Log scaling may be required under the terms of this contract.

NOTES:

1. A revised Special Provision has been added to the contract which enables the Contracting Officer to suspend the contract to facilitate protection of certain plant or animal species, and /or to modify or terminate the contract when necessary to: (1) Comply with the Endangered Species Act, or; (2) Comply with a court order, or; (3) Protect species which were identified for protection through survey and manage and/or protection buffer standards and guidelines established in the ROD and RMP.

This contract provision limits the liability of the Government to the actual costs incurred by the Purchaser which have not been amortized by timber removed from the contract area.

- 2. The BLM has revised the log export restrictions special provision to reduce the log branding and painting requirements. The new requirements include branding of one end of all logs with a scaling diameter of over 10 inches. All loads of 11 logs or more, regardless of the diameter of the logs, will have a minimum of 10 logs branded on one end. All logs will be branded on loads of 10 logs or less. One end of all branded logs will be marked with yellow paint. At the discretion of the Contracting Officer, the Purchaser may be required to brand and paint all logs. The purchaser shall bear any increased costs for log branding and painting.
- 3. Seasonal restrictions <u>and</u> daily operating restrictions (DOR) on operations apply (see attached Seasonal Restriction Matrix and Exhibit E).

Marbled Murrelet seasonal restrictions and daily operating restrictions will be applied in Harvest Area 1. Marbled Murrelet daily operating restrictions (DOR) will be applied in Harvest Area 4.

Protection of Marbled Murrelet habitat located within the timber sale contract area is required. Protection measures include no cutting or removal of timber within the designated Marbled Murrelet habitat area, unless approved by the Authorized Officer. A pre-work conference will be scheduled to discuss protection measures and the seasonal and daily operating restrictions.

4. Cable yarding in Harvest Areas 1 and 2 may require the use of lift trees and/or intermediate support trees.

- 5. To prevent the introduction of noxious weeds to the Contract Area, all logging, road building and subsoiling equipment, except log trucks, must be steam cleaned or pressure washed prior to initial movein or upon return to the sale area if used elsewhere.
- 6. License Agreements with Lone Rock Timber Co., Seneca Jones Timber Co. and Weyerhauser Co. are required.
- 7. Yarding of log lengths greater than forty-two (42) feet will not be permitted.
- 8. Directional falling away from or parallel to property lines, unit boundaries, roads, retention trees and snags will be required. Directional falling away from or parallel to reserve areas and riparian buffers will be required for all trees cut within 100 feet of these areas.
- 9. A harvester/forwarder system, tractor, rubber-tired skidder, or track-mounted log loader may be used in the areas designated for ground-based yarding. Ground-based yarding is generally permitted between July 15 and October 15. Minor and incidental ground-based yarding may be permitted in limited portions of the cable yarding areas; ground-based yarding seasonal restrictions apply, and the locations involved and equipment used must be approved by the Authorized Officer.
- 10. Unsurfaced roads used for more than a single season or which must over-winter prior to decommissioning will be winterized in accordance with Exhibit C.
- 11. This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. - 12. This contract contains provisions for subsoiling approximately 0.5 miles spur roads and 1.0 miles of compacted skid trails and landings (see attached Exhibit F).
- 13. In the cable yarding areas, a skyline logging system with lateral yarding and multi-span capability will be required. One-end suspension of logs will be required. - Upon completion of logging operations Road 26-7-31.1 Segment D, 27-7-5.1 Segment B(Por), and 26-7-32.2 Segment B shall be water-barred, blocked, and straw mulched and Road 26-7-31.1 Segment E shall be water-barred, blocked, and mulched with logging slash. A map showing the location of these sample trees is available at the Roseburg District Office.

The volume of all other species and R/W trees has been determined by individual tree measurements using a 100% cruise.

With respect to merchantable trees of all species: the average tree is 13.9" D.B.H.O.B., the average log contains 50 bd. ft., the total gross volume is approximately 2,092 M bd. ft., and 95% recovery is expected.

<u>ROAD CONSTRUCTION</u>: Estimates include the following: construct 49+50 stations. Additional information is available in Exhibit C of the Timber Sale Contract.

<u>DURATION OF CONTRACT</u> will be 36 months for cutting and removal of timber. The contract will contain SPECIAL PROVISIONS regarding: logging, environmental protection, road construction, road use, road maintenance, fire protection, slash disposal, and log exporting. Log scaling may be required under the terms of this contract.

NOTES:

 A revised Special Provision has been added to the contract which enables the Contracting Officer to suspend the contract to facilitate protection of certain plant or animal species, and /or to modify or terminate the contract when necessary to: (1) Comply with the Endangered Species Act, or; (2) Comply with a court order, or; (3) Protect species which were identified for protection through survey and manage and/or protection buffer standards and guidelines established in the ROD and RMP.

This contract provision limits the liability of the Government to the actual costs incurred by the Purchaser which have not been amortized by timber removed from the contract area.

