FIELD NOTES

OF THE SURVEY OF THE

Sixth Standard Parallel North through Range
13 and part of Range 14 East,

AND RESURVEY OF SAME

through part of Range 14 East

Of the Gila and Salt River Base and Meridian,

in the Territory of Arizona

EXECUTED
AS SURVEYED BY

Sidney E. Blouh, United States ^{Examiner of Surveys} ~~Deputy Surveyor~~

Special Instructions from the Commissioner of the General Land Office

Under his Contract No. _____, dated Oct 2nd 1907, and May 15th 1908.

and Resurvey
Survey commenced October 28th 1909, 1909

and Resurvey
Survey completed Feb 7th 1910, 1910

PRELIMINARY OATHS OF ASSISTANTS.

WE, Fred L. Warner, Earl Albright and Chas L. Shumway and Van L. White
do solemnly swear that we will well and faithfully execute the duties of chainmen; that we will level the chain upon even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that we will report the true distances to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of

The Sixth Standard Parallel North through Range 13 East and part of Range 14 East and resurvey of same through part of R. 14 E of the G. & S. R. Meridian, Arizona.

Chas L. Shumway and Fred L. Warner, Chainmen.
Earl Albright, Chainmen.

Subscribed and sworn to before me this 27th
day of October, 1909

Sidney E. Blouk
U. S. Commissioner of Surveys

WE, William R Carson and

do solemnly swear that I will well and truly perform the duties of moundman in the establishment or re-establishment of corners, according to the instructions given me to the best of my skill and ability, in the survey of

The Sixth Standard Parallel North through Range 13 East and part of Range 14 East and resurvey of same through part of Range 14 East of the G. & S. R. Meridian, Arizona.

Wm R Carson, Moundman.
Moundman.

Subscribed and sworn to before me this 27th
day of October, 1909

Sidney E. Blouk
U. S. Commissioner of Surveys

WE, _____ and

do solemnly swear that we will well and truly perform the duties of axmen in the establishment of corners and other duties, according to instructions given us, to the best of our skill and ability, in the survey of

The Sixth Standard Parallel North through Range 13 East and part of Range 14 East of the G. & S. R. Meridian, Arizona.

_____, Axman.
_____, Axman.

Subscribed and sworn to before me this _____
day of _____, 19____

I, Ralph C. Sampson, do solemnly swear that I will well and truly perform the duties of flagman according to instructions given me, to the best of my skill and ability, in the survey of The Sixth Standard Parallel North through Range 13 East and part of Range 14 East, and resurvey of same through part of Range 14 East of the G. & S. R. Meridian, Arizona.

Ralph C. Sampson, Flagman.

Subscribed and sworn to before me this 27th
day of October, 1909

Sidney E. Blouk
U. S. Commissioner of Surveys

and Resurvey
 Survey, Commenced October 28th 1909, and executed
 with a Waud S. E. Gurley engineers transit No 76
 with a Burt Solar attachment, the horizontal
 limb being provided with one double vernier
 reading to single minutes of arc, the verniers
 of the latitude and declination arcs reading
 to 0'30" of arc.

Examine the adjustments of the transit and
 find them perfect and know from recent tests
 of the solar by comparing the results of observations
 made during a.m. and p.m. hours with a meridian
 established by observation on Polaris. that
 the instrument is in satisfactory adjustment.

Reopen the Standard Cor. of Tps. 25 N. R. 14 and
 15 E. ^{described in Exterior Book 5} which I re-established October 31st 1908.

Latitude 35° 30' 35" N. Longitude 110° 47' 45" W.

At 8^h 30^m a.m. ^{l.m.t.} set off 35° 30' 2" N. on the lat. arc
 13° 01' S. on the decl. arc. and determine a

meridian with the solar. Then I run, resurveying
 to the closing corner of Tps. 24 N. R. 14 and 15 E.
 back on the S. side of Dec. 36.

Over rolling sandy land through sage and greasewood
 brush undergrowth and bunch grass.

