

Year 2011 Inventory Unit Number/Name: **Walker Butte East/OR-015-004B**

FORM 1

DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD

1. Is there existing BLM wilderness inventory information on all or part of this area?

No _____ (go to Form 2) Yes X (if more than one unit is within the area, list the names/numbers of those units.)

a) Inventory Source: U.S. Department of the Interior Bureau of Land Management Wilderness Inventory, Oregon and Washington: Final Intensive Inventory Decisions, November 1980. Pgs. 34-35.

b) Inventory Unit Name(s)/Number(s): **Walker Cabin/OR-1-4**

c) Map Name(s)/Number(s): **N/A**

d) BLM District(s)/Field Office(s): Lakeview District/Lakeview Resource Area

2. BLM Inventory Findings on Record

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory unit is associated with the area, list each unit/acreage and answer each question individually for each inventory unit):

Unit#/Name	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
BLM	34,080	NO	NO	NO	NO

Summarize any known primary reasons for prior inventory findings listed in this table):

The previous inventory concluded the unit did not appear to be in a generally natural condition where the works of man were substantially unnoticeable. The lakebed developments, ways, and 500 KV power lines on the eastern boundary had a significant impact in the area to a degree where the works of man were substantially noticeable from most places within the unit.

FORM 2

DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

Unit Number/Name: Walker Butte East/OR-015-004B

(1) Is the unit of sufficient size? Yes X No _____

Boundary Determination: In 2008, 2009, 2010, and 2011 the BLM conducted field inventory of the area to update its road and wilderness inventories. This field work included photo documentation of the boundary routes. Using BLM photos, field logs, and staff field knowledge, a BLM inter-disciplinary (ID) team completed an analysis of the motorized routes within the area in February of 2011.

On the west, the unit is bounded by Unnumbered Road #1. On the north, the unit is bounded by BLM 6171-CA (Walker Cabin Road). On the south, the unit is bounded by Unnumbered Route #3, and Unnumbered Route #2. On the east, the unit is bounded by the 500 KV BPA power line corridor. (See Map 2, road analysis forms, photos, and photo logs in the wilderness inventory file for additional supporting information regarding these boundary determinations).

Additional background on the process that the BLM ID team followed during this evaluation is contained in the document, *Wilderness Inventory Maintenance Process for the Lakeview Resource Area, BLM*, contained in the wilderness inventory file.

DESCRIPTION OF CURRENT CONDITIONS:

Inventory unit OR-015-004B is comprised of approximately 9,268 acres of BLM administered land and is located about 12 miles north of Christmas Valley, Oregon. The terrain is mostly rolling with small hills. Most of the unit is populated with moderate to dense juniper.

(2) Is the unit in a natural condition? Yes ____ No X

Primitive motorized routes exist within the unit totaling about 2.3 miles. Additionally, there is one water development located near the eastern boundary. On the east is the 500KV BPA power line corridor which forms approximately 5 miles of the eastern boundary and can be seen from one half mile away in some places, and from greater distances in others. A 326 acre private inholding exists near the western boundary (See Map 2a).

The density of human disturbances within the unit as a whole is low. The water developments, related ways, and undeveloped private inholding within the unit would be relatively unnoticeable to the average visitor. However, the 500 KV BPA power lines to the east is a major outside impact and significantly detracts from the overall apparent naturalness of the unit as a whole.

For the reasons specified above and based on a review of all of the available information including BLM photos, staff knowledge, and field review, the ID team concluded that due to the major outside impact of the power lines, the unit is not in a natural condition primarily affected by the forces of nature.

(3) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for solitude?** Yes _____ No _____ N/A ___X___

Opportunities for solitude were not evaluated because the unit failed to meet the naturalness criteria.

(4) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for primitive and unconfined recreation?**
Yes _____ No _____ N/A ___X___

Opportunities for primitive and unconfined recreation were not evaluated because the unit failed to meet the naturalness criteria.

(5) Does the unit have supplemental values? Yes _____ No _____ Unknown ___X___

Supplemental values were not evaluated because the unit failed to meet wilderness criteria.

Summary of Findings and Conclusion

Unit Name and Number: **Walker Butte East/OR-015-004B**

Summary Results of Analysis:

- 1. Does the area meet the size requirements? X Yes ___ No
- 2. Does the area appear to be natural? ___ Yes X No
- 3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? ___ Yes ___ No X N/A
- 4. Does the area have supplemental values? ___ Yes ___ No X N/A

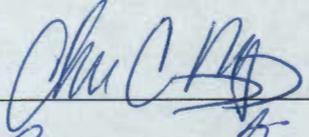

Conclusion (Check One):

 The area- or a portion of the area- has wilderness character:
(items 1, 2 and 3 must be checked “yes”).

