Oregon BLM
PO Box 2965
Portland, OR 97208

Dear BLM,

I am writing to offer comments on the Resource Management Plans for Western Oregon BLM. I support greater protection for mature and old growth forests across all 2.6 million acres of BLM forests in Western Oregon, and the maintenance of existing Northwest Forest Plan protections.

In these days of low global demand for new building, harming the few undamaged forests we have is economically and physically suicidal.

Undamaged, mature forests in BLM lands have provided tourism, recreation, clean water, salmon habitat, earth-cooling, and disease and fire prevention.

Also, please support enhancement of non-motorized recreation opportunities on western Oregon BLM lands. BLM land should not be a playground for Off Highway Vehicles (OHV). Rare plants, clean water and other recreational uses can be harmed by incompatible OHV use. Please ensure that OHV damage is limited, and that cross-county travel on OHV's on BLM lands is prohibited. There are plenty of other areas that OHVs can use.

Please ensure that the Western Oregon BLM RMP's do the following:

- 1) Shift BLM priorities away from clear-cutting of mature and old growth forests and toward forest and watershed restoration, with a focus on previously managed stands and the existing road network.
- 2) Create jobs through diverse restoration activities - enhancing salmon streams, thinning young plantations, removing crumbling roads and improving fish passage, removing brush and flammable underbrush from areas near communities.
- 3) Protect from logging all remaining mature and old growth forests on these lands, regardless of current land management allocation.

Thank you for the opportunity to comment on these plans.

Sincerely,

Mrs. Margery Winter
