

DAILY GATHER OVERVIEW

State: Oregon

District/Field Office: Lakeview District

Contractor: Cattoor Livestock Roundup

Date/ time: 8/29/12 @ 1715 PST

Number of animals gathered: 64

Cumulative animals gathered: 193

Condition of Animals (Typical Henneke Body Condition Score): Average BCS of 3-4 with several older horses in the 2 range. None of the captured horses showed symptoms of dehydration or sickness due to lack of water. Captured foals were immediately separated and hand watered with buckets to ensure they were hydrated before being shipped to Burns Corrals and paired back up with mares.

Number of animal deaths this day: (Acute/Sudden and/or Chronic/Preexisting)

0

General Terrain and Weather: Gently rolling hills with rimrock outcrops and sagebrush steppe vegetation. Weather was sunny with a high around 75 F.

General Information:

Helicopter operations ended at approximately 1100. All captured horses were transported to Burns Corral Facility by 1630 on 8/29/12. Horses brought to the Burns Corral Facility have been monitored for water intake and symptoms of water intoxication. No complications have been identified.

The Paisley Desert Emergency gather is now complete. A total of 193 horses (of the targeted 200 horses) were gathered and removed from the HMA. Horses were removed from areas with very poor water and areas where water hauling had occurred. BLM estimates there are approximately 100 horses remaining in the HMA following the gather. These remaining horses were observed ranging around two waterholes within the HMA. BLM will continue to monitor water sources within the HMA and continue to haul water into the HMA on an as needed basis until precipitation occurs.
