

September 30, 2015

Dear Reader:

The Siuslaw Resource Area of the Eugene District Bureau of Land Management will be offering for auction the Eames Swing Project located in T18S-R6W-Section 31, T19S-R6W-Section 13, Will. Mer. Eames Swing project to be implemented as part of the restoration treatments described in the Rethin Environmental Assessment (DOI-BLM-OR-E050-2011-0004-EA).

I have attached a decision notice as it will appear in the Eugene Register-Guard. First publication of the notice of this timber sale will be September 30, 2015 in the Eugene Register-Guard. This notice in the newspaper constitutes the decision document for purposes of protest under 43 CFR 5003 - Administrative Remedies. Protests of this sale must be filed within 15 days after the first publication of this notice. As interpreted by BLM, the regulations do not authorize the acceptance of protests in any form other than a signed, written hard copy that is delivered to the physical address of the Eugene District Office as defined below.

BLM-Eugene District Office  
3106 Pierce Parkway, Suite E  
Springfield, OR, 97477-7910

If you have questions about the Decision Notice, please contact Sharmila Premdas at (541) 683-6794.

Thank you for your interest in your public lands.

Sincerely,

Michael J. Korn  
Field Manager  
Siuslaw Field Office

One Attachment:  
Decision Notice

**UNITED STATES  
DEPARTMENT OF THE INTERIOR  
BUREAU OF LAND MANAGEMENT  
EUGENE DISTRICT OFFICE**

**DECISION RECORD  
Eames Swing - Re-thin EA**

**Environmental Assessment  
DOI-BLM-OR-E050-2011-0004-EA**

**DECISION**

It is my decision to implement Eames Swing project analyzed under the Re-thin EA. This thinning project consists of approximately 145 acres in two units and is located in T18S-R6W-Section 31 (Unit 1) and T19S-R6W-Section 13 (Unit 2). The thinning in T19S-R6W-Section 13 comprises of one unit within matrix general forest management area (GFMA) lands, whereas the thinning in T18S-R6W-Section 31 comprises one unit in late successional reserve (LSR). The Rethin EA analyzed the effects of thinning on approximately 750 acres of previously thinned forest stands located in late successional reserve (LSR), matrix and riparian reserve (RR) land use allocations (LUA). A description of the alternatives follows later in this decision.

Alternative 3 will be implemented in matrix and associated riparian reserves. The thinning prescription will include a relative density (RD) of 33 in both matrix and riparian reserve land use allocations. Riparian reserve acres will receive coarse woody additions at the 30% tolerance level in clumps (approximately 9.5 trees per clump; one clump every 5 acres; clump size of 1/6<sup>th</sup> of an acre). Alternative 2 will be implemented in the LSR and associated riparian reserves. The thinning prescription will include an RD of 25 in both LSR and riparian reserves and will receive coarse woody additions at the 50% tolerance level in clumps (approximately 29 trees per clump; one clump every 10 acres; clump size of 6/10<sup>th</sup> of an acre). Coarse woody additions will be implemented with a service contract.

There will be no new roads constructed; however road renovation/improvement will occur. Approximately 24,452 feet of road will be renovated or improved for this project (EA page 56).

Rationale for selection: The actions chosen under the Alternatives best meet the purpose and need for the action and provide the most appropriate use and protection of resources based on management direction provided in the 1995 Eugene District RMP.

**PLAN CONFORMANCE**

This action is in conformance with the 1995 Eugene District Resource Management Plan (*amended*). The RMP anticipated the need to: (1) conduct commercial thinning in Matrix land use allocations by primarily thinning from below to improve growing conditions for remaining conifers and other tree species and to provide commodities; (2) Implement silvicultural treatments such as density management in LSR and RR land use allocations by thinning to accelerate the development of structural characteristics typical of late-successional forests, improve understory species composition, provide openings for development of early seral habitat and enhance snag and coarse woody recruitment to benefit multiple species; and (3) Improve riparian function in the riparian reserve land use allocations to contribute to the attainment of Aquatic Conservation Strategy (ACS) objectives.

**SURVEY AND MANAGE**

Eames Swing project is consistent with court orders relating to the Survey and Manage mitigation measure of the Northwest Forest Plan, as incorporated into the Eugene District Resource Management Plan.

In 2006, the District Court (Judge Pechman) had invalidated the agencies' 2004 RODs eliminating Survey and Manage due to NEPA violations.

