intended by the provisions of Bill H. R. 9561, which failed of signature in the last session of Congress, you are hereby notified that your position and salary, effective July 1, 1924, and until further notice, will be as follows:

Associate Supervisor of Surveys at \$3800 per annum.

By direction of the Secretary:

(Signed) GEO. E. SCOTT,
Chief, Division of Appointments,
Mails and Files.

Through the

Commissioner of the General Land Office.

Order No. 345.

City or Town State

May 11 1925

To the Board of Direction,
AMERICAN SOCIETY OF CIVIL ENGINEERS,
33 West Thirty-ninth Street,
New York, N. Y.

GENTLEMEN :

In response to your inquiry regarding Mr. *Arthur D. Kidder*,
I have to say :

1. I have known him *personally* for *about 25* years.

2. His character and personal reputation are *of the highest*

3. From *personal knowledge* I know that he has been engaged in active practice, as set forth in his statement for *twenty five* years.

4. From *personal knowledge*, I know that his statement *is* correct as to the character of his experience during this time. is or is not

5. My business relationship to the applicant during the period covered by his statement was (*i. e.* employer, etc.) *from 1899 to 1910 as a fellow engineer in the General Land Office. Since 1910 Mr. Kidder has been my associate in the engineering work of which I have charge.*

6. General remarks or suggestions as to the professional ability of the applicant.....
As a cadastral engineer Mr. Kidder ranks with the first in the country.

Arthur D. Kidder

Boundary Survey

By
Arthur D. Kidder

The south boundary of Colorado west of
the continental divide, through Archuleta, La
Plata, and Montezuma Counties.

Prepared for the Durango News by Arthur
D. Kidder, Boundary Commissioner.

*Reprint from issue
of Nov. 20, 1950*

With the completion in September, 1950, of the marking of the Colorado and New Mexico boundary, it may be reported that the property lines through La Plata County adjacent to the boundary were found to be in good position, in conformity with the township surveys. There are no conflicts with New Mexico property. By the treaty of 1868 with the Ute Indians their lands were to extend to the south boundary of Colorado, taking in a portion of Archeluta County, and all of La Plata and Montezuma Counties to the Colorado and Utah line. The Colorado and New Mexico boundary was surveyed in that same year. About ten years later the township surveys along the boundary were begun and continued until trouble developed in making satisfactory closures on the state line. Allotments were made to individual Ute Indians along the lower Pine River, but few allotments elsewhere that were near the boundary.

The unallotted lands still belong to the Ute tribe excepting where sales have been made. Only a few of the sales extend to the state boundary. Most of the latter are along the stream valleys south from the villages of Arboles, Allison, and Tiffany, Colo., where in most cases the section line surveys were terminated on the state line, and

have been perpetuated in good order. These agree with the restored boundary.

Boulder Marked Survey

The valley of the Las Animas River is very narrow where it is crossed by the state line. Here, in 1868, a large boulder was marked in the boundary survey, which was well known in the early days, and has always been in that vicinity. Approaching the valley of the La Plata River from the east the state line survey recognized for the land surveys of 1868 was well marked, but it was poorly marked west from the river, although there have been no conflicts in the land surveys in this valley.

The 1868 survey was discontinued when reaching the rugged cliffs and deep gorges of the several forks that make up the head of the Barker Arroyo, which drains from the southwesternmost part of La Plata County, Colo., to the La Plata River in San Juan County, N. M. The boundary survey of 1868 was resumed at the foot of the last bluff of the Mesa Verde, and extended from there to the calculated position for the corner of the four territories of Colorado, New Mexico, Arizona, and Utah.

In this omitted interval the present Ute Mountain Indian lands extend across the boundary to include a large area in New Mexico, which takes in the

whole of the Barker Dome oil and gas field as at present developed and producing. None of the Ute Mountain Indian lands in the vicinity of the state line have been subdivided or allotted to individual Indians. At the present time there are no oil and gas wells close enough to the boundary to have caused any question as to the jurisdiction at the location.

