Comments:

1. Please don't allow unlimited target practice on BLM lands. Please designate specific areas for this activity. Areas should be safe, at a reasonable distance from residences, hiking trails, and other recreational activity.
2. Please limit the OHV recreational plan. There are more non-motorized users than motorized. Please don't allow further destruction of habitat and forest. Erosion, noise, and ugliness are big problems. Please allow the public/users to participate in the planning for use of these lands.
