TIMBER SALE NOTICE

NOTICE IS HEREBY GIVEN that the Bureau of Land Management will offer for sale timber as described herein for oral auction, pursuant to Instructions to Bidders, as stated on Form No. 5440-9 and subject to Notice of Requirement for Certification of Nonsegregated Facilities, Form No. 1140-4, attached. Written and oral bids will be received by the District Manager, or her representative, at the EUGENE DISTRICT OFFICE, 2890 CHAD DRIVE, EUGENE, OREGON. The timber sale will commence at 10:00 a.m. on Thursday, March 29, 2007.

This Timber Sale Notice does not constitute the decision document for purposes of protest and appeal of a forest management decision. Consistent with 43 CFR Subpart 5003 - Administrative Remedies, the notice of a timber sale, when published as a legal ad in a newspaper of general circulation shall constitute the decision document for purposes of protest and appeal. Protests may be filed with the Contracting Officer within 15 days of the publication of the aforementioned decision document in the newspaper. It is anticipated that the decision document will be published in The Register Guard newspaper on or about February 28, 2007. BLM does not warrant publication on this exact date. All parties considering protest of the timber sale decision document are encouraged to review the aforementioned newspaper to ensure accurate knowledge of the exact publication date.

A WRITTEN BID on Form 5440-9 at not less than the appraised price on a unit basis per species and the required minimum bid deposit shall be required to participate in oral bidding for each tract.

FOR SET-ASIDE TRACTS, the bidder must not have been determined by the Small Business Administration to be ineligible for preferential award of set-aside sales and must accompany his deposit with a self-certification statement that he is qualified as a small business concern as defined by the Small Business Administration in its regulations, Title 13, Chapter I, Part 121 as amended, of the Code of Federal Regulations. The Form 5430-1, Self Certification Statement, is attached hereto. The successful bidder will be required to sign SBA Form 723, "Small Business Certification Required on All Preferential Sales of Set-Aside Timber," at the time he signs the timber sale contract. A copy of SBA Form 723 is attached.

THE SUCCESSFUL BIDDER, as a condition of award, will be required to complete and/or sign the following forms:

1. Form 1140-6, a certification that the bid was arrived at by the bidder or offerer independently, and was tendered without collusion with any other bidder or offerer.
2. Form 1140-7, Equal Opportunity Affirmative Action Program Representation, for all contracts over $10,000.
4. Form 5450-17, Export Determination.

PRE-AWARD QUALIFICATIONS. The high bidder may be required to furnish information to determine the ability to perform the obligations of the contract. If the high bidder is determined not qualified, responsible or refuses to respond within 15 days of a request for information pertaining to qualifications, the contract may be offered and awarded for the amount of the high bid to the highest of the bidders who is qualified, responsible, and willing to accept the contract.
A PERFORMANCE BOND in an amount not less than 20 percent of the total purchase price will be required for all contracts of $2,500 or more, but the amount of the bond shall not be in excess of $500,000, except when the Purchaser opts to increase the minimum bond as provided in 43 CFR 5451.2. A minimum performance bond of not less than $500 will be required for all installment contracts less than $2,500.

INSTALLMENT PAYMENTS may be authorized for sales of $500 or more. Required installments will be determined by BLM. For sales under $500,000, installments will not be less than 10% of the total purchase price. For sales of $500,000 or more, installment payments shall be $50,000.

QUALIFIED SMALL BUSINESS concerns may apply to the Small Business Administration for a loan to provide financing for access road construction required under the terms of qualifying timber sale contracts and necessary contract changes will be made. Approval of loan applications rests with the Small Business Administration and may be contingent upon availability of funds. Applicants for such loans shall notify the Bureau of Land Management of their intention to apply for such loan.

LOG EXPORT AND SUBSTITUTION. All timber sales shall be subject to the restrictions relating to the export and substitution of unprocessed timber from the United States in accordance with P.L. 94-165 and 43 CFR 5400, 5420, as amended.

ADDITIONAL INFORMATION concerning each timber sale tract described herein is available at the above District Office. A copy of the timber sale contract is also available for inspection at the District Office.

THE VOLUMES LISTED herein are estimates only, based on 16-foot taper breaks, which must be taken into consideration if comparisons are made with volume predictions based on other standards. The volumes based on 32-foot taper breaks are shown for comparison purposes. No sale shall be made for less than the total purchase price, without regard to the amount bid per unit, even though quantity of timber actually cut or removed or designated for taking is more or less than the estimated volume or quantity so listed.

AN ENVIRONMENTAL ASSESSMENT was prepared for this sale, and a Finding of No Significant Impact has been documented. These documents are available for inspection as background for this sale at the Eugene District Office.

A SPECIAL PROVISION has been added to the contract that requires the Purchaser to give 14 days written notice prior to beginning or resuming operations.

