CRUISE INFORMATION:

For Harvest Area 1 and all rights-of-ways: The Douglas-fir up to 22 inches D.B.H.O.B. have been cruised using the 3P system to select sample trees. The sample trees have been cruised and their volume computed on form class tables for estimating volume in 16-foot lengths. This volume is then expanded to a total sale volume. A map showing the location of these sample trees is available at the Roseburg District Office. The volume of Douglas-fir 22 inches D.B.H.O.B. and larger, Western Hemlock, and Western Redcedar have been determined by individual tree measurements using a 100% cruise.

For Harvest Areas 2, 3, 4, 5 and 6: The timber volumes for all tree species are based on a variable plot cruise, containing a total of 262 plots and 221 randomly selected sample trees. Plots were measured using a 20 basal area factor (BAF). The volume of the randomly selected sample trees has been expanded to a total sale volume. A map showing the location of the plots and sample trees is available at the Roseburg District Office.

With respect to merchantable trees of all species: the average tree is 12.3 in. D.B.H.O.B., the average log contains 41 bd. ft., the total gross volume is approximately 4,098 M bd. ft., and 94% recovery is expected.

CUTTING AREA: An area of approximately 305 acres is to be thinned and rights-of-way totaling approximately 2 acres must be clearcut.

TIMBER ACREAGE:

Area 1: 23 acres	Area 4: 165 acres	R/W: 2 acres
Area 2: 34 acres	Area 5: 5 acres	
Area 3: 24 acres	Area 6: 54 acres

ADDITIONAL INFORMATION: This prospectus includes maps and tables that cannot be made Section 508 compliant. For help with its data or information, please contact the Roseburg District Office at 541-440-4930.

NOTES:

1. A revised Special Provision has been added to the contract which enables the Contracting Officer to suspend the contract to facilitate protection of certain plant or animal species, and /or to modify or terminate the contract when necessary to: (1) Comply with the Endangered Species Act, or; (2) Comply with a court order, or; (3) Protect species which were identified for protection through survey and manage and/or protection buffer standards and guidelines established in the ROD and RMP.

This contract provision limits the liability of the Government to the actual costs incurred by the Purchaser which have not been amortized by timber removed from the contract area.
2. Seasonal restrictions on operations apply to this sale regarding road work, falling, bucking, yarding, loading, and hauling. Refer to Sections 42(A)(6)(b), 42(A)(10-12), 42(D)(2), and Exhibit E for details. A "seasonal restriction matrix" is included with this prospectus to serve as a guide in planning and scheduling operations for each harvest unit.
3. A license agreement with Lone Rock Timber Co. is required. The terms and conditions of the license agreement is available for inspection at the Roseburg District Office.
4. This contract contains provisions for the sale and removal of additional timber necessary to facilitate safe and efficient Purchaser operations. It is estimated that approximately 192 MBF of such additional timber would be removed under the contract, but is not included in the advertised sale volume.
5. Slash disposal requirements consist of the following: machine piling, covering and burning slash and debris within a fifty (50) foot radius of landings (approximately 125 landings); and hand piling, covering, and burning slash and debris within fifty (50) feet of designated roads in Harvest Areas 1, 4 and 6, as shown on Exhibit F. The Purchaser will have the option to assist in burning or to make a contribution to the Bureau of Land Management in lieu thereof. Refer to Sections 42(F) and 42(G) for details.
6. Boundaries of Harvest Areas 1, 2, 3, 4, 5 and 6 are posted, blazed and painted orange. Reserve trees in all harvest areas are marked with yellow paint. Clearing limits on the Spur 4 road right-of-way outside of units are posted, blazed and painted with yellow blazes. Refer to section 41 for details regarding timber reserved from cutting.
7. Optional Spur A or optional Spur B may be constructed as shown on Exhibit A at the Purchaser's expense in order to facilitate logging operations. These spurs may only be constructed between May 15 and October 15 of any given calendar year. Aggregate surfacing may be applied at the Purchaser's expense to provide wet season access for cable yarding. If constructed, the Purchaser would be responsible for decommissioning, as directed by the Authorized Officer. In order to construct optional Spur A or optional Spur B, a logging plan must be approved and the contract modified by the Authorized Officer.
8. As appraised, approximately 41% (125 acres) of the sale area is available for wet season operations, including portions of Harvest Areas 1 (14 acres), 2 (5 acres), 3 (12 acres), 4 (44 acres) and 6 (50 acres). Wet season operations may be maximized at the Purchaser's expense by:
 - Cable yarding portions of Harvest Area 6 to the existing rocked road, instead of ground-based yarding (approximately 4 additional acres);
 - Adding rock to Spur 1 in Harvest Area 1 as necessary for wet season cable yarding, instead of dry season cable yarding (approximately 9 acres);
 - Adding rock to Optional Spur B in Harvest Area 4 as necessary for wet season cable yarding, instead of ground-based yarding (approximately 3 additional acres);
 - In order to maximize wet season operations, the Authorized Officer must approve the logging plan and a contract modification may be required.

Note: This matrix is intended to serve prospective purchasers as a guide only.

Seasonal restrictions are cross-hatched.

Refer to the contract Special Provisions for a full statement of the seasonal operating restrictions.
