

**Resource Management Plans for Western Oregon
BLM Needs Your Feedback – Comment Form**

What would a successful plan look like to you?

Reclaim more down timber before it rots- Leave more robos open- Allow more herbicide use for noxious weeds.

What kind of management should BLM do more/less of?

I think that instead of paying companies to pile biomass and burn – let wood cutters cut more down fall trees for home owner use.

What is the appropriate geographic scale and scope of the plan?

What new or innovative ideas should BLM consider in this planning process?

Would like to see more cattle grazing in the mountains and on the north bank habitat area.

In regards to the resources BLM manages:

- **What is the appropriate mix of old, mid-aged, and young forests on BLM lands and how should these forests be managed?**
- **How should BLM provided habitat for fish and wildlife and contribute to the recovery of Endangered Species Act listed species?**
- **How should BLM manage forests to protect property and ensure our forests are fire resilient?**

Allow more logging on down timber.

- **How should BLM-administered lands be managed to contribute to clean water and safe drinking water?**
- **How should BLM manage for recreation in western Oregon?**
- **How can BLM lands contribute to local economies and support local communities?**

Allow more select logging – It will be good for habitat wildlife.

How interested are you in working with others to develop a management alternative?

- Very**
 Somewhat
