

TYPICAL GRAVEL ROADWAY SECTION
NOT TO SCALE

TYPICAL GRAVEL ROADWAY SECTION AT CULVERTS
NOT TO SCALE

Notes:

- 1) Gravel volume estimates were based on 5 feet of fill in roadway, not a minimum of 4 feet.
- 2) Tundra cover estimates were based on 52 foot width.
- 3) Sections are based on a 2:1 slope. Adoption of a 3:1 slope would increase minimum width to 62'.
- 4) TYP - typical
- 5) O.C. - on center
