

ATTENTION

**The Prineville BLM will be removing mercury-contaminated soil from the public land on Barnes Butte from:
June 8—June 22, 2015.**

The high level of mercury in this area is the result of mining operations conducted in the 1940s. BLM has contracted with NRC Environmental Services to safely dig up and remove contaminated soil to a disposal site near Arlington, Oregon.

For more information, call (541) 416-6700