Difference in measurements of 4000 chs. by two
 sets of chainmen is. 4 lbs., position of middle point
 By 1st set 39.98 chs.

By 2nd set 40.02 chs, the mean of which is.

40.00 Set an iron post 3 ft. long 1 in in diam. 26 ins. in
 the ground for Standard 1/4 sec. cor. marked on
 brass cap 1/4 S 36 on N. half.

Dig pits 18x18x12 ins. E and W. of post 3 ft. dish.
 and raise a mound of earth 3 1/2 ft. base 1 1/2 ft. high.
 16. of cor.

41. 45 - Intersect the ^{old} closing cor. of Tps. 24 N. R. 14 and
 15 E. which is a sand stone 16x4x18 ins. above
 ground, loosely set. marked C.C. on S. face, with
 6 grooves on E. S. and W. faces. No trace of pits and
 mound. This cor. being in a state of delapidation
 I destroy all evidence of the original cor. and
 re establish it in its original position as
 follows.

Set the same stone 18 ins. in the ground. for
 closing cor. of Tps. 24 N. R. 14 and 15 E. marked

BOOK 2511

C.C. on S. face. with 6 grooves on E. S. and W. faces.

Dig pits 30 x 24 x 12 ins. crosswise on line E and W. 4 ft. and S. of stone 8 ft. dia. and raise a mound of earth 5 ft. base, 2 1/2 ft. high S. of cor. thence surveying

43.00 Begin gradual descent down W. slope

62.00 Foot of descent. level rolling land bears N.E. and S.W. enter level a dobs bottom land bears N.E. and S.W.

66.38 Road from Winslow Arizona to Clark Arizona bears N.E. and S.W.

Difference bet. measurements of 80.00 Chs. by two sets of chainmen; is. 4 lbs.; position of middle point

By 1st set 79.98 Chs.

By 2nd set 80.02 Chs. the mean of which is.

80.00 Set an iron post 3 ft. long, 3/4 in. in diam. 24 ins. in the ground for. Stand cor. of sec. 35 and 36 marked on brass cap.

T 25 N. S 35 in N.W. and R 14 E S 36 in N.E. quadrants.

Dig pits 24 x 18 x 12 ins. crosswise on line E and W. 3 ft. and N. of post 7 ft. dia. and raise a mound of earth 4 ft. base, 2 ft. high N. of cor.

Land level and rolling

Soil sandy and a dobs 2nd and 3rd rate. No timber.

West on S. side of Sec. 35.

Over level sandy and a dobs land through sage and greasewood brush undergrowth and bunch grass

25.32 Road leads from Winslow Arizona to Clark Arizona bears N.E. and S.W.

Difference between the measurements of 40.00 Chs. by two sets of chainmen is 2 lbs.; position of middle point

By 1st set 39.99 Chs.

By 2nd set 40.01 Chs. the mean of which is.

40.00 Set an iron post 3 ft. long, 1 in. in diam. 26 ins. in the ground for. Standard 1/4 sec. cor. marked on brass cap. 1/4 S 35 on N. half.

Dig pits 18 x 18 x 12 ins. E and W. of post 3 ft. dia. and raise a mound of earth 3 1/2 ft. base, 1 1/2 ft. high.

- No. of cor.
 49.90 Right bank of the Crasbi Wash. 8 ft. high. bears N.E. and S.W.
 51.40 Center of dry bed of Wash. course S.W.
 53.00 Right bank of the Crasbi Wash. bears N.E. and S.W.
 61.25 Road from Winslow Arizona to Crasbi Arizona
 bears N.E. and S.W.

Difference between measurements of 80.00 Chs. by two sets of chainmen is 2 lbs. position of middle point.

- By 1st set. 79.99 Chs.
 By 2nd set 80.01 Chs.; the mean of which is.
 80.00 Set an iron post. 3 ft long 3 in. in diam. 24 ins. in the ground for Standard Cor. of sec. 34 and 35 marked on Brass Cap. T 25 N S 34 in N.W. and R 14 E S 35 in N.E. quadrants.
 Dig pits 24 x 18 x 12 ins crosswise on line E and W. 3 ft. and N. of post. 7 ft. dia., and raise a mound of earth 4 ft. base 2 ft. high N. of cor.
 Sand level.
 Soil sandy and adobe 2nd and 3rd rate.
 No timber.