A SPECIAL PROVISION is included in the contract that enables the Contracting Officer to suspend or terminate the contract in order to: (1) comply with the Endangered Species Act; (2) comply with a court order; (3) comply with BLM Manual 6840 as it relates to Federal proposed, Federal candidate, Bureau sensitive, or State listed species or habitat; or (4) protect raptor nests during nesting.

This contract provision limits the liability of the Government to the actual Out-of-Pocket Expenses incurred by the Purchaser that have not been amortized by the removal of timber from the contract area. In the event that operating time is lost as a result of the incorporation of additional contract requirements or suspension-related delays, an extension of time, with or without reappraisal depending on the reason for the suspension, will constitute a full and complete remedy for any claim that delays due to the suspension hindered performance of the contract or resulted in damages of any kind to the Purchaser. In the event of a suspension that lasts longer than 30 days, the First Installment may be reduced and/or the unamortized Out-of-Pocket Expenses of road or other construction may be refunded or transferred to another contract at the election of the Purchaser.

ACCESS to the sale may be through a locked gate (see individual sale information). Prospective bidders may obtain a key from the Eugene District Office. Any other persons interested in visiting the timber sale site should first contact the District Office at 683-6600.

LOG EXPORT RESTRICTIONS: All timber offered for sale hereunder is restricted from export from the United States in the form of unprocessed timber and is prohibited from being used as a substitute for exported private timber.

CRUISE INFORMATION: All species in the right-of-ways have been cruised using the 3P system to select sample trees. The sample trees have been cruised. Volume from this method is then expanded to a total volume. A map showing the location and description of these sample trees is available at the Eugene District Office.

Volume for all Douglas-fir and Western hemlock in the Partial Harvest Areas was variable plot cruised. Plot data is then used to calculate v-bar and basal area per acre using the National Cruise Program. The basal area was determined with a Relaskop using a 20 BAF. This sale contains a total of 211 plots; 61 sample trees were randomly selected on these plots to determine v-bar. A map showing the location of the sample trees is available at the Eugene District Office.

With respect to merchantable Douglas-fir (sample) trees: The average tree is 13.3" DBHOB; the average log contains 45 bd. ft.; the total gross volume is approximately 4,968 MBF; 95% recovery is expected; and 0% was determined to be salvage volume.

CUTTING AREA: Two areas totaling approximately 290 acres must be partial harvested and approximately 4 acres of right-of-way must be clear cut. Note: Acres shown on Exhibit A have been computed using a Trimble ProXR Global Positioning System receiver and Criterion laser. Acreage was calculated based on Global Positioning System traverse procedures including differential correction and Criterion laser.

ACCESS: Access to the sale is provided by:
1. a public road;
2. BLM existing roads;
3. BLM roads to be constructed and improved;

ROAD MAINTENANCE: The Purchaser shall pay to BLM maintenance fees of $13,026.84 for timber and mineral hauling on portions of BLM paved roads. The Purchaser shall maintain all BLM gravel roads and pay BLM a rockwear fee of $10,374.34 for timber and mineral haul. See Exhibit D map for specification of road maintenance responsibility. LOG EXPORT RESTRICTIONS: All timber offered for sale hereunder is restricted from export from the United States in the form of unprocessed timber and is prohibited from being used as a substitute for exported private timber.

CRUISE INFORMATION: All species in the right-of-ways have been cruised using the 3P system to select sample trees. A portion of the sample trees have been felled, bucked, and scaled for verification of cruised samples. The sample trees have been cruised and the volume computed using the National Cruise Program for estimating volume in 16-foot lengths and the volume expanded to a total right-of-way volume. A map showing the locations and descriptions of these sample trees is available at the Eugene District Office. Volume for all coniferous species in the Partial Harvest Area was variable plot cruised for estimating board foot volume of trees in 16-foot logs. Sample tree volume is expanded to a total sale volume using the National Cruise Program. The tree count was determined with a Relaskop using a 27.78 BAF. This sale contains a total of 279 plots of which 93 plots have sample trees and 186 are tree count plots. A portion of the sample trees located in cruise plots have been felled, bucked and scaled to verify the cruise. A map showing the locations of the sample trees is available at the Eugene District Office.

With respect to merchantable Douglas-fir (sample) trees: The average tree is 12.8" DBHOB; the average log contains 42 bd. ft.; the total gross volume is approximately 8,259 MBF; and 95% recovery is expected.

Cutting Area: One area totaling approximately 398 acres must be partial harvested and approximately 14 acres of right-of-way must be clear cut.

DURATION OF CONTRACT: Duration of the contract will be 36 months for cutting and removal of timber.

SPECIAL PROVISIONS: The contract will contain special provisions regarding road construction, road renovation, road improvement, road maintenance, logging methods, prevention of erosion, falling of snags, logging residue reduction, submission of a written logging plan specifying spur road locations, landing locations, logging methods, and logging schedule.

