

**Documentation of Land Use Plan Conformance and  
NEPA Adequacy (DNA) #OR134-07-DNA-010  
For Renewing Grazing Allotment # 3600555**

---

**Note:** The signed Conclusion at the end of this worksheet is part of an interim step in the BLMs internal analysis process and does not constitute an appealable decision.

**A. Spokane BLM District, Wenatchee Resource Area  
Lease/Serial/Case File No. 3600555**

**Proposed Action Title/Type:** Grazing Lease Renewal/Custodial Allotment

**Location of Proposed Action:** This allotment is located approximately 34 miles southeast of the town of Goldendale, in Klickitat County Washington. The allotment is part of the Klickitat County Scattered Tracts Management Area (See attached map). Legal Description of the lands is as follows:

<b>T4N R21E</b>	Sec 14: NE $\frac{1}{4}$ , E $\frac{1}{2}$ NW $\frac{1}{4}$ , SW $\frac{1}{4}$ Sec 24: S $\frac{1}{2}$ NE $\frac{1}{4}$ , N $\frac{1}{2}$ SE $\frac{1}{4}$ , N $\frac{1}{2}$ NE $\frac{1}{4}$
<b>T4N R22E</b>	Sec 12: SE $\frac{1}{4}$ Sec 14: S $\frac{1}{2}$ N $\frac{1}{2}$ , S $\frac{1}{2}$ Sec 20: SE $\frac{1}{4}$ Sec 24: NW $\frac{1}{4}$ NW $\frac{1}{4}$ , NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec 28: N $\frac{1}{2}$ , N $\frac{1}{2}$ SW $\frac{1}{4}$ , NW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec 32: NW $\frac{1}{4}$ NE $\frac{1}{4}$ , N $\frac{1}{2}$ NW $\frac{1}{4}$
<b>T4N R23E</b>	Sec 18: Lot 3, S $\frac{1}{2}$ S $\frac{1}{2}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ , NE $\frac{1}{4}$ SW $\frac{1}{4}$

**Description of the Proposed Action:** The proposed action is to address a grazing lease renewal for grazing allotment # 3600555 for a period of 10 years (3/2007-3/2017). This allotment is a "Custodial" allotment with 2170 acres of public land intermingled with 11,356 acres of private land owned by the lessee. The allotment was renewed in 2007 under provisions of Section 116 of Public Law 106-291, which provided for renewal based on allowed use being the same as the previous lease period, and also contingent on completion of environmental analysis.

The number of cattle and AUMS may be adjusted to an equivalent use, contingent on review and approval of the Interdisciplinary Team and the Field Manager.

**Applicant (if any):** XXXXXXXXXX.

**B. Conformance with the Land Use Plan (LUP) and Consistency with Related Subordinate Implementation Plans**

X The proposed action is in conformance with the applicable LUPs because it is specifically provided for in the following LUP decisions:

- Spokane District Resource Management Plan (RMP)/Final EIS (August 1985) and its Record of Decision (ROD)/Rangeland Program Summary (May 1987)
- Proposed Spokane RMP Plan Amendment/Final EIS (June 1992) and its ROD (December 1992)
  - The proposed action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decisions (objectives, terms, and conditions) and, if applicable, implementation plan decisions:

**C. Identify the applicable NEPA documents and other related documents that cover the proposed action.**

Spokane District Resource Management Plan (RMP)/Final EIS (August 1985)

Other documentation relevant to the Proposed Action:

- Washington Department of Fish and Wildlife Priority Habitats and Species - 1997 Databases
- Washington Natural Heritage - 1998 Database
- Washington Office of Archaeological and Historical Preservation - 2003 Database
- Spokane District 2003 Archaeological Survey Database and files.
- Environmental Assessment for Methow Valley Grazing Lease Okanogan County- 1993

**D. NEPA Adequacy Criteria**

**1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed?**

Yes, this grazing allotment is addressed in the Spokane RMP/ROD/RPS page 46 for use of 149 AUMs, and page 50 for the use of 146 AUM's for a total of 295 AUM's which is substantially the same as the proposed renewal. The Spokane RMP/FEIS (page 57) and its ROD/RPS (page 24) designated domestic livestock grazing as an appropriate use for BLM-administered lands completely surrounded by private lands being grazed. This complies with the principle of multiple use on a sustained yield basis in accordance with the Federal Land and Policy Management Act of 1976 (FLPMA). The Spokane RMP/FEIS, as adjusted or affirmed by the Spokane ROD/RPS, meets NEPA requirements for impact analysis. The environmental impacts of grazing for all alternatives are discussed in Chapter 4 (Environmental Consequences, pages 79-92) of the Spokane RMP/FEIS.

