Golden Burchard DM Timber Sale

EA OR125-05-01

Umpqua River Sawyer Rapids Environmental Assessment

January 19, 2012

Dear Concerned Citizen:

We have prepared the Decision Documentation for the Golden Burchard DM Timber Sale (OR120-TS12-01). The units in this sale were analyzed as part of the Umpqua River-Sawyer Rapids Environmental Assessment (EA OR 125-05-01). The analysis concluded in a Finding of No Significant Impact (FONSI), dated February 1, 2008, for proposed density management, commercial thinning, and red alder conversion harvest projects. These projects were designed to implement management objectives described in the BLM Coos Bay District Resource Management Plan and Northwest Forest Plan. The Decision Documentation is posted on the District Internet site: <http://www.blm.gov/or/districts/coosbay/index.php>.

The decision described in this document is a forest management decision and is subject to protest by the public. In accordance with Forest Management Regulations at 43 CFR Subpart 5003 Administrative Remedies, protests of this decision may be filed with the authorized officer, A. Dennis Turowski, within 15 days of the publication date of the notice of decision/timber sale advertisement in *The World*, Coos Bay, OR.

Please direct requests for copies, questions, or comments to Coos Bay District BLM, 1300 Airport Lane, North Bend, OR. 97459-2000, ATTN: John Goering; call (541) 756-0100; FAX (541) 751-4303, or email to OR_CoosBay_Mail@blm.gov, ATTN: John Goering.

Sincerely,

/s/ A. Dennis Turowski

A. Dennis Turowski

Golden Burchard DM Timber Sale

EA OR125-05-01

Umpqua River Sawyer Rapids Environmental Assessment

DECISION DOCUMENTATION

Golden Burchard DM Timber Sale

Analyzed in

EA No. OR125-05-01, Umpqua River-Sawyer Rapids

Background:

The Umpqua Field Office, Coos Bay District Bureau of Land Management, using input from District resource staff and the public, prepared the *Umpqua River-Sawyer Rapids Environmental Assessment* (EA) which concluded with a Finding of No Significant Impact (FONSI) dated February 1, 2008. The Proposed Action Alternative proposes to thin approximately 8,796 acres of conifer, and convert approximately 167 acres of red alder to conifer, in 31-80 year old stands within the Umpqua River-Sawyer Rapids Fifth Field Watershed. The edges of the project area overlap into Vincent Creek, Big Creek-Lower Umpqua, Lower Elk Creek, and Lower Camp Creek sub-watersheds which are all within Douglas County.

The *Golden Burchard DM* Timber Sale, composed of portions of EA units 3, 9B, 10, and 11B, as outlined in the table below, is part of this EA and is located in T. 22 S., R. 09 W., Sections 3, 4, 9 and 10, Willamette Meridian.

Proposed Action:

The *Golden Burchard DM* Timber Sale would implement treatments on 331 acres. This treatment area consists of 92 acres within the General Forest Management Area (GFMA), 104 acres within the Late Successional Reserve (LSR), and 135 acres within the Riparian Reserve (RR) land use allocation. This acreage has been reduced by 153 acres from an EA estimate of 484 acres. The reduction is due to area deemed not suitable for harvest at this time and for no-treatment buffers on intermittent and perennial streams within units.

Approximately 5,540 MBF of timber is scheduled for removal.

The sale will require new construction of 0.65 miles of road, a decrease from the 0.75 miles of new road construction identified in the EA for these units. The sale will include 0.31 miles of road decommissioning. There is no new road construction within the Riparian Reserves.

The following tables show the relationship between EA estimates and field verified acres of forest treatment and miles of road construction/decommissioning for the *Golden Burchard DM* Timber Sale:

Golden Burchard DM Unit Number	EA Unit Number	Estimated Acres	Actual Acres*
4, 5	3	244.0	174
1-3	9B	126.5	88
6	10	27.8	18
1-3	11B	85.5	51
Totals		483.8	331

*includes right-of-way acreage

	Treatment Acres	New Road Construction (miles)	Road Decommissioning (miles)
EA Estimate	484.8	0.75	0.17
Golden Burchard DM	331.0	0.65	0.31

The EA's Design Features are incorporated in the special provisions of the *Golden Burchard DM* Timber Sale. The following is a brief summary of some of these Design Features.

