Dear Sir,

Elliot Creek Road

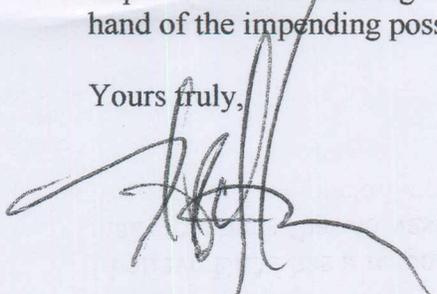

This letter is to let you know of my concerns not only about the impact the BLM Proposal could have on this area but also I am concerned that it has taken a completely different source to inform me of the potential problem. Luckily for me a concerned citizen took the trouble to write to let me know of the possible upcoming proposal for designation of the area to Off- Highway Vehicle Emphasis Area.

I believe BLM has a responsibility to advise neighborhoods effected before they decide to make changes that so vastly affect the community in quality of life and also has huge impact on their pocketbook. The property value will be directly de-valued should this proposal be adopted.

As a homeowner in the area I would like to say the off road vehicles cause noise and trash pollution and result in visual disaster. It should be considered unreasonable to designate any Off Road Vehicle Area opposite a residential neighborhood.

Finally I would like to comment on your process as I see this as a huge area for improvement. A mailing list should be instigated to inform those directly affected first hand of the impending possible changes.

Yours truly,

HD Patton Jr Construction