- 2. The BLM has revised the log export restrictions special provision to reduce the log branding and painting requirements. The new requirements include branding of one end of all logs with a scaling diameter of over 10 inches. All loads of 11 logs or more, regardless of the diameter of the logs, will have a minimum of 10 logs branded on one end. All logs will be branded on loads of 10 logs or less. One end of all branded logs will be marked with yellow paint. At the discretion of the Contracting Officer, the Purchaser may be required to brand and paint all logs. The purchaser shall bear any increased costs for log branding and painting.
- 3. This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. These provisions include: (1) The designation and sale of additional timber, such as corridor and guyline trees, at contract price, as necessary to facilitate safe and efficient logging. Such trees may be felled and removed when they are painted by the Authorized Officer; (2) Sale of additional timber volume at current fair market value where the species and/or size of trees are not representative of the forest stand(s) being thinned; (3) Government reservation of trees previously marked for cutting (replacement) when the Authorized Officer determines that it is necessary in order to maintain stand densities consistent with objectives set forth in management prescriptions; (4) The use of unilateral modifications executed by BLM for such additional and replacement timber; (5) Revocation of the Purchaser's right to cut additional timber if the Authorized Officer determines that trees have been cut and

removed that were not previously marked and approved for cutting and removal by the Authorized Officer; and, (6.) It is estimated that approximately 99 MBF of such additional timber may be removed under the contract, but is not included in the advertised sale volume nor was it included in the timber sale appraisal. This estimate is a net figure reduced by the estimate of the volume of trees previously marked for cutting, which the Authorized Officer may elect to reserve.

- 4. The following seasonal operating restrictions apply to this sale.
 - a. No road construction shall be conducted between October 15 of one calendar year and May 15 of the following calendar year, both days inclusive.
 - b. No timber falling, bucking or yarding shall be conducted on the Contract Area from April 15 to July 15 of each calendar year, both days inclusive, due to bark slip.
 - c. No timber yarding shall be conducted on those Harvest Areas designated for ground based yarding or accessed by unsurfaced roads from October 15 of one calendar year to July 15 of the following calendar year, both days inclusive.

In addition, daily operating restrictions will be in effect from August 6 to September 15, both days inclusive, of each calendar year. During this period, all operations shall be scheduled from two hours after sunrise to two hours before sunset. Refer to Exhibit "E" and the seasonal restriction matrix for details.
- 5. Harvest Areas No. 1(portion), No. 2 (portion), No. 4, and No. 6 are available as winter logging opportunities and may proceed after October 15th and continue until April 15st (onset of barkslip), or April 1st (onset of marbled murrelet restrictions). Refer to attached Exhibit E and Seasonal Restriction Matrix for unit specifics.
- 6. Spurs No. 1 and No. 3, and Road No. 28-8-21.1 Segments B, C, and D are to be decommissioned in the same operating season in which they are used for harvest activity. The Purchaser is required to perform decommissioning operations. Decommissioning operations will include water-barring and road blocking. In addition to water-barring and blocking, the Purchaser will be responsible for covering Spurs No. 1 and No. 3 with logging slash to the satisfaction of the Authorized Officer.
- 7. Cable yarding shall be done with a skyline yarding system capable of maintaining one-end suspension of logs, and equipped with a mechanical slack pulling carriage with a minimum of one hundred (100) feet of lateral yarding capability. Yarding corridors will be limited to a maximum width of twenty (20) feet. Spar height cannot exceed forty (40) feet with a maximum power rating of 225 HP.
- 8. Cable yarding of all Harvest Areas may require the use of lift trees and/or intermediate support trees.
- 9. A harvester/forwarder system, tractor, rubber-tired skidder, or track-mounted log loader may be used in the areas designated for ground-based yarding. Minor and incidental ground-based yarding may be permitted in limited portions of the cable yarding areas; ground-based yarding seasonal restrictions apply, and the locations involved and equipment used must be approved by the Authorized Officer.
- 10. In all Harvest Areas, all trees designated for cutting shall be felled, topped, limbed and cut in log lengths not to exceed forty-two (42) feet prior to being yarded, unless a harvester/forwarder system is used. If a harvester/forwarder system is used, all trees designated for cutting shall be felled, topped, limbed, and cut into log lengths not to exceed twenty-one (21) feet before being yarded.

- 11. To minimize the likelihood of spreading Port-Orford-cedar root disease or introducing noxious weeds to the Contract Area, all logging and road building equipment, except log trucks, must be steam cleaned or pressure washed prior to initial move-in or upon return to the sale area if used elsewhere.
- 12. In the event administrative check scaling is requested by the BLM, the Purchaser must obtain a safe location, to be approved by the Authorized Officer, where logs can be unloaded, rolled out and scaled in accordance with Eastside Scribner Decimal C Rules by BLM scalers or independent scalers contracted to the BLM. The purchase price of the contract shall be reduced accordingly as compensation for delays in log transportation time.
- 13. Harvest acres shown on Exhibit A are net acres after roads interior to Harvest Area boundaries have been deleted from acreage calculations.
- 14. A License Agreement with Plum Creek Timberlands, L.P. is required (see Exhibit D).
- 15. Right of Way timber on road No. 28-8-21.1 Segment D has been appraised at a value of One Thousand Two Hundred Nineteen and 96/100 dollars (\$1,219.96). The appraised price shall be valid through 9/30/2012 and will be required to be paid to Seneca Jones Timber Company. If payment isn't made by the above date, Seneca Jones Timber Company may choose to re-negotiate the price.
