Hello Trish,

I was reading through the Daily Courier the other day and came across the article about the BLM proposed trail system for mountain bikes in the Tin Pan Peak area and the 10 car parking lot. I was wondering if there will be any civil engineering needed for this should it be approved? If so, we would be highly interested in this project. We have done several projects similar to this one and we have also worked with BLM and Oregon Department of Forestry in the past.

Please let me know what services you anticipate for this, and if need be, I can send you a Statement of Qualifications.

I look forward to hearing from you,

Please make sure to prepare the proposed Rogue Trail Project trails to allow horseback riding as well as hiking and biking. We have a very active equestrian community and need safe trails.

Thank you,

As a responsible horse owner and avid trail rider, I am asking that the new trail system being developed also include access for horseback riding. It is my understanding that at this time, the trail is being developed only for mountain bikers. In recent years, due to private development and other factors, much of the land that used to be available to horsemen is disappearing. Many of us were born here; others moved here; all of us anticipated being able to share the beauty of our forests, valleys, and waterways. Most of us who access these treasures also are mindful of our duty to protect and sustain this natural beauty. To this end, many equine clubs have regularly scheduled trail maintenance activities via volunteers from the various groups. To my knowledge, we also have a history of a successful co-existence with mountain bikers, and hikers, on the current trail systems. I ask that there be consideration for our very active horse community, who continue to work diligently to maintain the living and recreational value of our forest lands. Please give us a voice to help determine the use parameters of this new trail system.

It has just come to our attention that you are building a rail system on BLM lands southeast of the town of Rogue River. This trail would be limited to mountain biking and hiking. We are equestrians who live off Foothill Blvd and want horseback riding included in the Mountain of the Rogue Trail Project. For years we have tried to locate trails in the Rogue watershed. As you know, Cathedral Hills is a multi use trail area and this is an excellent opportunity to expand equestrian multi use trails on the East side of the Valley.

Please create trails that are truly multi-use for biking, hiking and riding.

Attn: Trish Lindaman

I've been made aware that plans are being developed for an extension to the trail system near Rogue River that doesn't allow for horseback riding as well as other uses. In the interest of efficiency and fairness, all non-motorized users should be allowed access in my view. Please consider making allowance for those of us who wish to ride horses.

Regarding: Mountain of the Rogue Trail

I am interested in this project and possibly in being a participant.

Please arrange for me to receive future mailings and project information.

I am writing to offer support for the Mountain of the Rogue Trail Project. I am very excited about the proposed plan and commend the forward thinking of mtb specific trails, especially a DH flow style trail.

Sincerely

Dear Trish and Nick,

I would like to express my interest in having the proposed Mountain of Rogue trail system be made available for use by horse and rider.

I live is Rogue River and ride my two horses nearly every weekend year round. I would be a frequent user of this trail and plead with you to consider horse access to all or part of the trail system.

Sincerely

[REDACTED]
Rogue River, OR
