Instruction Memorandum No. OR-2007-053

Expires: 9/30/2008

To: District Managers: Burns, Lakeview, Prineville, Vale

From: State Director, Oregon/Washington

Subject: OR/ID/NV Cooperative Shrub-Steppe Restoration Partnership - Healthy Lands Initiative

**Purpose:** This Instruction Memorandum (IM) provides information and direction on the Oregon/Idaho/Nevada (OR/ID/NV) Cooperative Shrub-Steppe Restoration Partnership that is one of the six Healthy Lands Initiative (HLI) priority areas and the process for allocating HLI funds. The primary purposes of HLI are to enable Bureau of Land Management (BLM) to set land treatment priorities across a broader scale, mitigate impacts to an array of resources in ways not previously available and unite land management agencies, private landowners and other partners in an effort to protect, enhance and restore sagebrush habitats on a landscape scale. Approximately \$15 million dollars nationally and 1.9 million dollars for OR/ID/NV is anticipated to be available for Fiscal Year (FY) 2008.

**Policy/Action:** The guiding criteria and considerations for OR/ID/NV Cooperative Shrub-Steppe Restoration Partnership projects are:

1. Projects must focus on sagebrush and associated riparian habitats that support sage-grouse.
2. Primary goals are first protecting and enhancing existing sagebrush habitat followed by strategically restoring connectivity within occupied sage-grouse habitats.
3. Projects that address multiple habitat issues or augment previous habitat improvement projects to achieve a landscape effect will receive priority.
4. Projects within the focus area must have affiliated partners.
5. Projects containing short-term, quantifiable objectives that serve as benchmarks for judging project success will receive priority consideration.

Attachment 1 provides further definitions of the above the above criteria.

The following HLI project submission and approval process will be used.

1. The Budget Planning System (BPS) will be used to apply for HLI funding under the 1776 subactivity and projects are to be prioritized and submitted by District. A project template is attached (Attachment 2) and can be found in BPS.
2. Projects must be on-the-ground work – no monitoring or funding of studies other than implementation monitoring.
3. Projects must have well defined accomplishment targets.
4. Projects must list the partners in the treatment area and the value of their contribution (funding, in-kind, and/or volunteer).
5. Projects will be ranked according to the above criteria by the OR/ID/NV HLI Regional Support team and forwarded to Project Leaders for approval and submission to the Washington Office. The Regional Support Team consists of:

George Buckner, Oregon State Office  
Christian Hagen, Oregon Department of Fish and Wildlife  
Paul Makela, Idaho State Office  
Tom Henker, Idaho Fish and Game  
Elroy Masters, Nevada State Office  
Shawn Espinosa, Nevada Department of Wildlife  
Mike Pellant, Great Basin Restoration Initiative Coordinator

Project Leaders include the following State Office Branch Chiefs:

Miles Brown, Oregon State Office  
Jon Foster, Idaho State Office  
Joe Tague, Nevada State Office

**Timeframe:** Specific deadlines for submission of projects into the BPS system will be forthcoming. It is anticipated that there could be additional project calls at mid-year and for FY 2008 and 2009. Districts and Field Offices are encouraged to begin developing projects in BPS immediately as deadlines may be short.

**Budget Impact:** This IM establishes procedures for submitting for funding under the subactivity 1776 and as such, has potential impacts on the ability of states to secure funding under the HLI.

**Background:** The Healthy Lands Initiative represents a new concept for meeting emerging challenges in managing natural resources for continued multiple use with flexible, landscape-level approaches. The HLI designated six priority areas that include a joint, OR/ID/NV Cooperative Shrub-Steppe Restoration Partnership that represents one of the largest contiguous sagebrush habitats in the region. Within the OR/ID/NV HLI area, a focus area has been designated for the purpose of concentrating funding available for FY 2008. The focus area is subject to revision or elimination in future years.

A detailed map of the OR/ID/NV Cooperative Shrub-Steppe Restoration Partnership area and focus area is available at:

[ftp://ftp.blm.gov/blmshare/ID/ID956/Owyhee\\_Basemap\\_HLI\\_34x44.pdf](ftp://ftp.blm.gov/blmshare/ID/ID956/Owyhee_Basemap_HLI_34x44.pdf)

**Manual/Handbook Sections Affected:** None

**Coordination:** HLI efforts should emphasize coordination with other renewable resource programs and fire/fuels to accelerate treatments, avoid duplication of effort and improve cost effectiveness to better accomplish mutual and complimentary management objectives. Project planning should include coordination with state Sage-grouse Working Groups and Implementation Teams, private land owners, state and local agencies and other non-government organizations with similar or overlapping goals and objectives.

**Contact:** The following Wildlife Program Leaders can provide details; George Buckner, Oregon State Office (503-808-6382), Paul Makela, Idaho State Office (208-373-3809); Elroy Masters, Nevada State Office (775-861-6626).

**Districts with Unions** are reminded to notify their unions of this Instruction Memorandum and satisfy any bargaining obligations before implementation. Your servicing Human Resources Office or Labor Relations Specialist can provide you assistance in this matter.
