Dear Oregon BLM Director,

As a resident of Southwestern Oregon, my family treasures the national beauty of our state and our region. We feel a strong responsibility to be stewards and to advocate for sustainable solutions to manage BLM lands.

Thank you for accepting comments re: to the new management plan proposals.

We are poised to move forward in our public land management, to build a strong coalition between community members, environmentalists, timber and other interested parties to create a model of how to both protect and utilize resources for profit.

This solution takes hard work, yet it is a lasting solution that will solve many concerns including the most challenging issues of responding to climate change. We need to build over local economies yet to build them with a vision of preserving the irreplaceable natural resources of our region.

Please consider how to create a business model that will sustain our resources, build our economy, and contribute to responsible environmental stewardship.

Thank You,
Charlotte Nuessle
