**Linear Disturbance:** The term is used to define a trail/route/way which has been identified as being inconsistent with management objectives (i.e. route leads to private, vertical hill climb, primarily route is in a riparian area).

- ❖ Trail Closure Status 2007 to present: (BLM began maintenance of these trails in 2007). Most up to date information on route closures and plans for closure.
- Proposed for Future closure/decom: Identified for future closure or decommissioning.
- Status Closed/decom: Identifies a trail/ route/ way that has been closed or decommissioned.

**Trail Type:** Defines routes identified through GPS data inventory that are used by OHV's.

- Class 1; Class 3: Indicates a trail used by a Class 1 OHV (quad) or a Class 3 (dirt-bike).
- Class 2: Indicates a trail used by a Class 2 OHV (jeep/4x4), usually a natural surface/narrow road.
- Existing Uninventoried Class 3: Identifies a route that was not inventoried in the original data collection (pre 2003).

**Roads Layer:** This data layer contains BLM, county, city, state, and private roads.

- BLM Roads: Roads managed by BLM
- Municipal Roads: Roads managed by city government.
- Unknown Roads: no road condition data exists.
- Private: Roads on or managed by private owner.
- Prvt Rd proposed for OHV Access: Identifies a road where OHV access would be permitted on private land, given land owner permission has been granted or an exclusive easement is held by BLM.
- Closed to OHV: Identifies a road managed by BLM within BLM land boundaries, where OHV access would not be permitted.

**Ownership:** Identifies the ownership of the individual forest management properties, City lands, BLM managed lands, and private lands.
