Each boundary of Twp 25 N. R. 19 E.

Chain

Survey commenced May 2nd 1910 and executed with a W and L. E. Gurley engineers transit No. 76 with a Park. Solar attachment. The horizontal limb is provided with one double vernier reading to single minutes of arc. The verniers of the latitude and declination arcs, reading to 0' 30" of arc. I examine the adjustments of the transit and find them to be perfect. and know from recent tests of the solar apparatus by comparing the results of observations made on the sun during am. and p.m. hours with a meridian established by observations on Polaris, that the instrument is in satisfactory adjustment.

I begin at the ^{old} Standard Cor. of Twp. 25 N. R. 19 and 20 E. which is a malapa stone 16x10x6. in. loosely set. marked and witnessed as described by the Surveyor General. Latitude 35° 30' 35" N. Longitude 110° 15' 49" W.

May 2nd 1910 at the above described cor. I set off 35° 30 1/2' N. in the lat. arc. 15° 15' N. in the decl. arc. and at 8^h 00^m a.m. ^{l.m.t.} determine a meridian with the solar.

Thence I run,
