I would like to suggest more ATV/motorcycle trails and access. I'd like to see an East/West route, from east of Lakeview to the coast, similar to the North/South route of the Oregon Backcountry Discovery Route.

I think these trail systems allow longer, less area-specific use, which in turn cuts down on environmental impact. I think it also allows for the education of users of the trail systems, teaching them about Oregon resources and history. They are invaluable in teaching younger people about the state in which they live. My family intends to use these as multi-day camping trips during the summer when the kids are out of school, to give them an opportunity to see their state and all it has to offer.