Under Sec. 25 of the timber sale contract, tractor logging will be prohibited during periods of excessive soil moisture. This will normally limit tractor logging to July, August and September.

This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. These provisions include:

- The designation and sale of additional timber, such as corridor and guyline trees, at contract price, as necessary to facilitate safe and efficient logging. Such trees may be felled and removed when they are painted by the Authorized Officer;
- Sale of additional timber volume at current fair market value where the species and/or size of trees are not representative of the forest stand(s) being thinned;
- The use of unilateral modifications executed by BLM for such additional timber;
- Revocation of the Purchaser’s right to cut additional timber if the Authorized Officer determines that trees have been cut and removed that were not previously marked and approved for cutting and removal by the Authorized Officer.

It is estimated that approximately 730 MBF of such additional timber may be removed under the contract, but is not included in the advertised sale volume nor was it included in the timber sale appraisal.

A Special Provision is included in the contract which enables the Contracting Officer to suspend or terminate the contract in order to: (1) comply with the Endangered Species Act or to protect occupied marbled murrelet sites in accordance with the Standards and Guidelines of the Eugene District Record of Decision (ROD) and Resource Management Plan (RMP); (2) comply with a court order; (3) comply with BLM Manual 6840 as it relates to Federal proposed, Federal candidate, Bureau sensitive, or State listed species or habitat; or (4) protect raptor nests during nesting.
This contract provision limits the liability of the Government to the actual Out-of-Pocket Expenses incurred by the Purchaser which have not been amortized by the removal of timber from the contract area. In the event that operating time is lost as a result of the incorporation of additional contract requirements or suspension-related delays, an extension of time, with or without reappraisal depending on the reason for the suspension, will constitute a full and complete remedy for any claim that delays due to the suspension hindered performance of the contract or resulted in damages of any kind to the Purchaser. In the event of a suspension that lasts longer than 30 days, the First Installment may be reduced and/or the unamortized Out-of-Pocket Expenses of road or other construction may be refunded or transferred to another contract at the election of the Purchaser.

OTHER SPECIAL REQUIREMENTS:
Hauling on Road No. 15-7-23 shall be limited to the dry season prior to completion of required improvement.

No felling, yarding, or loading shall be permitted in or through Reserve Areas shown on Exhibit A, except felling and yarding may occur in the Special Yarding Areas, and yarding may occur over Stream 1. Trees felled in these areas will be retained on site. When yarding over Stream 1, trees shall be felled parallel to the stream and full suspension is required.

Approximately 41 Special Habitat Trees in 2 groups have been marked with yellow paint and are shown on Exhibit A. Yarding equipment shall not be attached to them, and the trees shall not be felled or damaged.

In the Special Operating Area shown on Exhibit A (approximately 12 acres), no operations shall occur from April 1 through August 5, due to wildlife concerns. From August 6 through September 15, both days inclusive, daily operations shall not begin until at least 2 hours after sunrise and shall cease at least 2 hours prior to sunset. This restriction shall not be waived.

The Purchaser shall have the option to rock Spurs A-E, G and J; and Roads No. 15-7-22.72 and 15-7-22.77 at Purchaser’s expense. If the option is exercised, fees for mineral haul will be collected. Other newly constructed and renovated roads shall not be rocked.

Yarding shall be done with a carriage equipped skyline capable of yarding 1,900 feet slope distance in the following areas: the Partial Harvest Area on slopes greater than 35%; and within 210 feet of streams, except in the Special Skidding Areas. Lift trees and/or intermediate supports may be necessary.

In the Partial Harvest Area and in the Special Skidding Areas, where slopes are less than 35%, yarding may be done either by a skyline system as described above, or by equipment operated entirely on designated skid roads during periods of low soil moisture. In the Special Skidding Areas, new skid trails shall be located at least 75 feet from the posted boundary.

The Purchaser shall clean yarding, logging, road construction, decommissioning, and slash disposal equipment, using a water pressure hose, prior to entry on BLM lands.

There are requirements for blocking and waterbarring roads between logging seasons.

Upon completion of hauling, the Purchaser shall decommission skid trails, newly constructed roads and renovated roads. Decommissioning measures include:

- Remove rock placed at Purchaser’s option on Spurs A-E, G and F and remove from BLM land at Purchaser’s expense.
- Till with decompaction equipment, such as a track mounted excavator, during the dry season, skid trails, Spurs A-J and natural surface renovated roads.
- Construct drainage dipoles, waterbars and/or lead-off ditches, as directed by the Authorized Officer.
- Place logging slash on skid trails, Spurs A-J and renovated roads where available.
- Block roads at entry points from Road 15-7-23 using stumps, slash, and/or cull logs as directed by the Authorized Officer.

OPTIONAL CONTRIBUTION: The Purchaser will have the option of performing pile burning or contributing $500.91 in lieu thereof. The option must be declared prior to contract execution.