Following the District Court's 2006 ruling, parties to the litigation had entered into a stipulation exempting certain categories of activities from the Survey and Manage standard (hereinafter "Pechman exemptions").

Judge Pechman's Order from October 11, 2006 directs: "Defendants shall not authorize, allow, or permit to continue any logging or other ground-disturbing activities on projects to which the 2004 ROD applied unless such activities are in compliance with the 2001 ROD (as the 2001 ROD was amended or modified as of March 21, 2004), except that this order will not apply to:

- A. Thinning projects in stands younger than 80 years old (emphasis added):
- B. Replacing culverts on roads that are in use and part of the road system, and removing culverts if the road is temporary or to be decommissioned;
- C. Riparian and stream improvement projects where the riparian work is riparian planting, obtaining material for placing in-stream, and road or trail decommissioning; and where the stream improvement work is the placement large wood, channel and floodplain reconstruction, or removal of channel diversions; and
- D. The portions of project involving hazardous fuel treatments where prescribed fire is applied. Any portion of a hazardous fuel treatment project involving commercial logging will remain subject to the survey and management requirements except for thinning of stands younger than 80 years old under subparagraph A. of this paragraph.

Following the District Court's December 17, 2009 ruling, the Pechman exemptions still remained in place. I have reviewed Eames Swing project in consideration of both the December 17, 2009 partial summary judgment and Judge Pechman's October 11, 2006 order. Because Eames Swing project includes no regeneration harvest and includes thinning only in stands less than 80 years old, I have made the determination that this project meets Exemption A of the Pechman Exemptions (October 11, 2006 Order), and therefore may still proceed to be offered for sale even if the District Court sets aside or otherwise enjoins use of the 2007 Survey and Manage Record of Decision since the Pechman exemptions would remain valid in such case.

#### **DESCRIPTION OF THE EA ALTERNATIVES**

Alternative 1 is the no action Alternative. Three action Alternatives were designed and analyzed in the Rethin EA. Alternative 2 includes thinning from below to a relative density between 25 and 27 in Matrix and LSR lands, including their associated Riparian Reserve lands; LSR and the associated RR treatments include: small gaps less than one acre however, no gaps in Burnt Bottle unit were analyzed to minimize the spread of existing weeds; snags and coarse woody debris in clumps to provide 50% tolerance level (DecAID 2012); Burnt Bottle would receive three snag patches located more than 200 feet from dense blackberry infestations but no coarse woody debris additions would occur. Blackberries would be controlled using prescribed fire and planting a mixture of hardwoods and conifers in Burnt Bottle and Territorial thinning units. Snags and coarse woody debris would be enhanced in clumps to provide a 30% tolerance level (DecAID 2012) within Riparian Reserves associated with the Matrix land use allocations in both Alternatives 2 and 3.

Alternative 3 includes thinning from below to a relative density between 30 and 38 in Matrix and LSR lands and their associated Riparian Reserves; LSR and the associated RR treatments included: small gaps less than one acre; snags and coarse woody debris enhancements in clumps to provide 80% tolerance level (DecAID 2012). Blackberries would be controlled without prescribed fire in Burnt Bottle and Territorial units for both Alternatives 3 and 4.

Alternative 4 includes thinning from below to a relative density between 30 and 38 in Matrix and LSR lands and their associated Riparian Reserves; LSR and the associated RR treatments included: No gaps to be created and snags and coarse woody debris enhancements that are well distributed to provide 50% tolerance level (DecAID 2012), would be implemented. Snags and coarse woody debris would be well distributed to provide a 30% tolerance level (DecAID 2012) within Riparian Reserves associated with Matrix land use allocations in Alternative 4.

None of the Alternatives considered new road construction however road renovation and improvement were included in all the Alternatives. Streamside no treatment buffers were a minimum of 75 feet for all Alternatives.

#### **Minor corrections to the EA after the public comment period**

The length of Road 18-7-15.72 was 90 feet in the Rethin EA however this has been corrected to 250 feet.

#### **CONSULTATION AND COORDINATION:**

##### Public participation

Scoping was initiated in August of 2011; a scoping letter was mailed out to local businesses, groups, government agencies and individuals soliciting feedback about the thinning project. Three groups and individuals responded with the following comments. They were in support of thinning, economic viability, gap creation, protection of hardwoods, no new road construction, stream and riparian protection and adequate provisions for snags and downed wood.

