COOS BAY SALE NO. ORC00-TS-2017.0032
HIDDEN GEM CT

VARIABLE PLOT: Timber volumes in portions of Units 1, 2 and 3 and all of Unit 4 were based on a variable plot cruise. Using a 20 basal area factor (BAF), 193 plots were measured and 147 trees were randomly selected to be sampled. The sample trees were cruised and their volumes computed using form class tables for estimating board foot volumes of trees in 16-foot logs. The volumes are then expanded to a total sale volume.

3P: Volume within the road right-of-way and portions of Units 1, 2 and 3 was calculated using the 3P system to select 114 sample trees. The sample trees were cruised and their volumes computed using form class tables for estimating board foot volumes of trees in 16-foot logs. The volumes are then expanded to a total sale volume.

100% CRUISE: Volume for western redcedar in portions of Units 1, 2, and 3 and the road right-of-way were based on a 100% cruise using form class tables for estimating board foot volume of trees in 16-foot logs.

CUTTING AREA: Four units totaling approximately 109 acres must be partial cut. Five acres of right-of-way must be cut. Acres shown on Exhibit A have been computed using a Trimble Geo 7X Global Positioning System receiver. Acreage was calculated based on Global Positioning System traverse procedures including differential correction.