West on S. ldy. of Sec. 34.
 One level sandy and adobe land. through sage and greasewood bush undergrowth and bunch grass.

Difference between the measurements of 40.00 Chs. by two sets of chainmen is 2 lbs., position of middle point.

- By 1st set. 40.01 Chs.
 By 2nd set. 39.99 Chs. the mean of which is.
 40.00 Set an iron post. 3 ft. long 1 in. in diam. 26 ins. in the ground for Standard 1/4 sec. cor. marked on Brass Cap. 1/4 S 34 on N. half.
 Dig pits 18 x 18 x 12 ins. E and W. of post. 3 ft. dia. and raise a mound of earth 3 1/2 ft. base. 1 1/2 ft. high.
 N. of cor.

NOTE At this cor. Dsch off. 13° 05' S. on the decl. arc and, at noon observe the sun on the meridian and obtain on the lat. arc a reading of 35° 30 1/2' N. Difference bet. the measurements of 80.00 Chs. by

BOOK 2511

two sets of chainmen is 2 lks., position of middle point

By 1st set. 79.99 Chs.

By 2nd set. 80.01 Chs. the mean of which is
80.00 Set an iron post 3 ft. long 3 ins. in diam. 24 ins. in the ground for Standard Cor. of sec. 33 and 34 marked on brass Cap. T 25 N. S 33 in N.W. R 14 E. S 34 in N.E. quadrant.

Dig pits 24 x 18 x 12 ins. crosswise on each line E and W 3 ft. and N. of post 7 ft. dist. and raise a mound of earth 4 ft. base. 2 ft. high. N. of cor.

Land level.

Soil sandy and Adobe 2nd and 3rd rate.

No timber

West on S. side of sec 33.

Over level sandy land through sage and greasewood brush undergrowth and bunch grass.

10.15 Road leads to Oasis, Ariz. from N.E. and S.W.

Difference between the measurements of 40.00 Chs. by two sets of chainmen is .02 lks. position of middle point.

By 1st set. 40.01 Chs.

By 2nd set. 39.99 Chs. the mean of which is
40.00 Set an iron post 3 ft. long 1 in. in diam. 26 ins. in the ground for Standard Cor. marked on brass Cap. $\frac{1}{4}$ S 33 on N. half

Dig pits 18 x 18 x 12 ins. E and W. of post 3 ft. dist. and raise a mound of earth 3 $\frac{1}{2}$ ft. base. 1 $\frac{1}{2}$ ft. high. N. of cor.

Difference between the measurements of 80.00 Chs. by two sets of chainmen is 2 lks. position of middle point.

By 1st set. 80.01 Chs.

By 2nd set. 79.99 Chs. the mean of which is
80.00 Set an iron post 3 ft. long 3 ins. in diam. 24 ins. in the ground for Standard Cor. of sec. 32 and 33 marked on brass Cap. T 25 N. S. 32 in N.W., R 14 E S 33 in N.E. quadrant.

Dig pits 24 x 18 x 12 ins. crosswise on each line E and W. 3 ft. and N. of post 7 ft. dist. and raise a mound

of earth 4 ft base, 2 ft high. No of cor.
Land level
Soil sandy 2nd and 3rd rate.
No timber

October 28th 1909

October 29th 1909 At 8⁰⁰ am ^{lmt.} S^{ch} off 35° 30' N.
on the lat. arc. 13° 20' S. on the decl. arc and determine

R 13 and 14 E: marked on brass cap. T 25 N. in
N half. R 13 E S 36 in N.W. R 14 E S 31 in N.E. quad
each.

Dig pits 30x24x12 ins crosswise on each line
E and W. 4 ft. and N. of post. 8 ft. dia. and
raise a mound of earth 5 ft. base, 2 1/2 ft. high.
N. of cor.

