We understand you are considering a NEW forest plan for Western Oregon. My husband was a life long logger and was eager for reforestation projects. Trees are renewable! Why let them rot?? Josephine County has been going down hill financially since blocking roads and discouraging logging. Right now we will not even have enough staff on the police force (Sheriffs office) to protect the public from all the break-ins, stealing, and narcotic abusers. At this time who would want to move to our area without protection for their children? Doctor's, & business people wouldn't want to buy a home here and certainly not start a business here. Vandalism is rampant in the Grants Pass area. Please open up this area for increased logging; for there are very few jobs to support a family.

Sincerely,
Millie
