Economic Profiles  
(EPS)

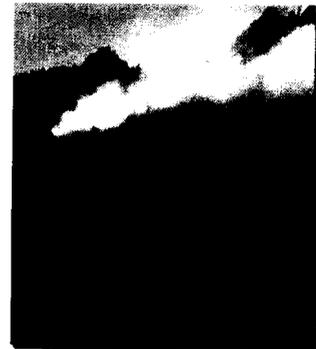

Headwaters Economics is a high-tech nonprofit organization that offers a unique blend of research skills and on-the-ground experience based on over 20 years of work with communities, landowners, public land managers and elected officials. Our mission is to improve community development and land management decisions in the West.

### Our Latest Work

#### Potential for Future Development on Fire-Prone Lands

New data illustrates the potential for more home construction next to fire-prone public lands and the implications for future wildfire fighting costs. Only 14% of forested western private land adjacent to public land is currently developed for residential use. Based on current growth trends, there is tremendous potential for future development on the remaining 86%. Our findings

Click on image to go to the findings.

#### The Potential Economic Impacts of the Badlands Wilderness in Central Oregon

This report explores the question of whether and how designation of the Badlands as Wilderness would benefit the communities and economy of Central Oregon, including Deschutes, Crook and Jefferson counties.

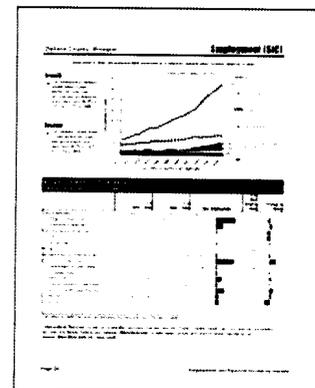

Click on image to go to the report.

#### Economic Profile System (2007)

The latest version of the Economic Profile System is now available. The new version

- has been updated with the latest data.
- makes sure that all of your files are current.
- has an improved industry specialization page.

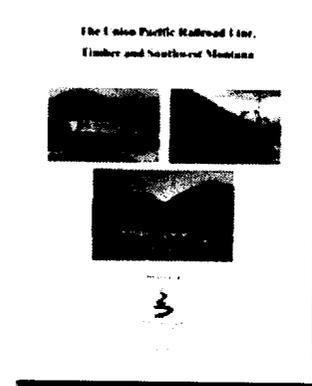

We will be making significant improvements to EPS in the coming year. Check this web site for new features.

### **The Union Pacific Railroad Line, Timber and Southwest Montana**

[This report \(.pdf\)](#) examines the importance of southwest Montana timber to the Union Pacific Railroad line in the state, and the significance of the Union Pacific Railroad as a mode of transportation for lumber and wood products manufacturers in the region.

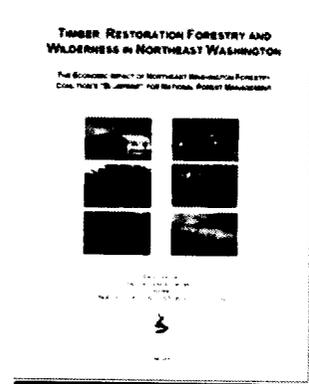

Click on image to get EPS.

### **Timber, Restoration Forestry and Wilderness in Northeast Washington**

[This report](#) examines northeast Washington's communities and economy to determine the possible impacts of the Northeast Washington Forestry Coalition's "Blueprint" proposal for managing National Forest lands in the region.

Click on image to go to the report.

### **Atlas of the Northwest**

The *Atlas of the Northwest* shows areas with high ecological importance, regions where the pace and scale of human activities put pressure on natural resources, and places where there are encouraging opportunities to conserve important natural resources.

Click on map to go to the Atlas.

### **Santa Fe National Forest Workshop**

We recently hosted a public workshop titled "Know your Social and Economic Situation" for the Santa Fe National Forest. For details about the workshop, discussion notes, and economic analysis, [click here](#).
