Dear BLM Representative,

I am writing to you in regards to future management of our public BLM lands.

Public lands in Oregon are a vital source of recreation, economy, wildlife and overall states beauty & health.

I ask you to support science based management of these lands. We need to develop a community based alternative that involves.

- Protection & restoration of salmon & streams
- Working with communities to create forest management, fire mitigation & recreation opportunities
- Shift BLM efforts to restore our forests and watersheds!!!
- Protect our remaining old growth forest
- Limit OHV damage to public lands

One of my favorite areas is the Upper Klamath Waterhshed. However there is so much abuse & damage in that area due to OHV's & inappropriate/abusive recreating.

Please keep these lands & their forests & waters healthy & abundant for the communities & our future.

Thank You!

Robyn Janssen