Land level.

Soil sandy and adobe 2nd and 3rd rate
No timber

In this cor. I set off $13^{\circ} 25' S$. on the decl arc
and at noon observed the sun on the meridian
the resulting latitude being $35^{\circ} 30 \frac{1}{2}' N$.

October 29th 1909

Survey commenced Feb. 6th 1910 and executed with a W. & S. E. Surley engineers transit No. 76 with a Burk solar attachments, The horizontal limb, is provided with one double vernier reading to single minutes of arc., The verniers of the latitude and declination arcs read to $0^{\circ} 30''$ of arc.

Examined the adjustments of the transit and correct the level and collimation errors.; then to test the solar apparatus by comparing its indications resulting from solar observations made during a.m. and p.m. hours with a meridian established by observations on Polaris. Proceed as follows:

At my camp which is located near the cor. of sec. 15, 16, 21 and 22 T¹/₄ 25th 76. R. 13 E. Latitude $35^{\circ} 33' 76''$. Longitude $110^{\circ} 57' 20''$ W., I set off $35^{\circ} 33' 76''$ on the lat. arc. $15^{\circ} 37'$ S. on the decl. arc and at $3^h 30^m$ p.m. ^{l.m.t.} determined a meridian with the solar and mark a point thereof by a tack driven in a stake set firmly in the ground 5.00 chs N. of my instrument.

At $10^h 17.6^m$ p.m. l.m.t. by my watch which is correct local mean time, I observed Polaris at western elongation in accordance with instructions in the Manual and mark the direction thus determined by a tack driven in a stake set in the ground 5.00 chs N. of my instrument.

1910
 Feb. 7th At $7^h 15^m$ a.m. ^{l.m.t.} I lay off the azimuth of Polaris $126.5'$ to the east and mark the meridian thus determined by a tack driven in the stake set last evening, on which the meridian falls 0.2 ins east of the mark. determined by the solar observation
 At $7^h 30^m$ a.m. ^{l.m.t.} I set off $35^{\circ} 33' 76''$ on the lat. arc. $15^{\circ} 23\frac{1}{4}'$ S. on the decl. arc and determine a meridian with the solar and mark a point thereof, by a tack driven in the stake already set 5.00 chs. N. of my instrument, this point falls .25 ins. East of the meridian established

BOOK 2511

by the Polaris observation
 The solar apparatus by p.m. and a.m. observations
 defines positions for meridians respectively
 about 0'10" west, and 0'13" east of the meridian
 established by the Polaris observation, therefore
 I conclude that the adjustments of the instrument
 are satisfactory

I begin at the Standard Cor. of Twp. 25 N.
 R's 13 and 14 ^{heretofore described}, which. Established October
 29th 1909. Latitude $35^{\circ}30'35''$ N. Longitude
 $110^{\circ}54'09''$ W and at 8^h 45^m a.m. ^{l.m.t.} Det. off.
 $35^{\circ}30\frac{1}{2}'$ N on the lat. arc, $15^{\circ}24'$ S. on the decl.
 arc. and determine a meridian with the solar
 three I run

West on S. side of sec. 36.

Over level sandy land through sage and greasewood
 brush undergrowth and bunch grass.

Difference between measurements of 40.00 chs by two
 sets of chainmen is 2 lbs., position of middle point
 By 1st set 39.99 chs.

By 2nd set 40.01 chs the mean of which is
 40.00 Set an iron post 3 ft. long in. in diam. 26 in. in
 the ground for Stand & sec. cor. marked on brass

No timber.

February 7th 1910

General Description

Through Ranges 13 and 14^E, this line runs across a rolling and level sandy country, covered with sage and greasewood bush, and scattering growth of bunch and sacaton grass.

The land in the townships to the south of the line is nearly level prairie, while that to the north consists of rolling sand hills in R. 13 E. and high broken mesa lands in R. 14 E., there is no timber in either of these townships and but very little water. The greater portion of both towns is covered with bunch grass and affords excellent pasture for stock and should be surveyed.