##### EA public review

The Re-thin Environmental Assessment (EA) was made available for a 30 day public comment period from February 21, 2013 to March 22, 2013. Comments were received from three groups, responses to substantive comments were mailed to the commenters along with the decision record for the first timber sale implemented under the Re-thin EA, which was Burnt Bottle Timber Sale. In addition, the EA was posted on the Eugene District internet website. A copy of this Decision Record will be posted on the Eugene District internet website as well.

#### **U.S. Fish and Wildlife Service (USFWS)**

##### ESA consultation

Consultation with the USFWS has been completed under the 2013-2014 programmatic consultation documents (USDI-FWS LOC-01EOFW00-2012-I-0214, 2013) (USDI-FWS BO 01EOFW00 2013F, 2013). Eames Swing project is located within spotted owl designated critical habitat. The thinning unit in GFMA is not designated marbled murrelet critical habitat, the one thinning unit located in LSR is designated marbled murrelet critical habitat.

#### **National Marine Fisheries Service (NMFS)**

##### ESA consultation

The Eames Swing project is located in the Wolf Creek 5<sup>th</sup> field watershed. The project has a Not Likely to Adversely Affect (NLAA) on coho salmon and their designated critical habitat. Streams 13-1, 13-3, 13-5 will receive 150 foot un-thinned buffers; stream 13-6 (northside) will receive 100 feet and 13-6 (southside) will receive 150 feet. The haul route for Eames Swing unit 1 would be dry season use, the roads in the eastern portion of unit 2 would be dry season use as well. Consultation with NMFS has been completed and a Letter of Concurrence has been issued.

##### Essential Fish Habitat

The Magnuson-Stevens Fishery Conservation and Management Act requires federal agencies to consult with the Secretary of Commerce regarding any action or proposed action authorized, funded or undertaken by the agency that may adversely affect Essential Fish Habitat (EFH) under the Act. The actions being implemented under the Rethin EA would have "No Effect" on waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity.

#### **TRIBAL COORDINATION**

The Bureau of Land Management Siuslaw Resource Area sent scoping letters to the Confederated Tribes of Siletz, the Confederated Tribes of the Grand Ronde and the Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians during the scoping period. No response was received. Copies of the EA were mailed to them for public comment and no responses were received.

**CULTURAL RESOURCES**

The Eames Swing project occurs in the Oregon Coast Range physiographic province where the terms of Appendix D of the *Protocol between the Oregon State Historic Preservation Office and the Bureau of Land Management* are in effect.

Eugene District Cultural Resource maps and survey reports were consulted; there are no known cultural resources that occur in the vicinity of the project area.

Survey techniques are based on those described in Appendix D of the *Protocol for Managing Cultural Resource on Lands Administered by the Bureau of Land Management in Oregon*. Post-disturbance survey, when conducted, follows standards based on slope as defined in the Protocol appendix. These standards only mandate post-disturbance survey on slopes of 10% or less, or if professional judgment prompts such efforts due to topographic features or existence of nearby cultural resources. Ground disturbing work must be suspended if cultural material is discovered during project work until an archaeologist can assess the significance of the discovery.