 X **The area does not have wilderness character:** *(any of items 1, 2 and 3 are checked “no”).*

This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-2.

FORM 1

DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD

1. Is there existing BLM wilderness inventory information on all or part of this area?

No _____ (go to Form 2) Yes X (if more than one unit is within the area, list the names/numbers of those units.)

a) Inventory Source: U.S. Department of the Interior Bureau of Land Management Wilderness Inventory, Oregon and Washington: Final Intensive Inventory Decisions, November 1980. Pgs. 34-35.

b) Inventory Unit Name(s)/Number(s): **Walker Cabin/OR-1-4**

c) Map Name(s)/Number(s): **N/A**

d) BLM District(s)/Field Office(s): Lakeview District/Lakeview Resource Area

2. BLM Inventory Findings on Record

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory unit is associated with the area, list each unit/acreage and answer each question individually for each inventory unit):

Unit#/Name	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
BLM	34,080	NO	NO	NO	NO

Summarize any known primary reasons for prior inventory findings listed in this table):

The previous inventory concluded the unit did not appear to be in a generally natural condition where the works of man were substantially unnoticeable. The lakebed developments, ways, and 500 KV power lines had a significant impact in the area to a degree where the works of man were substantially noticeable from most places within the unit.

FORM 2

DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

Unit Number/Name: Walker Butte North/OR-015-004A

(1) Is the unit of sufficient size? Yes X No _____

Boundary Determination: In 2008, 2009, 2010, and 2011 the BLM conducted field inventory of the area to update its road and wilderness inventories. This field work included photo documentation of the boundary routes. Using BLM photos, field logs, and staff field knowledge, a BLM inter-disciplinary (ID) team completed an analysis of the motorized routes within the area in February of 2011.

On the west, the unit is bounded by a combination of Lake County Road 5-12D (Millican Road) and a 640 acre private inholding. On the south the unit is bounded by a combination of a private inholding and BLM 6171-CA (Walker Cabin Road). On the north, the unit is bounded by BLM 6171-00 (North Boundary Road), and Unnumbered Route #5. On the west, the unit is bounded by the BPA power lines. (See Map 2, road analysis forms, photos, and photo logs in the wilderness inventory file for additional supporting information regarding these boundary determinations).

Additional background on the process that the BLM ID team followed during this evaluation is contained in the document, *Wilderness Inventory Maintenance Process for the Lakeview Resource Area, BLM*, contained in the wilderness inventory file.

DESCRIPTION OF CURRENT CONDITIONS:

Inventory unit OR-015-004A is comprised of approximately 9,344 acres of BLM administered land and is located about 12 miles north of Christmas Valley, Oregon. The terrain is mostly rolling with small hills near Walker Butte. Most of the unit is populated with moderate to dense juniper. The center of the unit contains three fairly large ephemeral lakes.

(2) Is the unit in a natural condition? Yes _____ No X

Primitive motorized routes exist within the unit totaling about 6.5 miles. Additionally, there are 3 waterholes and one reservoir located in the northern half of the unit which are accessed by the primitive motorized routes that run generally through the center of the unit from north to south. On the east is the 500KV BPA power line corridor which can be seen from one half mile away in some places, and from greater distances in others. The private inholding contains numerous water derricks and a very large storage tank which can be observed from the southwestern quarter of the unit.

The density of human disturbances within the unit as a whole is high. The water developments and related ways exist within the core of the unit and would be easily noticeable to the average visitor. The BPA power lines to the east and developments on private lands to the south are

major outside impacts and significantly detract from the overall apparent naturalness of the unit as a whole.

For the reasons specified above and based on a review of all of the available information including BLM photos, staff knowledge, and field review, the ID team concluded that due to the density of man-made disturbances (internal and external), the unit is not in a natural condition primarily effected by the forces of nature.

(3) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for solitude?** Yes _____ No _____ N/A ___X___

Opportunities for solitude were not evaluated because the unit failed to meet the naturalness criteria.

(4) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for primitive and unconfined recreation?**
Yes _____ No _____ N/A ___X___

Opportunities for primitive and unconfined recreation were not evaluated because the unit failed to meet the naturalness criteria.

(5) Does the unit have supplemental values? Yes _____ No _____ Unknown ___X___

Supplemental values were not evaluated because the unit failed to meet wilderness criteria.

Summary of Findings and Conclusion

Unit Name and Number: **Walker Butte North/OR-015-004A**

Summary Results of Analysis:

- 1. Does the area meet the size requirements? **X** Yes ___ No
- 2. Does the area appear to be natural? ___ Yes **X** No
- 3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? ___ Yes ___ No **X** N/A
- 4. Does the area have supplemental values? ___ Yes ___ No **X** N/A

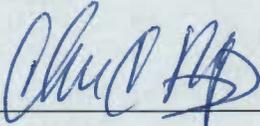

Conclusion (Check One):

 The area- or a portion of the area- has wilderness character:
(items 1, 2 and 3 must be checked "yes").

