

Resource Management Plans for Western Oregon BLM Needs Your Feedback – Comment Form

What would a successful plan look like to you?

Protection of all forests with trees older than 100 years.

What kind of management should BLM do more/less of?

Less timber production, more recreation, more wildlife habitat.

What is the appropriate geographic scale and scope of the plan?

I think it should be managed by district.

What new or innovative ideas should BLM consider in this planning process?

I think the BLM should look to end resource extraction on our lands.

In regards to the resources BLM manages:

- **What is the appropriate mix of old, mid-aged, and young forests on BLM lands and how should these forests be managed?**

All old forests should be protected, forests within 10 years of 100 years Should Also be protected. Younger forests should be managed for Wildlife/non-motored Recreation.

- **How should BLM provided habitat for fish and wildlife and contribute to the recovery of Endangered Species Act listed species?**

Any timber harvest should be done to improve ESA listed species.

- **How should BLM manage forests to protect property and ensure our forests are fire resilient?**

I believe our forests should be allowed to burn if the fire is not human caused.

- **How should BLM-administered lands be managed to contribute to clean water and safe drinking water?**

Our roads should be decommissioned and vehicle access should be limited. Also no logging should happen within 250 feet of a stream.

- **How should BLM manage for recreation in western Oregon?**

Hiking and primitive camping should be priority.

- **How can BLM lands contribute to local economies and support local communities?**

World-class recreation sites bring in many people and would support local economies.

How interested are you in working with others to develop a management alternative?

Comments:

I believe native forest BLM land should be protected. All other BLM land should be managed to best provide for wildlife. Eventually all resource extraction on public land should be ended.