The line between La Plata County and Montezuma County, Colo., follows the high divide between the watershed of the La Plata River and that of the Mancos River. As the divide approaches the New Mexico boundary the county line is found to be located upon a rather flat mesa top between the westernmost fork of Barker Arroyo, draining to the southeast, and the easternmost fork of Salt Creek Wash; the latter, with its many forks drains to the southwest to the San Juan River.

Gap Causes Trouble

In Archuleta County, Colo., there was much trouble in the past concerning the location of the state boundary. Coming west from the continental divide the marking of the survey of 1863 was apparently discontinued when reaching what is now known as Ewell Canon, a gorge in the vicinity of Chromo, Colo., draining to the north. The plain marking of the boundary was resumed after the line crosses the Navajo River, where that stream flows from Colorado into New Mexico. This is the location of the old Archuleta Ranch, and later the site of Edith, Colo., a sawmill village now abandoned. It was the gap in the boundary

survey that caused the trouble. When the line from the east was extended beyond Ewell Canon to the Navajo River, it was found to be located a considerable distance to the south of the boundary monuments west from the river. The boundary location was later settled by the General Land Office, Department of the Interior, by placing the offset on the east wall of Ewell Canon. This adjustment was an arbitrary solution, which was given very careful study before being decided upon, and survey in that manner directed and marked in 1916.

Archuleta Mountain lies just west of the valley of the Navajo River. The boundary was well marked to the top of the mountain, but discontinued from there to the top of the north face of the high mountain immediately south of Arboles. In between, the Navajo River flows back into Colorado, through a narrow gorge, reaching the San Juan River farther to the west. After confluence, the San Juan River flows southwesterly to the New Mexico boundary, then turns back into Colorado in a westerly course, running near Arboles before making a wide turn into New Mexico. The Piedra River joins the San Juan River at this turn. The southeastern corner of the Ute Indian lands is on the top of Archuleta Mountain. An unfortunate hardship was occasioned by reason of the non-marking of the boundary where the line first reached the San Juan River valley. There was an early Mexican settlement on the public lands south of the boundary, but settlement was not allowed in Colorado where the land belonged to the Ute Indians.

It developed later that the Mexican settlements extended too far north, encroaching upon the Ute lands. The encroachments had to be abandoned after 1916, when the General Land Office ordered the boundary marked in that vicinity.

Marks Destroyed

West of the Mesa Verde, at the slope below the westernmost high cliff, a large boulder was marked in 1868 to indicate the location of the boundary. Apparently, the marks of the survey from that point to the corner of the four territories became completely obliterated. None have been identified in recent years, although the present retracement shows positively that the line was measured in 1868, and that several objects called for in the record can be identified, all in good position for true line. The Navajo Indian lands adjoin this part of the boundary on the south.

When Colorado was organized as a territory, Congress fixed its south boundary as the line of the 37th parallel of latitude; the plan of the 1868 survey was to locate and follow that line. The surveyor, Ehud N. Darling, employed by the Department of the Interior, began the survey at an initial point which had been established about ten years earlier in the exploratory surveys of the U. S. Army Engineers. The plan was to mark the 37th parallel at intervals of one mile, locating its position in latitude by a series of ten astronomical stations distributed along the boundary. This was carried out in intent where it then appeared reasonable to run and measure the line; omissions were made where it seemed to be impractic-

able to make a complete survey. The mile stations were marked with native stone, picked up nearby, of a size which one man could handle; the stones were appropriately marked for identification, and set in the ground. In some places bearing trees were also marked. Larger stones, or a large wooden post were placed at the ten astronomical stations.

New Mexico Sues

In legal aspect, after approval of the survey, the 1868 markers determined the true ground location of the boundary, unchangeable excepting as directed under competent jurisdiction. These are the monuments that were controlling for the retracement and remarking of the boundary as stipulated in the decree of the Supreme Court of the United States, entered April 13, 1925, in the case of the State of New Mexico vs. the State of Colorado (268 U. S. 108). The litigation grew out of the difficulty that had been experienced in identifying the line of 1868 as marked; from the omissions of the survey; and, from the discrepancies in position that came to be known when the township surveys were being established closing on the state boundary. In the decree closing the litigation, instructions were set out in detail for the retracement and remarking of the boundary; Arthur D. Kidder, an experienced engineer of the General Land Office, was designated as the commissioner to execute the survey.