X **The area does not have wilderness character:** *(any of items 1, 2 and 3 are checked "no").*

Unit#/Name	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
BLM	34,080	NO	NO	NO	NO

Summarize any known primary reasons for prior inventory findings listed in this table):

The previous inventory concluded the unit did not appear to be in a generally natural condition where the works of man were substantially unnoticeable. The lakebed developments, ways, and 500 KV power lines on the eastern boundary had a significant impact in the area to a degree where the works of man were substantially noticeable from most places within the unit.

FORM 2

DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

Unit Number/Name: Walker Butte Southwest/OR-015-004C

(1) Is the unit of sufficient size? Yes X No _____

Boundary Determination: In 2008, 2009, 2010, and 2011 the BLM conducted field inventory of the area to update its road and wilderness inventories. This field work included photo documentation of the boundary routes. Using BLM photos, field logs, and staff field knowledge, a BLM inter-disciplinary (ID) team completed an analysis of the motorized routes within the area in February of 2011.

On the west, the unit is bounded by Lake County Road 5-12D (Millican Road). On the north, the unit is bounded by a combination of BLM 6171-CA (Walker Cabin Road) and private land. On the south, the unit is bounded by private lands. On the east, the unit is bounded by Unnumbered Route #1. (See Map 2, road analysis forms, photos, and photo logs in the wilderness inventory file for additional supporting information regarding these boundary determinations).

Additional background on the process that the BLM ID team followed during this evaluation is contained in the document, *Wilderness Inventory Maintenance Process for the Lakeview Resource Area, BLM*, contained in the wilderness inventory file.

DESCRIPTION OF CURRENT CONDITIONS:

Inventory unit OR-015-004C is comprised of approximately 6,970 acres of BLM administered land and is located about 12 miles north of Christmas Valley, Oregon. The terrain is mostly rolling with small hills in the north of the unit which tapers to sage flats in the south.

(2) Is the unit in a natural condition? Yes X No _____

Primitive motorized routes exist within the unit totaling about 3.4 miles, most of which lies in the north of the unit with an additional 0.3 miles of reclaiming routes, also located in the north. There is also 3.0 miles of pasture division fence in the unit which runs generally east-west through the center of the unit. Approximately 230 acres of private land forms a peninsula that partially forms the northern unit boundary (See Map 2a).

The density of human disturbances within the unit as a whole is moderate. However, the listed disturbances are all considered to be minor impacts and would be substantially unnoticeable to the average visitor moving through the unit.

For the reasons specified above and based on a review of all of the available information including BLM photos, staff knowledge, and field review, the ID team concluded that the unit appears to be in a natural condition primarily affected by the forces of nature.

(3) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for solitude?** Yes _____ No X N/A _____

Unit OR-015-004C has a long narrow shape which measures approximately 2 miles by 6.5 miles and is comprised of low rolling hills in the north which taper to sagebrush flats toward the south and generally has a predominantly south facing slope. The vegetation varies from medium density juniper in the north half of the unit; to sparse sagebrush in the southern half (see Map 3).

Agricultural land is located to the immediate south of the unit. Activities associated with agricultural development dominate the southern view from most of the unit while noise from machinery is pervasive and can be observed from the southern half of the unit.

The density of juniper in the north allows for pockets of good vegetative screening where one could avoid the presence of others. However, the shape of the north portion of the unit where this screening exists narrows to an area of approximately 2,000 acres. In the southern half of the unit, the lack of tall vegetative screening and absence of topographic screening, provide no opportunity to find solitude or avoid the presence of others within the unit.

For the reasons specified above and based on a review of all of the available information including BLM photos, staff knowledge, and field review, the ID team concluded that although some vegetative screening exists in in the northern half of the unit, it is limited to a relatively small area due to the narrow shape of the unit, and as whole, the unit does not present any outstanding opportunities for solitude.

(4) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for primitive and unconfined recreation?**

Yes _____ No X N/A X

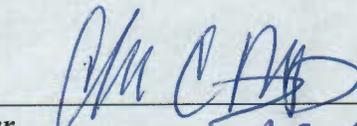

The previous inventory in 1978 listed numerous primitive and unconfined recreation opportunities. They were as follows; photography, wildlife observation, and hunting. These opportunities for primitive and unconfined recreation still exist today. However, based on a review of all of the available information including BLM photos, staff knowledge, and field review, the ID team concluded that none of these opportunities are outstanding.