**ADMINISTRATIVE REMEDIES**

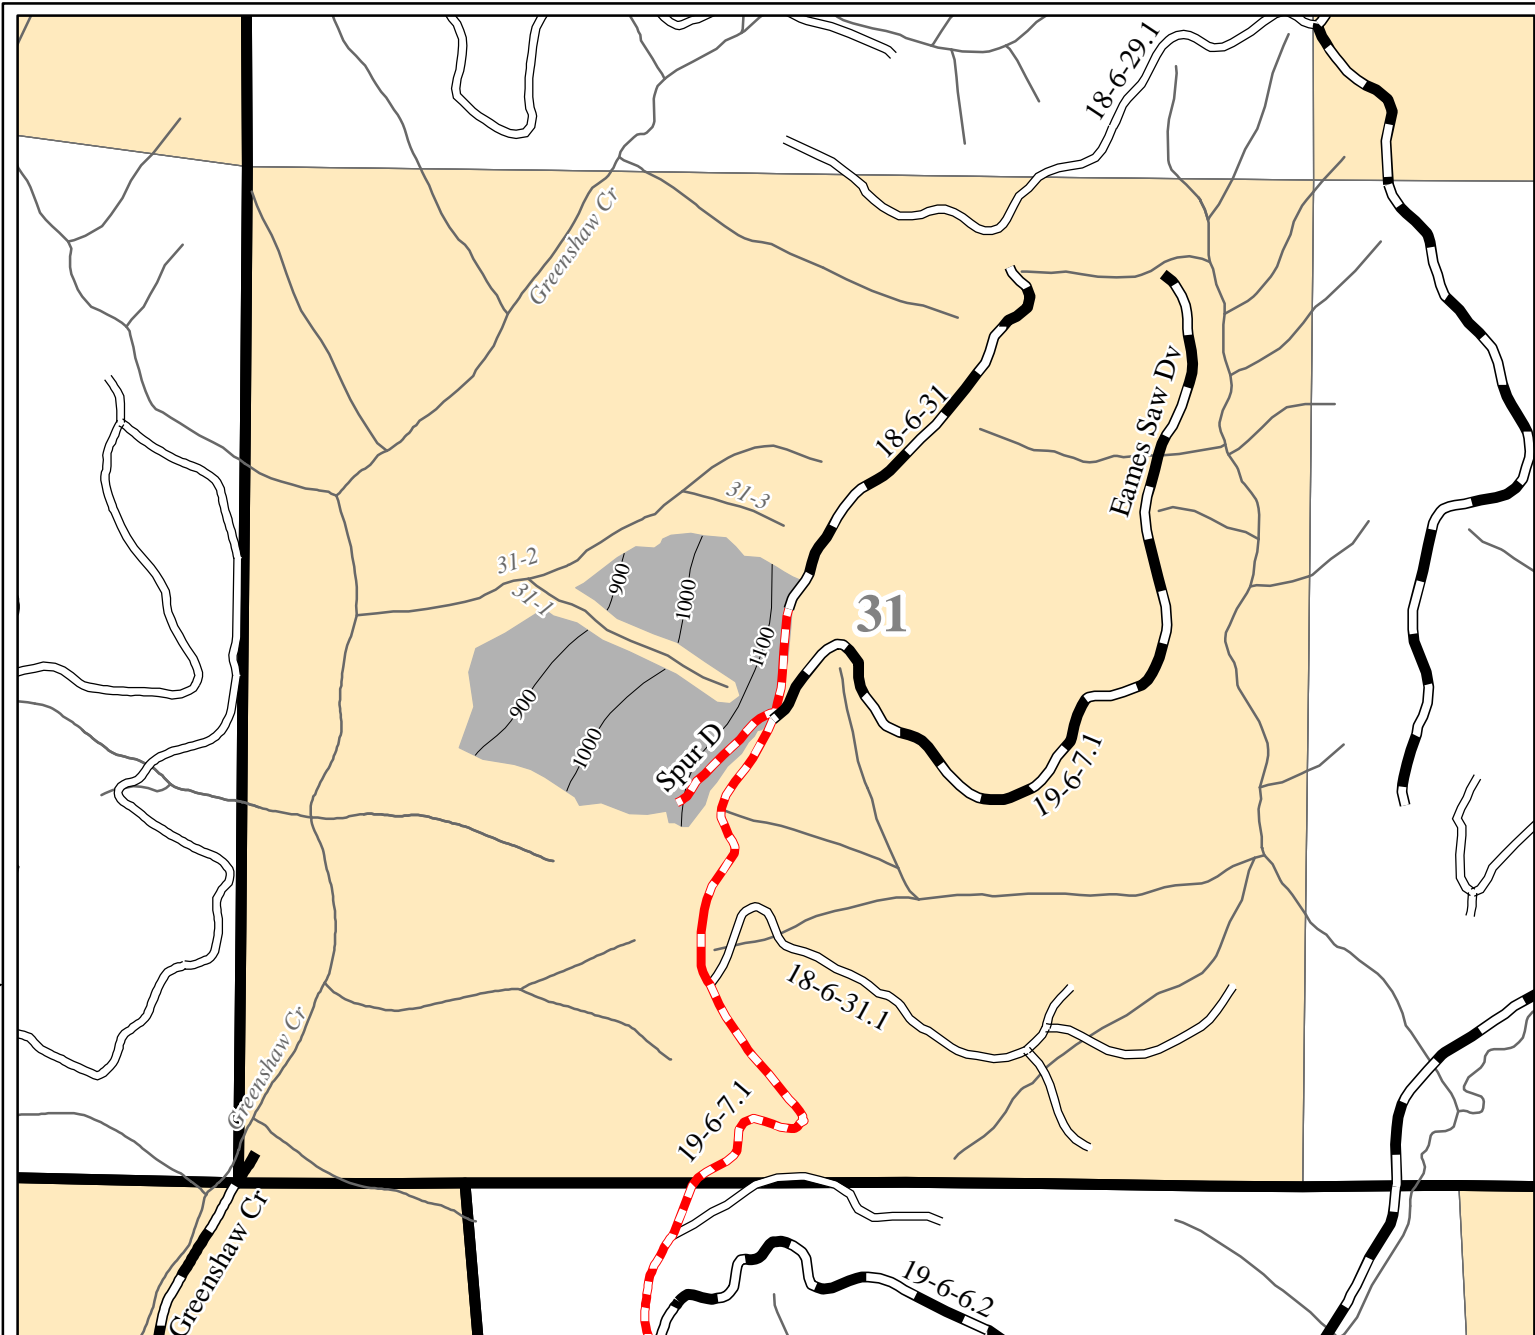

The decision to implement this project may be protested under 43 CFR 5003 - Administrative Remedies. In accordance with 43 CFR 5003.2, the decision for this project will not be subject to protest until the notice of sale is first published in the Eugene Register-Guard. This published notice of sale will constitute the decision document for the purpose of protests of this project (43 CFR 5003.2b). Protests of this decision must be filed with this office within fifteen (15) days after first publication of the notice of sale. As interpreted by BLM, the regulations do not authorize the acceptance of protests in any form other than a signed, written hard copy that is delivered to the physical address of the BLM Eugene District Office.

# Eames Swing - Unit 2

T.19 S., R.6 W., Sec. 13

## LEGAL AD

TIMBER FOR SALE, UNITED STATES DEPARTMENT OF THE INTERIOR, BUREAU OF LAND MANAGEMENT. ORAL AUCTION OR SEALED BIDS as hereinafter designated will be received by the District Manager, Bureau of Land Management, 3106 Pierce Parkway, Springfield, Oregon at 10:00 a.m. on Thursday, October 29, 2015 for all timber marked or designated for cutting. Before bids are submitted, full information concerning the timber, the conditions of sale and submission of bids should be obtained from the above District Manager. The right is hereby reserved to waive technical defects in this advertisement and to reject any or all bids. The United States reserves the right to waive any informality in bids received whenever such waiver is in the interest of the United States.