Marking Stones Lost

Much of the difficulty in the identification of the 1868 survey came from the fact that a large proportion of the mile stations were located in rough, more or

Continental Divide

less inaccessible places, on the mountain slopes, most of them in timber and undergrowth, where the stone could not be recovered without tedious search, or by survey from a known starting point. Some of the stone became disturbed or lost as the years passed. The recent retracement shows less than one-third obliteration west of the divide.

Major discrepancies in the direction of the line of the 1868 survey were discovered many years later when the townships along the boundary were being subdivided. It was found that the line between the astronomical stations failed to follow a true parallel, although observing stations were reasonably well located for astronomical latitude. The large offset at Ewell Canon was the only error of that nature.

335 Miles Retraced

Excepting at Ewell Canon, all of the large discrepancies in the direction of the 1868 line were located east of the continental divide. The direction has been found to be exceptionally accurate through Archuleta, La Plata and Montezuma Counties of the west slope, particularly good for the acceptable standards of survey of that period. A few large discrepancies in the length of the line have come to light through the careful measurement and retracement of the whole boundary, 335 miles; errors in measurement do not affect the location of the boundary in its latitudinal position. Most of the line of the 1868 survey was well measured according to the standards of that period; a good record was made of objects noted along the boundary, which has been a great aid in making a careful retracement of the line.

The intervals that were not measured or marked in 1868 have now been connected through, and monumented, all on good alignment.

New Markers Set Up

In the complete marking of the boundary substantial new markers have been placed at every mile interval. A monument has been placed at each highway and railroad crossing, and at every minor roadway; also on principal summits; and at the top of the principal cliffs which were overlooking valley land or wide depressions. Most of the new monuments are constructed of concrete, mixed at the station, the dry material carried in by pack animals. Each monument has a bronze tablet in its center, at the top, on which the inscription shows the location of the mile station, or of its intermediate position within the mile. In some inaccessible places, that can not be reached by pack animals, a red brass tubing has been employed for the monument. Bronze tablets were employed in the rock outcrop on the high cliffs.

During the period from 1893 to 1901 recommendations were made to the General Land Office to correct the survey along the state boundary; careful field examinations were directed to confirm the conditions as reported, and to ascertain additional facts needed for an understanding of the situation. An appropriation was passed to meet the cost of a resurvey. The instructions for the work were carefully prepared to meet the situation as it then appeared; the cost of a resurvey. This called for certain steps in the following manner: to make a series of new astron-

*As provided
by Congress.*

omical observations, using the latest instruments and methods, at ten stations along the boundary; to set new monuments at intervals of one mile through the entire boundary, using iron post markers; and, to search for and destroy all markers of the 1868 survey.

New Survey Made

The survey was made by Howard B. Carpenter, United States Surveyor and Astronomer, who in 1901 executed the survey of the boundary between Arizona and Utah on a similar plan for the determination of the position of that line. The new work was accomplished in 1902 through Montezuma, La Plata, and Archuleta Counties, and the remainder completed in 1903. The report of the Carpenter survey apparently confirmed the earlier information as to the character and condition of the survey of 1868.

There were large differences in latitudinal position in portions of the line and only a small percent of the markers of 1868 were recovered and destroyed, indicating that the remainder had become lost or obliterated. At this stage, and with this more complete information as to the differences in latitude, the State of Colorado protested the acceptance and approval of the Carpenter survey. Further study was then given to the legal aspects of the situation, and the conclusion reached that the Department of the Interior lacked the jurisdiction to annul the survey of 1868 and to substitute the new boundary, although the latter was admittedly in more nearly the correct position as originally intended by Congress, and was well marked throughout its full length.