Harvest Systems

- The sale area will be harvested with helicopter and skyline cable systems.

Road Decommissioning

- 0.31 miles of road decommissioning consists of barricading with rip rap, scarifying, and water-barring, seeding, fertilizing, and mulching the natural surface spur roads to stabilize the road surface.

Prescription

- The *Golden Burchard DM* Timber Sale units #1 - 6 were marked using leave tree prescriptions for the Douglas-fir. The east portion of units #1, 2, and 3 was marked to 130 basal area leave and the west portion of these units was marked to 110 basal area leave. Units #4, 5, and 6 were marked to 120 basal area leave.
- Minor conifer and hardwood species other than red alder will be reserved, except those trees that fall within road rights-of-way, landings, yarding corridors, or need to be removed for safety reasons.

Compliance and Conformance:

This project was developed under the direction of the *1995 Coos Bay District Record of Decision and Resource Management Plan* (1995 ROD/RMP). The analysis supporting this decision tiers to the *Final Coos Bay District Proposed Resource Management Plan/Environmental Impact Statement* (USDI 1994). This 1995 Record of Decision is also supported by, and consistent with, the 1994 *Final Environmental Impact Statement on Management of Late-successional and Old-Growth Forest Related Species Within the Range of the Northern Spotted Owl* and its associated Record of Decision (USDA/USDI 1994).

The Coos Bay District initiated planning and design for this project to conform with the Coos Bay District's 1995 RMP. Following the March 31, 2011 decision by the United States District Court for the District of Columbia in *Douglas Timber Operators et al. v. Salazar*, which vacated and remanded the administrative withdrawal of the Coos Bay District's 2008 ROD and RMP, I evaluated this project for consistency with both the 1995 RMP and the 2008 ROD and RMP. Based upon this review, I have determined that the selected alternative is consistent with the Coos Bay District's 1995 RMP and 2008 ROD and RMP. Although the selected alternative contains some design features not mentioned specifically in the 2008 ROD and RMP, these design features are consistent with the 2008 ROD and RMP.

On December 17, 2009, the U.S. District Court for the Western District of Washington issued an order in *Conservation Northwest, et al. v. Sherman, et al.*, No. 08-1067-JCC (W.D. Wash.), granting Plaintiffs' motion for partial summary judgment and finding NEPA violations in the *Final Supplemental to the 2004 Supplemental Environmental Impact Statement to Remove or Modify the Survey and Manage Mitigation Measure Standards and Guidelines* (USDA and USDI, June 2007). In response, parties entered into settlement negotiations in April 2010, and the Court filed approval of the resulting Settlement Agreement on July 6, 2011. Projects that are within the range of the northern spotted owl are subject to the survey and management standards and guidelines in the 2001 ROD, as modified by the 2011 Settlement Agreement.

The *Umpqua River-Sawyer Rapids* EA was developed incorporating the 2006 Pechman Exemptions. Per the 2011 Settlement Agreement, these exemptions remain in force. The *Golden Burchard DM* project meets Exemption A because it consists of thinning in stands less than 80 years of age. Therefore, I have reviewed the NEPA document for the *Golden Burchard DM* Timber Sale and have determined it is consistent with the Coos Bay District Resource Management Plan as amended by the 2001 *Record of Decision and Standards and Guidelines for Amendments to the Survey and Manage, Protection Buffer, and other Mitigations Measures and Standards and Guidelines* (2001 ROD), as modified by the 2011 Settlement Agreement.

Based on analysis by the Umpqua Field Office fisheries biologist, it has been concluded that the proposed activities in the *Umpqua River-Sawyer Rapids* EA project area will not adversely affect Essential Fish Habitat (EFH). Projects addressed in the EA have been determined to have "no effect" on the listed Oregon Coast coho and its critical habitat. Therefore, consultation with the National Marine Fisheries Service (NMFS) is not warranted.

Proposed activities that may affect listed wildlife species within the project area were submitted for consultation with the U.S. Fish and Wildlife Service in accordance with Section 7(A)(2) of the Endangered Species Act of 1973 [16 U.S.C. 1536(A)(2) and (A)(4) as amended]. A Letter of

Concurrence was received from the U.S. Fish and Wildlife Service in which they concurred that the proposed actions are “not likely to adversely affect” the northern spotted owl, and the marbled murrelet.

