

Construction Update
LOWER DESCHUTES ROAD RESURFACING

June 18, 2012

The Lower Deschutes River Road Resurfacing project is back in action this week. Beginning Wednesday **(6/20)** the contractor will resume construction work on the BLM River Access Road between Bakeoven and Hwy 212. The work entails placing a chip seal on the existing surface to extend the lifespan of the roadway. There will be increased truck traffic and construction equipment in the road. There may be loose rock on the surface so please drive cautiously. Pilot cars will lead public traffic through the work

zone. Expect up to 30 minute delays. The current plan is to finish up all construction work by Friday morning **(6/22)**.