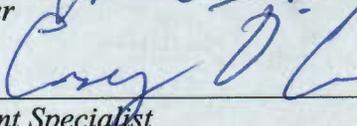

(5) Does the unit have supplemental values? Yes _____ No _____ Unknown X

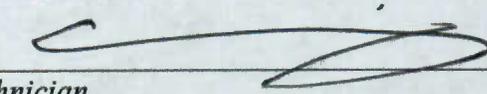

Supplemental values were not evaluated because the unit failed to meet wilderness criteria.

Year: 2011

Inventory Unit Number/Name:

Walker Butte Area Units<5,000 Acres

FORM 1

DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD

1. Is there existing BLM wilderness inventory information on all or part of this area?

No _____ (go to Form 2) Yes X (if more than one unit is within the area, list the names/numbers of those units.)

a) Inventory Source: U.S. Department of the Interior Bureau of Land Management Wilderness Inventory, Oregon and Washington: Final Intensive Inventory Decisions, November 1980. Pgs. 34-35.

b) Inventory Unit Name(s)/Number(s): Walker Cabin/OR-1-4

c) Map Name(s)/Number(s): N/A

d) BLM District(s)/Field Office(s): Lakeview District/Lakeview Resource Area

2. BLM Inventory Findings on Record

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory unit is associated with the area, list each unit/acreage and answer each question individually for each inventory unit):

Unit # OR-1-4 (Walker Cabin)	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
BLM	34,080	NO	NO	NO	NO

Summarize any known primary reasons for prior inventory findings listed in this table:

Two of these units were part of inventory unit OR-1-4 (Walker Cabin) which was evaluated in 1980 and was deemed to be not in a natural condition, primarily affected by the forces of nature. (See Map 4)

FORM 2

DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

a. Unit Number/Name: Walker Butte Area Units<5,000 Acres

(1) Is the unit of sufficient size? Yes _____ No X

Boundary Determination: In 2008, 2009, 2010, and 2011 the BLM conducted field inventory of the area to update its road and wilderness inventories. This field work included photo documentation of the boundary routes. Using BLM photos, field logs, and staff field knowledge, a BLM inter-disciplinary (ID) team completed an analysis of the motorized routes within the area in February 2011.

On the north, the units are bounded by a combination of private lands and BLM 6171-00 (North Boundary Road). On the west, the units are bounded by a combination of private lands, Squaw Ridge Lava Bed WSA, and the Deschutes National Forest. On the east, the units are bounded by the 500KV BPA power lines. On the south the units are bounded by a combination of private lands and Lake County Road 5-12D (Millican Road). (See Map 2, route analysis forms, photos, and photo logs in the wilderness inventory file for additional supporting information regarding these boundary determinations).

As a result, there are a total of 20 inventory units within the Walker Butte Area. Three of these inventory units met the minimum size criteria and have been evaluated separately, leaving the remaining 17 units less than 5,000 acres. The average size of these 17 units is 1,856 acres. They range in size from 3 acres to 4,213 acres and do not meet any exception to the size requirement.

Additional background on the process that the BLM ID team followed during this evaluation is contained in document, *Wilderness Inventory Maintenance Process for the Lakeview Resource Area, BLM*, which is contained in the wilderness inventory file.

DESCRIPTION OF CURRENT CONDITIONS:

The 17 unnumbered inventory units in the Walker Butte are comprised of approximately 31,567 acres of BLM administered land located approximately 12 miles north of Christmas Valley, Oregon. The terrain consists mostly of low rolling which are populated primarily by juniper and small desert shrubs. Major human activities in the area include hunting, ranching, and OHV recreation.

(2) Is the unit in a natural condition? Yes ___ No _____ N/A X

The current natural condition of these units was not evaluated because the units failed to meet the minimum size requirement.

(3) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for solitude?** Yes _____ No _____ N/A X

The current opportunities for solitude within these units were not evaluated because the units failed to meet the minimum size requirement.

(4) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for primitive and unconfined recreation?**

Yes _____ No _____ N/A X

The current opportunities for recreation within these units were not evaluated because the units failed to meet the minimum size requirement.

(5) Does the unit have supplemental values? Yes _____ No _____ N/A X

Supplemental value was not evaluated within these units because the units failed to meet the wilderness criteria.

Summary of Findings and Conclusion

Unit Name and Number: Walker Butte Units<5,000 Acres

Summary Results of Analysis:

1. Does the area meet the size requirements? ___Yes X No
2. Does the area appear to be natural? ___Yes ___No X N/A
3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? ___Yes ___No X N/A
4. Does the area have supplemental values? ___Yes ___No X N/A

Conclusion (Check One):

 The area- or a portion of the area- has wilderness character:
(items 1, 2 and 3 must be checked "yes").

X **The area does not have wilderness character:** (any of items 1, 2 and 3 are checked "no").