Analysis also concluded that implementation of the proposed actions would not contribute to the need to list any Special Status Species as identified in BLM Manual 6840 and BLM OR/WA 6840 policy. Botanical Special Status Species surveys have been completed on all units for which surveys are practical or those species included in the 2008 State Director’s Special Status Species List. These surveys identified several small sites with botanical Special Status Species in the *Golden Burchard DM* Timber Sale area and these sites were excluded from the treatment area accordingly.

The *Umpqua River-Sawyer Rapids* EA is in compliance with the Clean Water Act, the National Historic Preservation Act, and the Clean Air Act. The project area does not contain any Areas of Critical Environmental Concern, designated Wilderness, Wild & Scenic Rivers, or prime and unique farmlands. There were no concerns identified regarding Cultural Resource Values, Native American Religious Concerns, or Environmental Justice issues.

The *Umpqua River-Sawyer Rapids* EA (EA #OR125-05-01) resulted in a Finding of No Significant Impact (FONSI), thus development of an Environmental Impact Statement (EIS) is not required.

Public Involvement:

The *Umpqua River-Sawyer Rapids* Environmental Assessment and Finding of No Significant Impact were made available for public comment on February 1, 2008. The comment period closed on March 3, 2008.

In response to public comments, the EA was edited where appropriate to clarify the description of the various thinning prescriptions and the reserve language as it applies to selected species within the forest management activities. Since these edits provided clarification, did not change the action prescription, and were therefore not substantial, a revision of the EA was not warranted. Accordingly, the environmental assessment and existing Finding of No Significant Impact fully cover this timber sale and constitute BLM’s compliance with the requirements of NEPA. As stated in the Notice of Sale for the *Golden Burchard DM* Timber Sale, these documents are available for inspection at the Coos Bay District Office.

Decision:

It is my decision to implement the Proposed Action Alternative as it applies to offering the *Golden Burchard DM* Timber Sale described in the EA OR125-05-01 for the *Umpqua River-Sawyer Rapids* EA project for the following reasons:

- It is consistent with the Proposed Action and best meets the purpose and need described in the *Umpqua River-Sawyer Rapids* EA. The No Action alternative fails to address the purpose and need for action and does not meet the management objectives.

- The project is in conformance with the *1995 and 2008 Final - Coos Bay District Resource Management Plan and Environmental Impact Statement (RMP) and Record of Decision*, as supplemented and amended. The *Golden Burchard DM Timber Sale* meets the objectives and management directions for the appropriate land use allocations.
- It complies with other major applicable laws, regulations, and Bureau policies.

Administrative Remedies:

In accordance with *Forest Management Regulations* in 43 CFR 5003.2, the decision for this timber sale will not become effective or be subject to formal protest until the *Notice of Sale* is published ". . . in a newspaper of general circulation in the area where the lands affected by the decision are located." For this project, the *Notice of Sale* will be published in *The World* newspaper on January 19, 2012.

43 CFR § 5003.3 subsection (b) states: "Protests shall be filed with the authorized officer and would contain a written statement of reasons for protesting the decision." This precludes the acceptance of electronic mail (email) or facsimile (fax) protests. Only written and signed hard copies of protests that are delivered to the Coos Bay District Office will be accepted. The protest must clearly and concisely state which portion or element of the decision is being protested and the reasons why the decision is believed to be in error.

43 CFR § 5003.3 subsection (c) states: "Protests received more than 15 days after the publication of the notice of decision or the notice of sale are not timely filed and shall not be considered." Upon timely filing of a protest, the authorized officer shall, at the conclusion of the review, serve the protest decision in writing to the protesting party (ies). Upon denial of a protest, the authorized officer may proceed with the implementation of the decision as permitted by regulations at 5003.3(f).

If no protest is received by the close of business (4:30 pm) within 15 days after publication of the decision notice, this decision will become final. If a timely protest is received, the project decision will be reconsidered in light of the statement of reasons for the protest and other pertinent information available, and the Coos Bay District Office will issue a protest decision.
