LOG EXPORT AND SUBSTITUTION: All timber sales, including timber from Federal rights-of-ways, shall be subject to the restrictions relating to the export and substitution of unprocessed timber from the United States in accordance with P.L. 94-165 and 43 CFR 5400 and 5424 as amended.

LOG EXPORT AND SUBSTITUTION RESTRICTIONS: Excepting Port-Orford-cedar, all timber offered for sale hereunder is restricted from export from the United States in the form of unprocessed timber and is prohibited from being used as a substitute for exported private timber.

CRUISE INFORMATION: With respect to merchantable trees of all species in all cruise strata: the average DBHOB is 12.9 inches: the average gross merchantable log contains 41 bd. ft.; the total gross volume is approximately 2,123 thousand bd. ft.; and 94% recovery is expected. The average DBHOB for Douglas-fir is 12.9 inches; and the average gross merchantable log contains 41 bd. ft. The following cruise methods were used for volume determination:

VARIABLE PLOT: Timber volumes in Units 1 and 2 were based on a variable plot cruise. Using a 20 basal area factor (BAF), 259 plots were measured and 153 trees were randomly selected to be sampled. A portion of the sample trees have been felled, bucked, and scaled and a portion of the sample trees have been cruised and

the volumes computed using form class tables for estimating board foot volumes of trees in 16-foot logs. Volume from both methods is then expanded to a total stratum volume.

3P: The Douglas-fir in the right-of-way has been cruised using the 3P system to select 82 sample trees. The sample trees have been cruised and the volumes computed using form class tables for estimating board foot volumes of trees in 16-foot logs.

100% CRUISE: The minor species timber volumes are based on a 100% cruise using form class tables for estimating board foot volume of trees in 16-foot logs.

CUTTING AREA: Two units totaling approximately 154 acres must be partial cut and 5 acres of road right-of-way must be clear cut. Acreage data was collected using a Trimble Geo XT Global Positioning System receiver. Acreage was calculated based on Global Positioning System traverse procedures including differential correction.

ACCESS: Access to the sale area is provided via: Oregon State highways, Coos County roads, Government and privately controlled roads. A gate restricts access to Units 1 and 2. Keys are available at the Coos Bay District Office. A refundable deposit of \$100 is required to obtain a key.

Drainage:

- 180 linear feet of 18-inch CPE culvert
