

**First publication of the notice of this timber sale will be April 25, 2012 in the Eugene Register-Guard. This notice in the newspaper constitutes the decision document for purposes of protest under 43 CFR 5003 - Administrative Remedies. Protests of this sale must be filed within 15 days after the first publication of this notice. As interpreted by BLM, the regulations do not authorize the acceptance of protests in any form other than a signed, written hard copy that is delivered to the physical address of the Eugene District Office as defined below.**

DECISION RECORD**

**ALLISON CREEK TIMBER SALE  
DOI-BLM-OR-E060-2010-0001-EA**

Background:

An Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for the proposed 2011 Thinning Project were prepared by the Upper Willamette Resource Area, Eugene District of the Bureau of Land Management (BLM). The timber sale was analyzed as part of that project and would occur, as analyzed, on approximately 240 acres located in T. 16 S., R. 2 W., Sections 21 and 29, and T. 16 S., R. 3 W., Section 13. Actions may include thinning, aquatic habitat restoration, road improvements, temporary road construction, and road decommissioning.

Purpose and Objectives:

The need for action in Matrix and Riparian Reserves has been established through the results of field reviews and stand examinations, which indicate that stands would benefit from thinning. Currently, the stands are dense, overstocked, and uniform in structure. This results in reduced tree growth and stand vigor. Treatment would increase stand vigor, growth rates, crown differentiation, and stand complexity.

The purposes of the actions in Matrix are to meet the objectives given in the 1995 Eugene District Record of Decision and Resource Management Plan (1995 ROD/RMP). Some listed objectives are to: (1) Produce a sustainable supply of timber and other forest commodities to provide jobs and to contribute to community stability; (2) Provide habitat for a variety of organisms associated with both late-successional and younger forests and maintain valuable structural components, such as down logs and snags (pg. 34). Direction for road management is stated on page 98 of the 1995 RMP, which directs the BLM to, "manage roads to meet the needs identified under other resource programs."

The purposes of the actions in Riparian Reserves are to provide habitat for Special Status Species, and other terrestrial species, and to maintain and restore water quality (1995 RMP, pp. 18, 23).

Decision:

Based on the analysis documented in the Environmental Assessment (DOI-BLM-OR-E060-2010-0001-EA) and the Finding of No Significant Impact (FONSI), it is my decision to implement Alternative 2 and all associated Project Design Features, because it best meets the purpose and need of the project.

Thinning would be designed to increase tree size through time, develop wind firm trees, extend the culmination of mean annual increment and capture anticipated mortality. Stands would be thinned from below and trees selected for harvest would be the suppressed, intermediate, and co-dominant conifer trees. The prescription would result in stands with variable spacing of 15-35 feet between remaining conifers.

On five acres, the prescription would vary to support the growth of individual oak trees. The conifers that are currently shading out the oak trees would be removed.

Depending on stream channel stability, effective shade zone needed, and current stand conditions, the no-harvest buffers adjacent to the streams would vary between 75 and 400 feet. Seeps and springs would have no-harvest buffers ranging between 25 to 50 feet.

Under the selected alternative, approximately 2 miles of permanent road and 1 mile of temporary road would be constructed. Approximately 1 mile of road would be decommissioned.

Compliance:

This project is in conformance with the 1995 *Record of Decision for Amendments to Forest Service and Bureau of Land Management Planning Documents within the Range of the Northern Spotted Owl* (Northwest Forest Plan {NSO-ROD} USDA Forest Service and USDI Bureau of Land Management, April 1994), and the 1995 *Eugene District Resource Management Plan* (1995 RMP) including the 2007 *Record of Decision To Remove the Survey and Manage Mitigation Measure Standards and Guidelines from Bureau of Land Management Resource Management Plans within the Range of the Northern Spotted Owl*.

This project is consistent with court orders relating to the Survey and Manage mitigation measure of the Northwest Forest Plan, as incorporated into the Eugene District Resource Management Plan.

On December 17, 2009, the U.S. District Court for the Western District of Washington issued an order in *Conservation Northwest, et al. v. Rey, et al.*, No. 08-1067 (W.D. Wash.) (Coughenour, J.), granting Plaintiffs' motion for partial summary judgment and finding a variety of NEPA violations in the BLM and USFS 2007 Record of Decision eliminating the Survey and Manage mitigation measure. Previously, in 2006, the District Court (Judge Pechman) had invalidated the agencies' 2004 RODs eliminating Survey and Manage due to NEPA violations. Following the District Court's 2006 ruling, parties to the litigation had entered into a stipulation exempting certain categories of activities from the Survey and Manage standard (hereinafter "Pechman exemptions").

Judge Pechman's Order from October 11, 2006 directs: "Defendants shall not authorize, allow, or permit to continue any logging or other ground-disturbing activities on projects to which the 2004 ROD applied unless such activities are in compliance with the 2001 ROD (as the 2001 ROD was amended or modified as of March 21, 2004), except that this order would not apply to:

- A. Thinning projects in stands younger than 80 years old;
- B. Replacing culverts on roads that are in use and part of the road system, and removing culverts if the road is temporary or to be decommissioned;
- C. Riparian and stream improvement projects where the riparian work is riparian planting, obtaining material for placing in-stream, and road or trail decommissioning; and where the stream improvement work is the placement large wood, channel and floodplain reconstruction, or removal of channel diversions; and
- D. The portions of project involving hazardous fuel treatments where prescribed fire is applied. Any portion of a hazardous fuel treatment project involving commercial logging would remain subject to the survey and management requirements except for thinning of stands younger than 80 years old under subparagraph a. of this paragraph."

Following the Court's December 17, 2009 ruling, the Pechman exemptions are still in place.

The implementation of this project will not have significant environmental effects beyond those already identified in the 1995 Final EIS/Proposed RMP.

Administrative Review Opportunities:

The decision to implement this project may be protested under 43 CFR 5003 - Administrative Remedies. In accordance with 43 CFR 5003.2, the decision for this project will not be subject to protest until the notice of sale is first published in the Eugene Register-Guard. This published notice of sale will constitute the decision document for the purpose of protests of this project (43 CFR 5003.2b). Protests of this decision must be filed with this office within fifteen (15) days after first publication of the notice of sale.

As interpreted by BLM, the regulations do not authorize the acceptance of protests in any form other than a signed, written hard copy that is delivered to the physical address of the BLM Eugene District Office.
