Re: OHV Emphasis Areas

Team Members

I have family that own property in the area of Elliott Creek which is a proposed OHV Emphasis Area. Allowing legal OHV use of this area would be a travesty. OHV use illegally in this area has been a problem for years and continues today. Constant trespassing, poaching, littering, illegal fires, and rampant use of firearms on private property is evidently unstoppable. Local property owners have reported all these serious infractions for years with no relief. The Forest Service, OSP, and Sheriff have all been notified but all claim they don't have the manpower to enforce this area.

Keep the areas that have been used for years (Quartz Creek, Johns Peak, etc.) and totally close all other areas.

We purchased forest property for a reason, peace and quiet. Sincerely William L. Lumsich
