Re: Western Oregon Plan Revision Draft

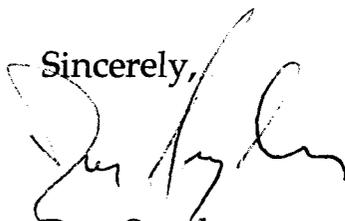

Greetings,

I am writing to put on record my opposition to your management plan for Oregon's public forest land under your stewardship.

Your revision draft is a plan which will destroy shrinking wildlife habitat, loosen already careless logging practices and move even further away from the goal of sustained yield forest management and expose our public lands to the degradation of unrestrained motorized vehicle use.

I urge you to resist the pressure from the Bush Administration to manage our forests for the short term monetary gain of a few at the expense of our states patrimony.

Sincerely,

Don Snyder  
Ashland, Oregon