These projects are consistent with court orders relating to the Survey and Manage mitigation measure of the Northwest Forest Plan, as incorporated into the Eugene District Resource Management Plan, including Judge Pechman's Order from October 11, 2006, stipulating four exemptions. These projects meet one of the specified exemptions. Specific project details can be found in the related NEPA documents.

This sale notice, first published on September 30, 2015, constitutes the decision document for purposes of protests under 43 CFR Subpart 5003 - Administrative Remedies. Protests of any sale listed below must be filed within 15 days after the first publication of this notice. As interpreted by BLM, the regulations do not authorize the acceptance of protests in any form other than a signed, written hard copy that is delivered to the physical address of the advertising BLM office.

IN LINN COUNTY, OREGON: O&C: ORAL AUCTION: Middle Ridge Timber Sale: All timber designated for cutting on certain Federal land in Sec. 13, T. 15 S., R. 2 W., W.M., estimated for the purpose of this sale to be 2,830 MBF. No written bid for less than \$536,888.00 will be considered. Minimum deposit with bid \$53,700.00.

IN LANE COUNTY, OREGON: O&C: ORAL AUCTION: Noodle Timber Sale: All timber designated for cutting on certain Federal land in Sec. 27 and Sec. 35, T. 16 S., R. 7 W., W.M., estimated for the purpose of this sale to be 2,058 MBF. No written bid for less than \$461,856.00 will be considered. Minimum deposit with bid \$46,200.00.

IN LANE COUNTY, OREGON: O&C: ORAL AUCTION: Eames Swing Timber Sale: All timber designated for cutting on certain Federal land in Sec. 31, T. 18 S., R. 6 W., and Sec. 13, T. 19 S., R. 6 W., W.M., estimated for the purpose of this sale to be 2,340 MBF. No written bid for less than \$778,969.00 will be considered. Minimum deposit with bid \$77,900.00.
