Dear BLM Plan Revision Team,

Greetings!

Just want to put in my request for present/future management plans that preserve old growth forests and stream & salmon habitat.

Ideally I would like to see gas fracking prevented at all costs & I am opposed to L&G pipeline production.

Mining abuses need to be curtailed: The (absurd) 1872 mining laws grossly compromise our streams & I encourage intelligent BLM management of such claims.

Best wishes for/from all of us,

Maura Hayes
