Wolf Creek Falls Trail Closure Extended Through Summer

Roseburg, Ore. – The Bureau of Land Management, Roseburg District, will be extending a closure of the Wolf Creek Falls Trail due to scheduled replacement of a bridge damaged earlier this year.

The Wolf Creek Falls Trailhead is accessed from Little River Road and is located at:

T. 27S, R. 02W, Section 9.

The bridge was damaged by a falling tree and was removed earlier this spring. A new bridge is scheduled to be installed in late summer or early fall of 2016.

“At this time there is no public access to the Wolf Creek Falls and the BLM would encourage the public to stay away from the location until the new bridge can be installed,” said Erik Taylor, Supervisory Outdoor Recreation Planner for the Roseburg District. “We are working to get the new bridge in as soon as planning and construction schedules will allow.”

For further information or questions about the closure, please contact Cheyne Rossbach, Public Affairs Specialist at (541) 579-0648.

The BLM manages more than 245 million acres of public land, the most of any Federal agency. This land, known as the National System of Public Lands, is primarily located in 12 Western states, including Alaska. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. The BLM's mission is to manage and conserve the public lands for the use and enjoyment of present and future generations under our mandate of multiple-use and sustained yield. In Fiscal Year 2014, the BLM generated \$5.2 billion in receipts from public lands.