**2. Is the range of alternatives analyzed in the existing NEPA documents appropriate with respect to the current proposed action, given current environmental concerns, interests, resource values, and circumstances?**

The proposed action is within the range of alternatives identified and analyzed in the Spokane RMP/EIS (1985), in the Summary (pages v-viii, and including Table S-2, which summarizes long-term environmental consequences and compares alternative allocations). The range of alternatives is thought to appropriately reflect current environmental concerns, interests, and resource values.

**3. Is the existing analysis adequate and are the conclusions adequate in light of any new**

**information or circumstances? Can you reasonably conclude that all new information and all new circumstances are insignificant with regard to analysis of the proposed action?**

An interdisciplinary team conducted a review for any new information, studies, and analyses that would materially differ from earlier analysis in the RMP/FEIS. Included in these categories since the date of the ROD/RPS (1987), are the following:

Along with the provision in the LUP for monitoring of allotments and implementing changes to grazing use as mitigations to minimize impacts to other resource values, the existing analysis is still considered adequate. The new information is not significant regarding the proposed action.

**4. Do the methodology and analytical approach used in the existing NEPA documents continue to be appropriate for the current proposed action?**

The Spokane RMP/FEIS (page 57) and its ROD/RPS (page 24) designated domestic livestock grazing as an appropriate use for BLM-administered lands completely surrounded by private lands being grazed. This complies with the principle of multiple use on a sustained yield basis in accordance with the Federal Land and Policy Management Act of 1976 (FLPMA). The Spokane RMP/FEIS, as adjusted or affirmed by the Spokane ROD/RPS, meets NEPA requirements for impact analysis. The methodology and analyses used in the Spokane RMP/FEIS are still considered appropriate. In addition, all rangeland monitoring, studies, and survey methods used in the general area prior to and during the planning process continue to be accepted (or required) BLM methods and procedures.

**5. Are the direct and indirect impacts of the current proposed action substantially unchanged from those identified in the existing NEPA documents? Does the existing NEPA document sufficiently analyze site-specific impacts related to the current proposed action?**

The proposed action is consistent with the Spokane RMP/FEIS, as affirmed or adjusted by its ROD/RPS. The impacts of livestock grazing were analyzed in Chapter 4 - Environmental Consequences (pages 79-92) in the Spokane RMP/FEIS, and details of grazing were addressed in Appendix J (Grazing Systems). The number of AUMS and grazing use times are the same as were addressed in the Spokane RMP.

**6. Can you conclude without additional analysis or information that the cumulative impacts that would result from implementation of the current proposed action are substantially unchanged from those analyzed in the existing NEPA documents?**

Cumulative impacts are identical to, and within the parameters of, those identified and accepted for Allotment 3600555 grazing use, since the proposed action was specifically analyzed in the Spokane RMP/FEIS.

**7. Are the public involvement and interagency review associated with existing NEPA documents adequate for the current proposed action?**

The Spokane RMP/FEIS and its ROD (including the Rangeland Program Summary) were distributed to all interested publics and other government agencies for review. Since the subject grazing leases are identified

in the land use plan, which went through all of the appropriate and legally required public/agency review, public involvement is considered adequate.

The BLM issued consultation letters regarding the renewal of grazing lease #0555 on July 16, 2009. Letters were sent to the Washington State Department of Archaeology and Historic Preservation (DAHP), the Yakama Indian Nation, and the Umatilla Tribe. On July 22, 2009 the DAHP responded, concurring with the determination of no historic properties affected. BLM did not receive a response from either the Yakama Indian Nation or from the Umatilla Tribe.

No specific public involvement, or interested public status (under the grazing regulations at 43 CFR 4100.0-5), has been requested for these allotments, except from the grazing lessee who has been involved in all planning processes pertaining to this allotment.

**E. Interdisciplinary Analysis:** Team members conducting or participating in the preparation of this worksheet are identified on the cover sheet of this DNA.

**F. Mitigation Measures:** None

## **CONCLUSION**

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and that the existing NEPA documentation fully covers the proposed action and constitute BLM's compliance with the requirements of NEPA.

Note: If one or more of the criteria are not met, a conclusion of conformance and/or NEPA adequacy cannot be made and this box cannot be checked
