

BARE-ROOT SEEDLINGS

Type		Price per M
1+0		\$180
2+0	Low density - 15-17/sq. ft.	\$240
2+0	Standard density - 25/sq. ft.	\$220
1+1	Standard size - 12-18 inches in height	\$285
1+1	Large - 20-30 inches in height	\$295
P+1	D.f. and pine	\$310
P+1	Minor species	\$320
P+1	D.f. improved seed - single cell sowing	\$310

CONTAINER SEEDLINGS

3 or 4 cubic inch Leach Cell (D.f. and pines)	\$155
3 or 4 cubic inch Leach Cell (Minor species)	\$160
7 or 10 cubic inch Leach Cell (D.f. and pines)	\$340
7 or 10 cubic inch Leach Cell (Minor species)	\$345
Styro Block 8**	\$285
Styro Block 5	\$195
**Add \$10 per M for minor species. Add \$10 per M for D.f. improved seed single cell sowing.	

SEED TESTING

If at all possible, do not plan to use conifer seed collected in 2006 for growing seedlings. This is especially important for species requiring long stratification time such as Sugar Pine and Western White Pine.

Seed testing for all seed lots planned for sowing should be completed by December 20, 2006.
