To whom it may concern:

I am writing regarding the proposed increase in timber sales on BLM land - which is contained in the document known as the WOPPR. From what I have heard, this proposal will increase the amount of logging on BLM land, including old growth forests.

I oppose this plan. I realize that logging provides an important economic boost - and creates raw materials for products we use. I even worked as a logger myself for a while. However, I think that the WOPPR plan is a mistake. In particular, I am concerned about the destruction of old growth forests that this plan would entail. I think that the forests of the Northwest are valuable the way they are and that they should be protected. I am not opposed to all logging. However, any increase in logging I would eliminate some places that are best left as they are.

Sincerely,
Daemion Lee