Two Lines Confusing

New Mexico was then a territory and could not act in its own

right until admission as a sovereign State. During this intervening period there was the condition of having two lines on the ground, the approved boundary of 1868 poorly marked; a new line closely located along the true 37th parallel and well marked, but lacking in due confirmation. Through the three counties the delay was felt greatest where fencing was needed to control the grazing. In some places the drift fences were constructed along the Carpenter line, there being no other guide as to the boundary location; in other places there was reliable information as to the location of the 1868 boundary and this was recognized. Most of such drift fences are of a character that can be moved to correct position, if needed, without undue expense. The exception is that of a well constructed fence along the line of the Carpenter survey separating the pastures of the Ute Mountain Indians from those of the Navajo Indians. There are no other improvements along this line.

No Loss Involved

At some future date, when major repairs may become necessary, a new fence may be constructed along the line of the 1868 survey, now plainly and well marked. No substantial gain or loss will be involved in the acquiescence in its present position. The difference is about 500 feet at the highway, gradually playing out to nothing where the San Juan River flows back into Colorado. Every monument of the Carpenter survey has now been removed, with an exact measurement of the difference in location.

The field notes of the retracement and marking of the line and new maps are to be submitted to the Supreme Court for approval, and copies supplied to each State.

UNITED STATES

OFFICE OF THE SECRETARY
WASHINGTON 25, D. C.

MAY 19 1948

My dear Mr. Kidder:

It is a pleasure to send you the enclosed signed citation which accompanied the award to you on April 28 of the Department's gold medal for distinguished service.

Sincerely yours,

J. H. King
Secretary of the Interior.

Mr. Arthur L. Kidder,
Francis Scott Key Apartments, #104,
600 - 20th Street, N. W.,
Washington, D. C.

Enclosure 45.

United States Department of the Interior

Honor Award

William T. Hilder

is hereby awarded this certificate of honor for

Outstanding Service

Given under my hand and seal this twenty-eighth day of April 1918

J. L. Trues
Secretary of the Interior

THE SECRETARY OF THE INTERIOR
WASHINGTON

CITATION
FOR DISTINGUISHED SERVICE

MR. ARTHUR D. KIDDER

after completion of more than 45 years of Government service. During his service, Mr. Kidder demonstrated outstanding skill in the performance of his duties as a Cadastral Engineer and as an Astronomer. He made valuable scientific contributions which have been adopted and put in use throughout much of the Government service. He made the necessary astronomical observations and calculations in connection with the investigation of boundary lines between the various states and territories and his thorough work has been the basis of a number of determinations by the Federal courts. He has on two occasions been selected by the Supreme Court of the United States as Commissioner of the Court to establish state boundaries. His ability as a mathematician and astronomer is demonstrated by the calculation and compilation of the mathematical tables and formulas included in the Standard Field Tables and Trigonometric Formulas prepared by the General Land Office for the use of its engineering staff. These were first published in 1910 and are now in their sixth edition, being widely used by engineers in many of the Federal agencies as well as in private work. In 1910, Mr. Kidder prepared The Ephemeris of the Sun and Polaris to meet the needs of the engineering staff of the General Land Office in precise astronomical determinations of latitude and azimuth required in the field work. Mr. Kidder continued the preparation of the publication annually until 1944. In 1945, under his direction, to meet the needs of the armed forces, this Ephemeris was expanded to include essential data on 28 stars to permit rapid and accurate determinations of azimuth in the field. From 1910 to 1914 Mr. Kidder consulted with the manufacturers in proving the design and mechanical details of the improved solar transit which has been adopted as standard in the cadastral engineering service of the Bureau of Land Management and other Federal agencies. Again, from 1940 to 1945, he cooperated with the manufacturers in the design for improvements in the solar transit which has resulted in a new standard model of greatly improved accuracy. Mr. Kidder was Editor-in-Chief of the Board that prepared the Manual of Instructions for the Survey of Public Lands, editions of 1919 and 1930, and of the Board on Technical Procedures which prepared the present Manual of Surveying Instructions, edition of 1947. During the course of his work in the Cadastral Engineering Service, Mr. Kidder undertook and carried forward to completion many other projects wherein extremely high values were involved, with problems involving the application of the most precise and scientific survey procedures in their solution. For his contributions and devotion to public service, Mr. Kidder is deserving of the highest commendation of the Department.

Secretary of the Interior
