To Whom It May Concern:

CSC, Inc., operating as Medford Fabrication, has conducted business since the mid-1940's and offers a diverse range of design, metal fabrication, assembly, installation and finishing services.

Our corporate purpose: To develop, promote and utilize its facilities, equipment and personnel in ways that best satisfy customer requirements and allow for a long term return to its shareholders, employees and community.

Located in a county where a majority of the land is held by state or federal agencies and its local infrastructure dependent on the relationship that was built on the sharing of revenue from the O & C lands it is critical to reach to reach an agreement to generate resources from those lands to support our community.

As a community leader I spent 6-1/2 years on the Jackson County Budget Committee at a time that this relationship fairly added those resources to locally generated tax revenue to meet the needs our community. For the health of our community long term we would like to support a management plan from the Bureau of Land Management that would allow us to return to this workable partnership. We believe that WOPR Alternative 2 comes closest to management that fulfils the intent of the O & C Act and environmental laws and also meets the financial needs of Jackson County. Properly managed these lands like Medford Fabrication will offer a long term return to our community to fund critical local services.

Yours truly,
